

GOVERNMENT POLYTECHNIC, KOLHAPUR

(An Autonomous Institute of Government of Maharashtra)

Curriculum Document

CURRICULUM: MPECS-2020

(Outcome Based Curriculum)

for

DIPLOMA IN INDUSTRIAL ELECTRONICS

Secretary

Chairman

Programmewise Board of Studies (PBOS)

Industrial Electronics Programme

Government Polytechnic, Kolhapur

INDEX

| Sr. No. | Description | Page No. |
|------------|---|-------------|
| | SECTION – I : Curriculum Philosophy and Structure | |
| 1. | Curriculum Development : Introduction and Process of Development of Outcome Based Curriculum | 3 |
| 2. | Vision, Mission, Programme Educational Objectives (PEOs), Programme Outcomes (POs) and Programme-specific Outcomes (PSOs) | 11 |
| 3. | Overview and Salient features of Curriculum: MPECS-2020 | 13 |
| 4. | Curriculum Structure : Teaching and Examination Scheme (Levelwise) | 16 |
| 5. | Path-wise Course Structure for Sample Paths | |
| | Path-1 : Students admitted to First Year - X std. pass outs | 19 |
| | Path-2 : Students admitted directly to Second Year with XII Science | 21 |
| 6. | Exemptions for courses | 22 |
| 7. | Course Equivalence for previous MPECSs | 23 |
| 8. | Proformas for evaluation of term work, oral, practical | 31 |
| | SECTION – II : Syllabi of Courses (Level-wise) | |
| 1. | Level I – Foundation Courses | 37 |
| 2. | Level II – Life Skills and Professional Skills Courses and Non Credit Courses | 111 |
| 3. | Level III – Basic Technology Courses | 145 |
| 4. | Level IV – Applied Technology Courses | 239 |
| 5. | Level V – Management and Diversified Courses | 323 |

SECTION – I CURRICULUM PHILOSOPHY AND STRUCTURE

1. CURRICULUM DEVELOPMENT: INTRODUCTION AND PROCESS OF DEVELOPMENT OF OUTCOME BASED CURRICULUM

Curriculum Design and Development:

Curriculum is an absolute instructional and effective instrument designed with a student centered approach. It incorporates systematic method of teaching learning process. It is a sequence of planned academic activities; on completion of which the desired programme outcomes are expected to be attained in the student. The curriculum and the course contents are expected to motivate the students to acquire desired level of knowledge and skills. An emphasis and an attempt have been made in the curriculum to get a perfect blending of theoretical concepts and actual requirements of industry. Keen attention has been provided to make it more structured by incorporating the valuable suggestions of industrial experts of PBOSs and feedback by the field and academic professionals. An overview of systematic and scientific mode of implementation and evaluation has also been pondered; consequently a practicable model of it has been achieved. It incorporates specific guidelines and assessment criteria for theory/practical/oral modes of evaluation. Specification table for each course has been provided to prepare question paper justifying meticulous coverage.

Curriculum philosophy:

The impact of globalization and rapid changes in the engineering science and technology has been a great cause of comprehensive and noticeable change in engineering fraternity, hence the institutions. Only way to incorporate such a transformation, is to modify the curriculum, preserving the consistency of engineering education. Frequent review and feedback from the experts and the freedom of autonomous status of the institution have encouraged to undertake relevant changes in the curriculum to make it versatile. Consequently the desired competencies and skills are transformed amongst the students in pursuing their preparedness to cope up with the global changes. It aims to promote self-reliance and satisfaction of acquiring modern engineering concepts and multi capabilities within the students to make them model technicians.

"Curriculum is an educational program designed and implemented to achieve specified programme outcomes"

Hence, in a broad sense, a curriculum incorporates the following:

- To define the purpose of education
- To accept systematic planning methods

- To confirm implementation strategies
- To identify and to incorporate needs of industries
- To follow the policy directives
- To cope-up with social concerns
- To aim at personality development of students
- To allow future developments and challenges in emerging Science and technology.

Outcome-based Curriculum

Outcome based curriculum is the curriculum based on the concepts of outcome-based education (OBE) philosophy. India is a permanent signatory of the Washington Accord - the international agreement among bodies responsible for accrediting engineering programmes with the National Board of Accreditation (NBA) as the national authority for accrediting degree and diploma programmes in engineering in India. Hence as per the accreditation criteria of the NBA, the curriculum of the Institute is expected to be outcome based.

Outcome Based Education (OBE) is an educational approach in which all the activities of an education system are based on attainment of pre-defined learning outcomes of student. The approach is to be included in the following three aspects of education system: i) Curriculum Design, ii) Curriculum Implementation, iii) Students' Evaluation. The flow diagram shown below summarizes the elements of Outcome-based Education System. The glossary of terms used in academic autonomy and OBE are provided for reference.

OUTCOME BASED EDUCATION SYSTEM

Vision of Institute Mission of Institute

(developed by Institute in confirmation with all stakeholders)

Vision of Programme Mission of Programme

(developed by programme in confirmation with all stakeholders) (consistent with Institute Vision and Mission)

Programme Educational Objectives (PEOs) (3 to 5)
Mission-PEO (M-P) Consistency Matrix

Programme Outcomes (POs) - (10 - defined by NBA) **Programme Specific Outcomes (PSOs)** - (2 to 4 - to be defined by Programme)

Preparation of Curriculum Framework

Broad Course Areas

Course Levels

Course Structure – Teaching and Evaluation Scheme

Design of Course Syllabi (for each course)

T

Course Competencies (CCs) as per domains of learning Course Outcomes (COs) (around 6) PO-PSO and CO Consistency Matrix

• Gap Analysis and Remedial Supplement Design •

Identification of gaps between COs and POs-PSOs for curriculum Design of supplementary remedial activities to bridge the gaps

Curriculum Implementation

- COs Attainment
- Design of CO assessment process and rubrics
 - Setting attainment levels
 - CO Attainment Analysis

• POs-PSOs Attainment •

- Design of PO-PSO assessment process and tools
 - Setting attainment levels
 - POs-PSOs Attainment Analysis

Glossary of terms related to Outcome Based Education

Outcome-Based Education (OBE) - It is an educational approach in which all the activities of an education system are based on attainment of pre-defined learning outcomes of student.

The approach is to be included in the following three aspects of education system: i) Curriculum Design, ii) Curriculum Implementation, iii) Students' Evaluation

Washington Accord and NBA – It is an International Agreement among bodies responsible for accrediting undergraduate engineering degree programmes. Established in 1989, the signatory countries as of 2014 are Australia, Canada, Taiwan, Hong Kong, India, Ireland, Japan, Korea, Malaysia, New Zealand, Russia, Singapore, South Africa, Sri Lanka, Turkey, the United Kingdom and the United States. National Board of Accreditation (NBA), India has become the permanent signatory member of the Washington Accord on 13th June 2014.

The membership of Washington Accord is an international recognition of the quality of undergraduate engineering education offered by the member country and is an avenue to bring it into the world class category. It encourages and facilitates the mobility of engineering graduates and professionals at international level.

NBA accreditation is a quality assurance scheme for higher technical education in India.

The Washington Accord covers engineering degrees and diploma under outcome-based education approach.

Vision of Institute - It is a statement that defines concisely the aspirations to be achieved in the near future by the Institute

Mission of Institute - It is a set of statements that defines the broad steps to be executed to achieve the vision of the Institute

Vision of Programme - It is the vision statement for a particular educational programme (like Civil Engineering Programme, Mechanical Engineering Programme, etc.). Programme Vision should be consistent with the Institute vision

Mission of Programme - It is the set of statements that define the broad steps to be executed to achieve the vision of the educational programme

Programme Educational Objectives (PEOs) - It is a set of 3 to 5 statements defining the objectives to be attained in order to execute the mission

Programme Outcomes (POs) – It is a set of ten generic outcomes, stated by NBA, expected from any engineering diploma-holder in India

Programme-specific Outcomes (PSOs) – It is a set of 2 to 4 outcomes to be defined by the programme under consideration in addition to the POs

Course Outcomes (COs) – It a set of about 6 outcomes, expected to be attained by student on learning a course. Course Outcomes shall be defined in curriculum for each course. Course outcomes are worded using action verbs like solve, explain, calculate, compare, distinguish, describe, draw, etc. **Mission-PEO Consistency Matrix** – It is a matrix showing degree of consistency of PEOs with mission

PO-CO Consistency Matrix – It is a matrix showing degree of consistency of COs with POs and PSOs

Competency – It is the set of specific abilities, categorized as cognitive, psychomotor and affective domains of learning, from which course outcomes statements are derived

Cognitive domain – It is the set of abilities related to thinking

Bloom's Revised Taxonomy of Cognitive Domain : It is a six-level cumulative hierarchy of cognitive abilities in the order of increasing complexity as follows :

Remembering > Understanding > Applying > Analyzing > Evaluating > Creating

Psychomotor Domain: It is the set of abilities related to physical and psychological skills

Taxonomy of Psychomotor Domain : It is a six-level cumulative hierarchy of cognitive abilities in the order of increasing complexity as follows :

Perception > Set > Guided response > Mechanism > Adaptation > Origination

Affective Domain: It is the set of abilities related to attitudinal development

Taxonomy of Affective Domain : It is a five-level cumulative hierarchy of affective abilities in the order of increasing complexity as follows :

Receiving > Responding > Valuing > Organizing > Characterizing

Educational Technology : It is the systematic study of theoretical foundations and material tools to facilitate learning

Glossary of terms used in Academic Autonomy and MPECS

Academic Autonomy – It is the freedom and responsibility offered to the Institute by the Government to attain high quality standards in the following three dimensions:

i) Design of own curricula ii) Conduct of own examinations iii) Award of own diploma

Multi-point Entry and Credit System (MPECS) – It is a system of education in which student can be admitted at different entry levels of qualification and he is offered *credits* along with marks on passing in a course

Credits – It is the number of weekly instructional hours provided for a course in the curriculum

Programme – It is the particular branch of Engineering in which Diploma is awarded. e.g. Civil Engineering Programme, Mechanical Engineering Programme, etc.

Curriculum – It is a document providing plan of the complete academic activity to be conducted by student for award of Diploma in a Programme in tune with the vision of the Institute

Course – It is a particular subject defining study and evaluation unit of the curriculum. e.g. Applied Mechanics, Engineering Drawing-1, etc.

Syllabus – It is the complete academic information regarding a particular course in a curriculum

Course Registration (CR) - It is the procedure to be carried out by every student at the beginning of every semester in which he/she has to declare the courses he/she is going to study in that semester as per academic time table of the Institute. The registration is to be done as per *Rules of Registration* of the Institute.

Examination Registration (ER) - It is the procedure to be carried out by every student at the beginning of every semester in which he/she has to declare the courses in which he/she is going appear for examination in that semester as per examination time table of the Institute. The registration is to be done as per *Rules of Registration* of the Institute.

Curriculum MPECS-2020 - It is the Curriculum of the Institute revised in the year 2020. It is applicable to the students admitted since 2020

Programme Department – It is the department of the Institute offering Diploma in a particular Programme. e.g. Civil Engineering Department, Mechanical Engineering Department, etc.

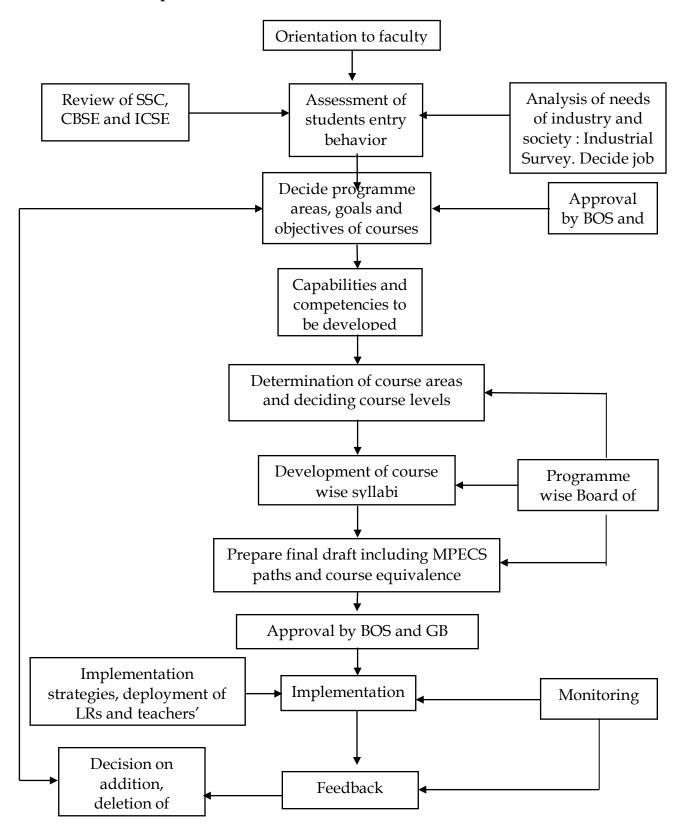

Programme Dean – He/she is the Head of Department of a Programme Department

Allied Department – It is department that does not award diploma and contributes to curriculum implementation of many Programmes. e.g. Applied Mechanics Department, Workshop Department, Science Department, English Department, Mathematics Department, etc.

Academic Autonomy and MPECS at Government Polytechnic, Kolhapur -

- Year of award of academic autonomy: 1992 Year of award of MPECS and Flexibility: 1994 Government Polytechnic, Kolhapur is the first Government Polytechnic in Maharashtra to have been awarded academic autonomy
- Bodies and Cells under Academic Autonomy:
- i) Governing Body
- ii) Board of Studies
- iii) Programme-wise Boards of Studies
- Examination Committee Curriculum Revisions under Autonomy: 1992, MPECS-2001, MPECS-2006, MPECS-2010, MPECS-2013, MPECS-2016, MPECS-2020
- Award of Diploma in *Convocation Ceremony* every year

Curriculum Development Model:

2. VISION, MISSION, PROGRAMME EDUCATIONAL OBJECTIVES (PEOs), PROGRAMME OUTCOMES (POs) AND PROGRAMME-SPECIFIC OUTCOMES (PSOs)

Vision of Institute:

The institute envisions to be one of the highly recognized institutes for developing competent technicians for quality professional services and entrepreneurship to cater the needs of industry and society.

Mission of Institute:

- To educate and train in multi-disciplinary multi-level programmes to develop competent technicians and skilled manpower for industrial needs
- To ensure employability, encourage entrepreneurship, promote lifelong learning
- To inculcate in students the qualities of a good citizen at individual, social and professional level
- To provide quality management system with focus on effective student-centric education and high recognition

Vision of Programme:

Programme of high recognition and flexibility for the development of competent technical manpower in the profession of Industrial Electronics.

Mission of Programme:

- M1: To provide technical education of high recognition to the aspiring learners.
- M2: To empower student's competency to fulfill nation's project of Digital India
- M3: To adapt student centric approach in teaching-learning process to mould students for skill oriented professional, social and ethical practices
- M4: To utilize flexibility in curriculum development to incorporate recent and emerging advancements in the field of Industrial automation.

Programme Educational Objectives (PEOs):

Diploma graduates will,

- **PEO1.** Apply fundamental knowledge of Basic Sciences, Mathematics and Industrial Electronics engineering in problem solving.
- **PEO2.** Operate, demonstrate and debug the systems in the field of Industrial Electronics engineering and to resolve real life problems.
- **PEO3.** Attain technical knowledge, skills and attitude to acquire further advancement in technology.
- **PEO4.** Work as a responsible team member of an organization to achieve its goal or can be an individual entrepreneur.

Programme Outcomes (POs)

1. Basic and Discipline specific knowledge: Apply knowledge of basic mathematics, science and

Engineering fundamentals and engineering specialization to solve the engineering problems.

- **2. Problem analysis:** Identify and analyse well-defined engineering problems using codified standard methods.
- **Design/ development of solutions:** Design solutions for well-defined technical problems and assist with the design of systems components or processes to meet specified needs.
- **4. Engineering Tools, Experimentation and Testing:** Apply modern engineering tools and appropriate technique to conduct standard tests and measurements.
- **5. Engineering practices for society, sustainability and environment:** Apply appropriate technology in context of society, sustainability, environment and ethical practices.
- **6. Project Management:** Use engineering management principles individually, as a team member or a leader to manage projects and effectively communicate about well-defined engineering activities.
- 7. **Life-long learning:** Ability to analyse individual needs and engage in updating in the context of technological changes.

Programme Specific Outcomes (PSOs)

- **PSO 1: Operate and Maintain:** Competency to apply the concepts of Industrial Electronics in the operation and maintenance of engineering application systems.
- **PSO 2: Supervision and providing solution:** Ability to supervise work and reach appropriate solution to simple practical problems in Electronics engineering industr

3. OVERVIEW AND SALIENT FEATURES OF CURRICULUM: MPECS 2020

3.1 Overview of Curriculum MPECS 2020

| Total Nu | mber of Credits | 180 |
|-----------------------|-----------------------------|-------------------------------|
| Number of courses | Total | 42 |
| offered | Theory | 27 |
| Maximum numbe | er courses in a semester | 08 |
| Total Ma | aximum Marks | 4500 |
| | Number | 16 |
| Courses in Level IV | Credits | 67 |
| and V | Marks | 1700 |
| | Number | 10 |
| Courses in Level I | Credits | 43 |
| | Marks | 1075 |
| | Number | 06 |
| Courses in Level II | Credits | 12 |
| | Marks | 225 |
| | Number | 10 |
| Courses in Level III | Credits | 58 |
| | Marks | 1500 |
| | Number | 07 |
| Courses in Level IV | Credits | 31 |
| | Marks | 825 |
| | Number | 09 |
| Courses in Level V | Credits | 36 |
| | Marks | 875 |
| Ratio of TH:PR in % | Credit-wise | 51:49 (60:40 to 50:50) |
| | Marks-wise | 59:41 |
| No. of Allied Courses | | 05 |
| Elective Courses | No. of Elective courses | 04 |
| Elective Courses | Options per Elective Course | 02 |
| Number of Practical | External | 12 |
| Exams | Internal | 24 |

Diploma shall be awarded on the basis of marks obtained in Level IV and Level V courses

3.2 Salient Features of Curriculum MPECS 2020

Addition and deletion of Courses as compared to previous MPECSs with justification:

After considerable discussion with the industry person and PBOS members we found it necessary to add and delete some courses as compared to previous MPECS

> Following courses are newly added:-

- 1. Sports & Yoga (2 Credits, Non-Exam Course)
- 2. Introduction to IT System (4 Credits)
- 3. Environmental Science (Non-credit, Non-Exam Audit course)
- 4. Essence of Indian Traditional Knowledge. (Non-credit, Non-Exam Audit course)
- 5. Indian Constitution (Non-credit, Non-Exam Audit course)
- 6. Internship 1 (4 weeks) (3 Credits)
- 7. Internship 2 (3 weeks) (2 Credits)
- 8. Entrepreneurship & Startups (4 Credits)
- 9. Consumer Electronics (Elective) (5 Credits)

> Following courses are deleted:

- 1. Generic Skills (4 Credits)
- 2. Computer fundamentals and Applications (3 Credits)
- 3. Higher Maths (Elective) (4 Credits)
- 4. Non-conventional Energy Resources (Elective) (4 Credits)
- 5. VLSI (Elective) (6 Credits)
- 6. Digital communication system (Elective) (5 Credits)
- 7. Digital system design(Elective) (5 Credits)
- 8. Energy conservation(Elective) (5 Credits)
- 9. Data communication system(Elective) (5 Credits)

> Major modifications in Course Contents with justification:

To adapt OBE for the courses-

- 1. Under term end examination scheme
 - a. Term work assessment is removed for all the courses
 - b. For all the courses term end practical assessment (PR) scheme is adopted
- 2. Electronics Circuit Design course made mandatory
- 3. Intstead of PIC Microcontroller course is Advance Microcontrollers course is introduced
- 4. 8051 Microcontroller course is renamed as Microcontrollers
- 5. Instumentation course is made elective course.

- 6. Theory credits of following courses are reduce from 4 to 3
 - a. Programmabe Logic Control
 - b. Power Electronics I
 - c. Power Electronics II
 - d. Principles of Control System
 - e. Engineering Physics
 - f. Engineering Chemistry
 - g. Embedded System
 - h. Digital Techniques and Applications
 - i. Linear Integrated Circuits
 - j. Circuit & Networks
 - k. Microcontroller
 - 1. Electronics Circuit Design
- 7. Practical credits of Engineering Graphics course are reduce from 4 to 2
- 8. Micro projects are added in the programme core courses from 3rd semester onward
- 9. Practical credits of the following courses increased from 2 to 4
 - i) Applied Electronics
 - ii) Linear Integrated circuits
 - iii) Microcontroller
 - iv) C programming

Changes in Implementation Strategy and Treatment:

- 1. In line with the policies of MSBTE there will be no backlog subjects for direct second year admitted students. Instead a bridge course basic electronics is added without credits with a curriculum to be covered in 24 theory lectures
- 2. Outcome based curriculum has been designed in compliance with new NBA SAR
- 3. To make MPECS 2020 curriculum comply with AICTE model curriculum the following modifications are done
 - a. Three non credit audit courses are introduced
 - i. Environmental Science
 - ii. Essence of Indian Traditional Knowledge
 - iii. Indian Constitution
 - b. Internship 1 and 2 are introduced as credit courses with total 5 credits
 - c. Introduction of new credit courses
 - i. Sports & Yoga
 - ii. Entrepreneurship and Development

4. CURRICULUM STRUCTURE: TEACHING AND EXAMINATION SCHEME (LEVEL WISE)

| | | | | | | 17 | 14 | 36 | 400 | 100 | 375 |

Note:

- 1) Credits of Internship1 and 2 (2+3=5) not shown under TH or PR credits
- 2) Number of TH hours = 98 (including 6 Hours of Non-credit courses), so total TH credits = 98-6 = 92
- 3) Number of PR hours = 83, Number of PR credits = 83
- 4) Total number of credits = 92 (TH) + 83(PR) + 5(Internship 1 & 2) = 180

SECTION – II SYLLABI OF COURSES (LEVEL WISE)

LEVEL- I FOUNDATION COURSES

COURSE ID:

Course Name : ELECTRONIC COMPONENTS AND APPLICATIONS

Course Code : EIG101 Course Abbreviation : GECA

TEACHING AND EVALUATION SCHEME:

Pre-requisite Course(s) : <*nil* >

Teaching Scheme:

| Scheme component | Hours / week | Credits |
|------------------|--------------|---------|
| Theory | 04 | 06 |
| Practical | 02 | 06 |

Evaluation Scheme:

| Mode of | Progressive A | Assessment | Term | Total | |
|--------------------------|---|---|--------------------|---|-------|
| Evaluation | Theory | Practical | Theory | Practical * | Total |
| Details of Evaluation | Average of two tests of 20 marks each to be converted out of 20 marks | (i) 25 marks for each practical (ii)One PST of 25 marks | One paper (3 hour) | Term End Practical Exam (03 hours) | |
| Marks | 20 | | 80 | 50 I | 150 |

I* Assessment as per pro-forma II

I – Internal Examination

RATIONALE:

This course is intended to help the students to get clear idea of fundamentals of electronic components and develop practical skills in using various types of electronic components employed in electronic industries. It will also make the students familiar with the suitability of various electronics components for different applications. More over this course is intended to develop skills of testing components that will be really needed for the project and setting up of many experiments in other basic and applied technology courses.

COMPETENCY:

Use electronic components in electronic equipment.

Cognitive: Identify and illustrate the use of various electronic components.

Psychomotor: Demonstrate and Measure values of various electronics components

Affective: Attitude of (i) Identify (ii) Test/Measure (iii) Choose (iv) Operate

COURSE OUTCOMES:

EIG101-1 Identify and use various types of resistors in different applications.

EIG101-2 Identify and use various types of capacitors in different applications.

EIG101-3 Identify and use various types of inductors in different applications.

EIG101-4 Illustrate the use of cables and connectors in different applications.

EIG101-5 Illustrate the use of switches ,relays and displays in industrial applications.

EIG101-6 Illustrate the use of PCB,ICs and SMDs in electronic equipment.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels:1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | Programme Outcomes POs and PSOs | | | | | | | | |

| EIG101-6 | 3 | 2 | 2 | 3 | 3 | 2 | 3 | 3 | 3 |

CONTENT:

A) PRACTICALS / EXERCISES:

Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any 12 experiments).

| Sr No. | Title of Practical Exercise | Skills / Competencies to be Developed | Course Outcome |
|-----------|--|---|-------------------|
| 1) | Identification electronic equipments in electronics laboratory | Identify different electronic equipments. Operate DMM, power supply, CRO, function generation. Illustrate the use of breadboard | EIG101-1 |
| 2) | Test different types of fixed resistors. | Identify different types of fixed resistor Find value ,tolerance and wattage of different types of resistor using colour code Measure value of resistor on DMM | EIG101-1 |
| 3) | Test the performance of Potentiometer | Test variation of resistance in linear, logarithmic potentiometer. Record the reading in observation table Draw graph of potentiometer by rotation of shaft on x-axis and resistance on y-axis. | EIG101-1 |

| 4) | Test the performance of TDR | Test variation of resistance in TDR Record the reading in observation table Draw graph of TDR by temperature in Celsius on x-axis and resistance on y-axis. | EIG101-1 |
|----|--|---|-----------|
| 5) | Test the performance of LDR | Test variation of resistance of LDR Record the reading in observation table Draw graph of LDR by intensity of light in cm on x-axis and resistance on y-axis. | EIG101-1 |
| 6) | Test different types of fixed capacitors. | Identify different types of fixed capacitors Find value of different types of capacitors using various method. | EIG101-2 |
| 7) | Test different types of Variable Capacitor | Identify different types of variable capacitors Find value of different types of capacitors using LCR Q- meter. | EIG101-2 |
| 8) | Test different types of inductors. | Identify different types of inductors Find value of different types of inductors using color code and LCR Q meter. | EIG101-3 |
| 9) | Identification of different types of cables | 1)Identify different types of cables. | EIG101-4 |
| | Identification of different types of connectors. | 2)Demonstrate the use of cables.1)Identify different types of connectors.2)Demonstrate the use of connectors. | EIG101-4 |
| 11 | Test performance of Switches | 1)Identify different types of switches,2)Test the working of switches.3)Measure contact resistance of switches using DMM. | EIG101-5 |
| 12 | Test performance of relay | 1)Identify different types of Relays 2)Test the working of relay 3)Measure of contact resistance of relays. | EIG101-5 |
| 13 | Test performance of Displays | 1)Identify different types of Displays.2)Test the working of the displays.3)Display numbers and letters using displays circuit. | EIG101-5 |
| 14 | Identification of SMDs and ICs | Identify SMDs and ICs. Read and interpret data sheet of | EIG 101-6 |

| | | various IC and SMD components. | |
|----|-------------------------------|--|-----------|
| 15 | Design PCB(Demonstration | 1) Illustrate the process of preparing a | EIG 101-6 |
| | using software tool or Video) | sample circuit on single sided PCB | |
| | | 2)Test the PCB | |
| 16 | Visit the industry | 1)Visit to any Electronic component /PCB manufacturing industry | EIG 101-6 |
| | | 2)Write the visit report. | |

B) THEORY:

Section I

| Chapter | | Topics / Sub-topics | Lectures (Hours) | Theory Evaluation (Marks) | | |
|----------|---|---|---------------------|------------------------------|--|--|
| EIG101-1 | Identi | ify and use various types of resistors in different of | application | S. | | |
| 01 | Resis | stors: | 12 | 14 | | |
| | 1.1 | Components-discrete, non-discrete, Active, passive components. | | | | |
| | 1.2 | Concept of Resistors, Classification of resistors, Materials used for resistors, Definition of Linear and nonlinear resistors. | | | | |
| | 1.3 | Resistors general specification: - maximum voltage rating, power rating, temperature coefficient, tolerance, Ohmic range, operating temperature | | | | |
| | 1.4 | Construction, application of Fixed Resistor - Carbon film resistors, Standard Wire wound resistors | | | | |
| | 1.5 | Construction, working, application and characteristic curves of Non-Linear resistor-TDR, LDR | | | | |
| | 1.6 | Concept of Variable resistor- linear & logarithmic potentiometer, and trimmer and rheostat | | | | |
| | 1.7 | Comparison between Linear and Logarithmic Potentiometer | | | | |
| | 1.8 | Color Coding with three, four and five bands and Equivalent circuit of resistors | | | | |
| EIG101-2 | 101-2 Identify and use various types of capacitors in different applications. | | | | | |
| 02 | _ | acitors: | 12 | 14 | | |
| | 2.1 | Concept of Capacitor, Classification of capacitors, dielectric Materials used for capacitors | | | | |
| | 2.2 | Capacitors specification:-capacitor working | | | | |

| EIG101-3 | voltage, Insulation resistance, c/v ratio, power factor, Capacitive Reactance 2.3 Construction, application of Fixed Capacitor -Disc Ceramic capacitor, Aluminum electrolytic capacitor 2.4 Construction, working, applications of Variable capacitor,-Air Gang, PVC gang capacitor, Trimmer capacitor 2.5 Coding of capacitors using numerals and color band system and Equivalent circuit of capacitors Eldentify and use various types of inductors in different applications | ions. | |
|----------|--|-------|----|
| 03 | Inductors: | 8 | 12 |
| | 3.1 Concept of Inductor, Classification of Inductor 3.2 Specifications:-self inductance, mutual inductance, coefficient of coupling, Q factor, Inductive Reactance | | |
| | 3.3 Construction, application of Fixed Inductor- Air core, iron core and ferrite core 3.4 Frequency range Inductors - (A.F.,R.F.,I.F.), filter choke and toroidal Inductor 3.5 Construction, working, application of variable | | |
| | Inductor-Slug tuned Inductor, Tapped Inductor. 3.6 Colors coding of Inductor and Equivalent circuit of Inductor. | | |
| | Total | 32 | 40 |

Section II

| Chapter | Topic Subtopics | Teachin g Hours | Theory Evaluation Marks |
|----------|--|--------------------|-------------------------------|
| EIG101-4 | 4 Illustrate the use of cables and connectors in differer | ıt applicatio | ons. |
| 04 | Cables and Connectors | 10 | 14 |
| | Cables: 4.1 Types of cable, specifications of cables-characteristic impedance, current carrying capacity, flexibility. 4.2 Construction, and applications of coaxial cable, telephone cable, FRC cable, Twin core cable(Twisted & Shielded type)cable used for CRO, optical Fiber Cable. | | |

| | Connectors: 4.3 Types of connectors, specifications of connectors- contact resistance, breakdown voltage, insulation resistance 4.4 Construction and applications of BNC, TNC, RF, D series, Audio, Video, printer, edge, FRC connectors, Phone Plug & Jacks | | |

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

a) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per given criteria in the laboratory manual

| Domain Particulars | | Marks out of 25 |
|--------------------|----------------------------|-----------------|
| Cognitive | Preparation for practical | 05 |
| Davahamatan | Operating skills | 05 |
| Psychomotor | Observation/Result | 05 |
| A CC 4 : | Discipline and punctuality | 05 |
| Affective | Procedure/Safety | 05 |

| Measures/Presentation | |
|-----------------------|----|
| TOTAL | 25 |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment Pro-forma II*.

| Sr. No. | Criteria | Marks allotted |
|---------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram. | 05 |
| 2 | Observations & Result Table | 05 |
| 3 | Sample Calculations with relevant Formulae. | 05 |
| 4 | Proper Graphs & Procedure / workmanship Safety measures | 05 |
| 5 | Oral Based on Term Work | 05 |
| | Total | 25 |

^{*}Final marks of practical assignments shall be awarded as per Assessment Pro-forma II.

b) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. no | Criteria | Marks allotted |
|--------|--|----------------|
| 1 | Preparedness for practical | 10 |
| 2 | Correct figures / diagrams | 10 |
| 3 | Observation Table | 10 |
| 4 | Result / calculations / graphs | 10 |
| 5 | Safety / use of proper tools / workmanship | 10 |
| | Total | 50 |

^{*}Assessment at semester end practical exam as per Pro-forma II.

^{*} Assessment as per pro-forma II

RATIONALE:

Physics is the foundation of engineering and technology. The development of all engineering areas requires good understanding of fundamental principles in physics. Studying physics develops scientific methodology and technical aptitude in the students. Applications of principles of physics in engineering fields create interest and motivate the students.

COMPETENCY:

Apply principles of Physics to solve engineering problems as follows:

Cognitive: i) Understanding and applying principles and laws of Physics to simple practical

problems/ situations. ii) Observing iii) Classifying iv) Interpreting

Psychomotor: Handling of instruments, apparatus and tools

Affective: Skill of i) working in team ii) curiosity, interest and self-confidenc

COURSE OUTCOMES:

CCG102-1 Estimate errors in measurement of physical quantities.

CCG102-2 Select proper material in engineering industry by analysis of its physical properties

I – Internal Examination

- **CCG102-3** Use basic principles of wave motion for related engineering applications
- CCG102-4 Apply principles of optics, electricity to solve engineering problems
- **CCG102-5** Express importance of Lasers, X-rays and nanotechnology
- **CCG102-6** Apply principles of fiber optics for related engineering applications

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX

[Note: Correlation levels: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| Competency and COs | PO 1 Basic and discipline specific knowledge | PO 2 Problem analysis | PO 3 design/ developme nt of solutions | PO 4 Engineering Tools, experimenta tion and testing | practice for | | PO 7 Life-long learning | PSO1 | PSO2 |
|--|--|-----------------------------|--|---|--------------|---|-------------------------------|------|------|

CONTENT:

A) LABORATORY WORK: Laboratory work shall consist of the following:

Minimum 10 required (* represents as experiments to be carried out compulsory and 02 experiments should be from the remaining list)

List of Laboratory experiments and related skills to be developed: (Each experiment 02 hours)

| Sr. No. | Title of Experiment | Skills to be developed | Course Outcome |
|------------|---|---|-------------------|
| 1* | To measure internal and external dimensions of hollow cylinder by using Vernier Caliper | i) Going through safety measures required ii) Determine least count and zero error in the measuring instrument. iii) Measuring internal and external dimensions of given objects iv) Handling the measuring instruments for measuring depth, thickness etc. v) Tabulating observations and calculations | CCG102-1 |

| | | vi) Interpreting results | |
|----|--|---|----------|
| | | | |
| 2* | To measure the diameter of bob and thickness of plate by using Vernier Caliper | i) Going through safety measures required ii) Determine least count and zero error in the measuring instrument. iii) Measuring dimensions of given objects iv) Handling the measuring instruments for measuring depth, thickness etc. v) Tabulating observations and calculations | CCG102-1 |
| 3* | To measure the | vi)Interpreting results i) Going through safety measures required | CCG102-1 |
| 3 | diameter of bob and thickness of plate by using Micrometer screw gauge | ii) Determine least count and zero error in the measuring instrument. iii) Measuring dimensions of given objects iv) Handling the measuring instruments for measuring depth, thickness etc. v) Tabulating observations and calculations vi) Interpreting results | CCG102 1 |
| 4* | To determine the viscosity of liquid by Stokes method. | i) Going through safety measures required ii) Measuring diameter of steel ball using micrometer screw gauge. iii) Measuring terminal velocity of steel ball in the liquid column. iv) Use of stop watch for measurement of time. v) Tabulating observations and calculations vi) Interpreting results | CCG102-2 |
| 5 | To determine the buoyancy force on a solid immersed in a liquid | i) Going through safety measures required ii) Measuring dimensions of given solid using vernier caliper or micrometer screw gauge. iii) Measuring the volume of liquid collected iv) Tabulating observations and calculations v) Interpreting results | CCG102-2 |
| 6* | To measure unknown resistance of wire by Ammeter – Voltmeter method. | i) Going through safety measures required ii) Drawing the circuit diagram of the required experiment. iii) Connecting the instruments as per circuit diagram. iv) Measuring the value of potential difference & current in the circuit. v) Tabulating observations and calculations vi) Interpreting results | CCG102-4 |
| 7* | To verify Snell's law using glass slab | i) Going through safety measures required ii) Drawing necessary ray diagram iii) Measuring angles of incidence and refraction iv) Tabulating observations and calculations v) Interpreting results | CCG102-4 |
| 8* | To determine refractive index of prism by pin method | i) Going through safety measures required ii) Removing parallax between images and pins iii) Measuring the angle of refraction correctly iv) Drawing path of refracted ray through prism v) Drawing i-δ graph vi) Tabulating observations and calculations vi) Interpreting results | CCG102-4 |

| 9 | To study Total Internal Refletion using glass slab | i) Going through safety measures required ii) Drawing necessary ray diagram iii) Measuring angles of incidence and refraction iv) Tabulating observations and calculations v) Interpreting results | CCG102-4 |
|-----|--|--|----------|
| 10 | To determine velocity of sound by resonance tube | i) Going through safety measures required ii) Adjusting the resonating length by discriminating resonating sound from sound produced by the tuning fork. iii) Measuring internal diameter of resonating tube using vernier caliper iii) Drawing inference & confirming Law nL = constant iv) Tabulating observations and calculations v) Interpreting results | CCG102-3 |
| 11 | To determine the acceleration due to gravity by 'g' by simple pendulum | i) Going through safety measures required ii) Measuring length of pendulum iii) Finding least count of stopwatch iii)Measuring periodic time with the help of stopwatch iv) Tabulating observations and calculations v) Interpreting results | CCG102-3 |
| 12* | To measure unknown resistance by Wheatstone's meter bridge. | i) Going through safety measures required ii) Drawing the circuit diagram for the experiment iii) Connecting the resistances as per circuit diagram. iii) Finding the correct position of null point & measuring correct balancing lengths on Meter bridge. iv)Tabulating observations and calculations v) Interpreting results | CCG102-4 |
| 13 | To verify series law of resistances by Wheatstone's meter bridge. | i) Going through safety measures required ii) Drawing the circuit diagram for series connections of the resistances. iii) Connecting the resistances for series method as per circuit diagram. iii) Finding the correct position of null point & measuring correct balancing lengths on Meter bridge. iv)Tabulating observations and calculations v) Interpreting results | CCG102-4 |
| 14 | To parallel law of resistances by Wheatstone's meter bridge. | i) Going through safety measures required ii) Drawing the circuit diagram for parallel connections of the resistances. iii) Connecting the resistances for parallel method as per circuit diagram. iii) Finding the correct position of null point & measuring correct balancing lengths on Meter bridge. iv)Tabulating observations and calculations v) Interpreting results | CCG102-4 |

| 15 | To be added by the subject teacher as per requirement |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR PRACTICAL WORK AND PRACTICAL EXAMINATION

c) Assessment Criteria for Practical work:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per given criteria.

| Domain | Domain Particulars | | |
|----------------|------------------------------|----|--|
| | Understanding | 05 | |
| Cognitive | Observations, calculations & | 05 | |
| | Result table | | |
| | Operating Skills | 05 | |
| Psychomotor | Neat & complete circuit | 05 | |
| r sycholliotol | Diagram / schematic | | |
| | Diagram. | | |
| Affective | Discipline and punctuality | 5 | |
| Affective | Decency and presentation | | |
| | TOTAL | | |

ii) Progressive Skill Test:

One mid-term Progressive Skill Test of 25 marks shall be conducted as per criteria given below

Criteria for Continuous Assessment of Practical work and Progressive skill Test:

| Sr. No. | Criteria | Marks allotted |
|------------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram. | 05 |
| 2 | Observations & Result Table | 05 |
| 3 | Sample Calculations with relevant Formulae. | 05 |
| 4 | Proper Graphs & Procedure / workmanship Safety measures | 05 |
| 5 | Oral Based on Practical Work | 05 |
| | Total | 25 |

d) Criteria for assessment at semester end practical exam:

Every student has to perform one practical within 2 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. no | Criteria | Marks allotted |
|--------|----------------------------|----------------|
| 1 | Preparedness for practical | 10 |

| 2 | Correct figures / diagrams | 10 |
|---|--------------------------------------|----|
| 3 | Observation tables | 10 |
| 4 | Result table / calculations / graphs | 10 |
| 5 | Safety / use of proper tools | 10 |
| | Total | 50 |

RATIONALE:

Knowledge of Electronic components & devices is quite essential for a student of electronic engineering diploma programme while maintaining electronics equipments. Although industrial electronics and electronics and telecommunication is specialized field of electronics engineering, a study of operating principles and concepts are essential which will help in troubleshooting electronics equipment. This course is designed in such a way that, the students will able to apply knowledge to solve broad electronics engineering application.

COMPETENCY:

Maintain electronic circuits comprising of discrete electronics components

Cognitive: Identify and illustrate the operation of basic electronics devices.

Psychomotor: Maintain and operate simple basic electronics circuit.

Affective: Attitude of i) Identify ii) Draw iii) Operate v)Test

COURSE OUTCOMES:

EIG103-1: Identify and handle semiconductor diodes.

Curriculum MPECS 2020 Diploma in Industrial Electronics

EIG103-2: Examine and operate rectifier and filter.

EIG103-3: Identify and use various types bipolar junction transistor and its configuration

EIG103-4: Examine and use various of types of biasing circuits and amplifiers

EIG103-5: Identify and use types of FET

EIG103-6: Illustrate the use of different regulated power supplies

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

A. Suggested Practical's/ Exercise

Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any 10 experiments). Experiments numbered from 13 onwards can be performed or demonstrated by using simulation software.

| Sr No. | Title of Practical Exercise | Skills / Competencies to be Developed | Course Outcome |
|-----------|--|---|-------------------|
| 1 | Test the performance of PN junction diode | Build the circuit as per circuit diagram Record the measured readings in observation table Draw the forward & reverse characteristics | EIG 103-1 |
| 2 | Test the performance of zener diode | Build the circuit as per circuit diagram Record the measured readings in observation table Draw the forward & reverse characteristics | EIG 103-1 |
| 3 | Test Zener voltage regulator for given voltage | Build the circuit as per circuit diagram Record the readings in observation | EIG 103-6 |

| | | table | |
|---|---|---|-----------|
| 4 | Test the half wave circuits on breadboard | 1) Construct the circuit as per circuit diagram 2) Record the waveform displayed on the oscilloscope according to the setting of VOLT/DIV 3) Record readings measured in observation table | EIG 103-2 |
| 5 | Test the full wave center- tapped circuit on breadboard | 1) Construct the circuit as per circuit diagram 2) Record the waveform displayed on the oscilloscope according to the setting of VOLT/DIV 3) Record readings measured in observation table | EIG 103-2 |
| 6 | Test the full wave bridge circuit on breadboard | Construct the circuit as per circuit diagram Record the waveform displayed on the oscilloscope according to the setting of VOLT/DIV Record readings measured in observation table | EIG 103-2 |
| 7 | Test C filter circuit for getting minimum ripples with any type one of rectifier | 1) Construct the circuit as per circuit diagram 2) Record the waveform displayed on the oscilloscope according to the setting of VOLT/DIV 3) Record readings measured in observation table and calculate ripple factor. | EIG 103-2 |
| 8 | Test LC filter circuit for getting minimum ripples with any type one of rectifier | 1) Construct the circuit as per circuit diagram 2) Record the waveform displayed on the oscilloscope according to the setting of VOLT/DIV 3) Record readings measured in observation table and calculate ripple factor | EIG 103-2 |
| 9 | Test the full wave bridge circuit on breadboard with π -filter | 1) Construct the circuit as per circuit diagram 2) Record the waveform displayed on the oscilloscope according to the setting of VOLT/DIV 3) Record readings measured in observation table and calculate ripple factor | EIG 103-2 |

| 10 | Test the Input and Output | 1) Construct the circuit as per circuit | EIG 103-3 |
|-----|------------------------------|---|-----------|
| | characteristics of BJT in | diagram | |
| | common base configuration. | 2) Record the reading in observation table. | |
| | C | 3) Sketch the graph of input & output | |
| | | characteristics | |
| 11 | Test the Input and Output | 1) Construct the circuit as per circuit | EIG 103-3 |
| | characteristics of BJT in | diagram | |
| | common emitter | 2) Record the reading in observation table. | |
| | configuration. | 3) Sketch the graph of input & output | |
| | | characteristics | |
| 12 | Find the specification of | 1) Identify various specifications given in | EIG 103-3 |
| | given transistor using | datasheet | |
| | datasheet. | 2) Note the values in observation table | |
| 13 | Test the assembled voltage | 1) Construct the circuit as per circuit | EIG 103-4 |
| | divider circuit for given | diagram | |
| | input | 2) Record the reading in observation table. | |
| 1.4 | Test the working of the DIT | 1) Construct the circuit of par circuit | EIG 103-4 |
| 14 | Test the working of the BJT | 1) Construct the circuit as per circuit | EIG 103-4 |
| | as an amplifier in CE mode | diagram | |
| | | 2) Record the reading in observation table.3) Sketch the graph of input & output | |
| | | waveforms. | |
| 15 | Test the performance of FET | Build the circuit as per circuit diagram | EIG103-5 |
| 13 | drain characteristics | 2) Record the reading in observation table. | LIG103-3 |
| | dram characteristics | 3) Sketch the graph drain characteristics | |
| 16 | Test the performance of FET | Build the circuit as per circuit diagram | EIG103-5 |
| 10 | transfer characteristics | 2) Record the reading in observation table. | LIG103 3 |
| | transfer enaracteristics | 3) Sketch the graph transfer characteristics | |
| 17 | Test the performance of | 1) Build the circuit as per circuit diagram | EIG103-6 |
| | Regulator IC's: IC's 78XX, | 2) Record the reading in observation table | |
| | 79XX. | , | |
| 18 | Build/Test the performance | 1) Build the circuit as per circuit diagram | EIG103-6 |
| | of assembled circuit for low | 2) Record the reading in observation table | |
| | or high voltage regulator | , G | |
| | using IC723. | | |
| 19 | Test various blocks of DC | 1) Build circuit as per circuit diagram or | EIG103-6 |
| | regulated power supply. | Identify the blocks in assembled DC power | |
| | - 1 11 1 | supply | |
| | | 2) Test the output at various points. | |

B. THEORY:

SECTION-I

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluation (Marks) |
|------------|--|---------------------|---------------------------------|
| | EIG103-1 Identify and handle semiconductor diodes. | | |

| 1 | Semiconductor Diode | 10 | 14 | |
|----|--|----|----|--|
| 1 | 1.0 Conductor, Insulator, semiconductor | 10 | 17 | |

Specification table for setting question paper for semester end theory examination:

| Topic | Name of topic | Distribution | n of marks (Cogni wise) | Course outcome | Total Marks | |
|-------|--------------------------------------|-----------------------|----------------------------|----------------|----------------|----|
| No. | rame of topic | Remember Understand A | | Application | | |
| 1 | Semiconductor Diode | 02 | 04 | 08 | EIG103-1 | 14 |
| 2 | Rectifiers and Filters | 02 | 04 | 06 | EIG103-2 | 12 |
| 3 | Bipolar Junction Transistor | 02 | 06 | 06 | EIG103-3 | 14 |
| 4 | Biasing of transistor and amplifiers | 02 | 06 | 06 | EIG103-4 | 14 |
| 5 | Field Effect Transistor (FET) | 02 | 06 | 06 | EIG103-5 | 14 |
| 6 | Regulated Power Supply | 02 | 04 | 06 | EIG103-6 | 12 |
| | Total >> | 12 | 28 | 38 | | 80 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

e) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain | Particulars | Marks out of 25 |
|-------------------------------------|----------------------------|-----------------|
| Cognitive Preparation for practical | | 05 |
| Develometer | Operating skills | 05 |
| Psychomotor | Observation/Result | 05 |
| | Discipline and punctuality | 05 |
| Affective | Procedure/Safety | 05 |
| | Measures/Presentation | |
| | TOTAL | 25 |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment Pro-forma I*.

| Sr. No. | Criteria | Marks allotted |
|------------|--|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram. | 05 |
| 2 | Observations & Result Table | 05 |
| 3 | Sample Calculations with relevant Formulae. | 05 |
| 4 | Proper Graphs & Procedure / workmanship Safety measures | 05 |
| 5 | Oral Based on Term Work | 05 |
| | Total | 25 |

f) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. no | Criteria | Marks allotted |
|-----------|--|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram | 10 |
| 2 | Procedure followed to achieve the result | 10 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 10 |
| 4 | Proper Graphs, workmanship and Safety measures | 10 |
| 5 | Oral Based on Test | 10 |
| | Total | 50 |

^{*}Assessment at semester end practical exam as per Pro-forma I.

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

Lectures cum Discussions
 Regular Home Assignments.
 Laboratory work
 (Online/Offline)

Teaching and Learning Resources:

1. Chalk board 2. Video clips 3.PPT 4. Item Bank 5. Charts

REFERENCE MATERIAL:

a) Books / Journals / IS Codes

| Sr. No. | Author | Title | Publisher |
|------------|--|------------------------------------|--------------------|
| 1. | V. K. Mehta | Principles of Electronics | S.Chand |
| 2. | B. L. Theraja | Basic Electronics | S.Chand |
| 3. | R.S.Sedha | A text book of Applied Electronics | S.Chand |

COURSE ID:

Course Name : ENGINEERING CHEMISTRY (EE/IE/IT/ET)

Course Code : CCG104 Course Abbreviation : GCHB

TEACHING AND EVALUATION SCHEME:

Pre-requisite Course(s)

Teaching Scheme:

: <nil>

| Scheme component | Hours / week | Credits | | |
|------------------|--------------|---------|--|--|
| Theory | 03 | 05 | | |
| Practical | 02 | 05 | | |

Evaluation Scheme:

| Component | Progressive | Assessment | Semest | Total | |
|-----------|-------------------------|--------------------------------|---------------------|-------------------------|-----|
| Component | Theory | Practical | Theory | Practical* | |
| Duration | Two tests (1 hour each) | One Skill Test (2 hours) | One paper (3 hours) | One practical (2 hours) | |
| Marks | 20 each | 25 | 80 | 50 I | 150 |

^{*} Assessment as per pro-forma II. .

RATIONALE:

This course provides knowledge of chemical properties of materials and selection of appropriate material for specific applications in the field of engineering. Study of different polymers, insulators or dielectrics, adhesives and their applications in electrical appliances, electronic industries etc., study of corrosion and methods of prevention will make students realize importance of care and maintenance of machines and equipments. The contents of this subject are designed to enhance student's reasoning capacity and capabilities in solving challenging problems in engineering field.

COMPETENCY:

Apply principles of advanced chemistry to solve engineering problems.

Cognitive: Understanding concepts of chemistry for applications in the area of engineering.

Psychomotor:

- i) Sketching and labeling the diagrams for extraction of copper
- ii) Experimentally analyzing the water samples for preparing portable water by different methods.
- iii) Preparing chart of showing percentage, composition, properties and industrial applications of solders.
- iv) Handling & use of glassware & chemicals.

Affective: i) Accuracy ii) Safety iii) Punctuality iv. Attitude.

COURSE OUTCOMES

- 1. **CCG104-1** Understand the application of basic concepts in chemistry.
- 2. **CCG104-2** Apply the knowledge of electrochemistry in industry for electroplating and electro-refining.

I – Internal Examination

- 3. **CCG104-3** Interpret the reasons of corrosion & remedies by using appropriate techniques.
- 4. **CCG104-4** Select the relevant catalyst for given application.
- 5. **CCG104-5** Select insulators, adhesive, composite materials, Plastic & rubber for different applications in the field of engineering
- 6. **CCG104-6** Use relevant water treatment process to solve industry problems.
- 7. **CCG104-7** Select proper type of cell based on the requirement in electrical/ electronic and computer engineering.
- 8. **CCG104-8** Understand the method of extraction of copper.
- 9. **CCG104-9** Select proper type of alloyes, solders for various purposes.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX

CONTENT:

A. LABORATORY WORK

Lab work shall consist of the following:

Laboratory experiments and related skills to be developed:

| Sr. No. | Title of Experiment | Skills/Competencies to be developed | Course Outcome |
|------------|---|---|-------------------|
| 1 | Introduction to Chemistry laboratory | Awareness of chemicals, glasswares & instruments used in chemistry laboratory | CCG103-1 |
| 2 | Volumetric analysis of solution. | Molecular weight, equivalent weight, acidity, basicity normality of solution. Awareness of different types of titrations, use of indicators | CCG103-1 |
| 3 | Preparation of 1 N, 0.5 N & 0.1 N Solutions of different chemicals like NaOH, HCI, Oxalic acid, FeSO ₄ , etc. | Skill of weighing, handling Glassware & measuring solutions | CCG103-1 |
| 4 | Titration of strong acid and strong bases (HCl X NaOH) | Skills of determining accurate end point of titration & development of measurement skills. | CCG103-1 |
| 5 | Titration of strong acid,strong base& weak acid (HCI X NaOH X H ₂ C ₂ O ₄ .H ₂ O | Skills of determining accurate end point of titration & development of measurement skills. | CCG103-1 |
| 6 | Titration of weak base, strong acid & strong base (Na ₂ CO ₃ X H ₂ SO ₄ X KOH | Skills of determining accurate end point of titration & development of measurement skills. | CCG103-1 |
| 7 | Estimation of chloride content in water by Mohr's method | Measurement skill utilization of practical data for testing & estimation | CCG103-5 |
| 8 | Determination of amount of Ca and Mg ions present in given sample of water by E.D.T.A method | Measurement skill utilization of practical data for testing & estimation | CCG103-5 |
| 9 | Estimation of viscosity of oils by Ostwald's method | Measurement skill utilization of practical data for testing & estimation | CCG103-1 |
| 10 | Estimation of Ca in limestone. | Measurement skill utilization of practical data for testing & estimation | CCG103-5 |
| 11 | Tritration of KMnO ₄ & FeSO ₄ (Redox titration) | Skills of determining accurate end point of titration & development of measurement skills. | CCG103-6 |
| 12 | Estimation of % of Fe in given sample of steel | Measurement skill utilization of practical data for testing & estimation | CCG103-6 |
| 13 | Determination of alkalinity of water | Measurement skill utilization of practical data for testing & estimation | CCG103-6 |

B) THEORY:

Section I

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluatio n (Marks) |
|--|---|---------------------|----------------------------|
| CCG10 | 3-1 Understand the application of basic concepts in chemistry. | | |
| ATOMIC STRUCTURE AND CHEMICAL BONDING 1.1 Atom :Fundamental particles, Nature of atom 1.2 Atomic Number, Mass Number, Isotopes and isobars 1.3 Bohr's theory of atom 1.4 Statement of Hund's rule of maximum multiplicity,Pauli's exclusion principle Aufbau's principle 1.5 Lewis and Langmuir's concept of stable electronic configuration 1.6 Electovalency and Co-valency 1.7 Formation Of electrovalent compounds- NaCl, CaCl ₂ . 1.8 Formation of Covalent compounds-H ₂ O, CO ₂ | | | |
| refining | 3-2 Apply the knowledge of electrochemistry in industry for e. | nectropiating | and electro- |
| 2 | ELECTROCHEMISTRY 2.1 Definitions- Conductor, Electrolyte, Electrode, Ionisation, Eletrolysis. 2.2 Arrhenius Theory Of Ionisation | 05 | 08 |
| | 2.3 Degree of Ionisation & Factors affecting degree of ionisation. | | |
| | 2.4 Electrolysis of molten NaCl. | | |
| | 2.5 Electrolysis of CuSO4 solution by using Cuelectrodes 2.6 Industrial applications of electrolysis 2.6.1 Electroplating 2.6.2 Electro refining of Cu | | |
| CCG10 | 3-3 Interpret the reasons of corrosion & remedies by using appro | priate technic | lues. |

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluatio n (Marks) |
|------------|--|---------------------|----------------------------|
| 3. | CORROSION AND PROTECTIVE COATING | 04 | 06 |
| | 3.1 Definition & types of corrosion 3.2 Dry or Atmospheric corrosion, Oxide Film Formation & its types, Factors affecting atmospheric corrosion 3.3 Wet or electrochemical corrosion 3.4 Factors influencing immersed corrosion 3.5 Methods of protection of metal from corrosion - Hot dipping (Galvanizing & Tinning), Metal spraying, Metal cladding, Cementation or sherardizing | | |
| CCG10 | 3-4 Select the relevant catalyst for given application. | | |
| 4 | CATALYSIS 4.1 Defination. 4.2 Typesof Catalysts with example Homogenous catalyst. | 02 | 04 |
| | - Heterogenous catalyst4.3 Promotors.4.4 Negative catalysis.4.5 Autocatalysis. | | |
| | 13-5 Select insulators, adhesive, composite materials, Plastic ions in the field of engineering | & rubber | for different |
| 5 | CHEMISTRY OF NONMETALLIC ENGINEERING MATERIALS | 08 | 14 |
| | 5.1 INSULATORS | | |
| | 5.1.1 Definition & Characteristics of insulator | | |
| | 5.1.2 Preparation, properties & uses of glass wool, Thermocole. 5.2 COMPOSITE MATERIALS 5.2.1 Definition, | | |
| | 5.2.2 Classification, Properties & Application of composite materials5.3 PLASTICS | | |
| | 5.3.1 Definition of Polymer, Polymerization. 5.3.2 Types of polymerization – Addition & Condensation polymerization. 5.3.3 Classification of plastic - Thermosoftening & thermosetting plastic. 5.3.4 Engineering properties & applications of plastic. | | |
| | 5.4 RUBBER 5.4.1 Elastomer | | |

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluatio n (Marks) |
|------------|--|---------------------|----------------------------|
| | 5.4.2 Drawbacks of Natural rubber. | | |
| | 5.4.3 Vulcanization of rubber. | | |
| | 5.4.4 Engineering properties & uses of rubber. | | |
| | 5.5 ADHESIVES | | |
| | 5.5.1 Definition of adhesives. | | |
| | 5.5.2 Charecteristics of good adhesive. | | |
| | 5.5.3 Properties of adhesive. | | |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

Section II

| CCG103-6 Use re | elevant water treatment process to solve industry probl | ems. | |
|--|---|------|----|
| | | | |
| 6 WATER | <u>.</u> | 08 | 12 |
| 6.2 Hard 6.3 Hard 6.4 Reac 6.5 Disac purp Indu 6.6 Steril bleac reac | exchange method to remove total hardness of | | |

CCG104-7 Select proper type of cell based on the requirement in electrical/ electronic and computer engineering.

| CCG10 | CELL AND BATTERIES 7.1 Definition of Electrochemical cell, Battery, Charge, Discharge, Closed Circuit Voltage, Electrochemical couple, Internal resistance, Open Circuit Voltage, Separator, E.M.F. 7.2 Classification of Batteries such as – Primary & Secondary Batteries 7.3 Construction, Working and Applications of a Primary Cell such as Dry Cell , Secondary Cell such as Lead Acid Storage Cell 7.4 Charging and Discharging of Lead Acid Storage Cell 7.5 Hydrogen-Oxygen fuel cell, its chemical reactions &advantages 7.6 Introduction of solar cell 4-8 Understand the method of extraction of copper. | 05 | 10 |
|---------|---|----|----|
| 8 CCG10 | METALLIC CONDUCTORS 8. 1 Occurrence of metals 8.2 Distinction between mineral & ore 8.3 Definition of flux, Gangue & Slag 8.4 Steps involved in metallurgy-Flow chart Concentration of ores— Physical Methods 1. Gravity Separation Method 2. Electromagnetic separation 3. Froth floatation method Chemical Methods 1. Calcination 2. Roasting 8.6 Important ores of copper Metallurgy of copper-Extraction of copper from copper pyrites by concentration, roasting, smelting, Bessemerisation, Electrorefining 8.7 Physical properties & uses of Copper. | 08 | 14 |
| 9 | SOLDERS 9.1 Definition of alloy, classification of alloys & purposes of making alloy 9.2 Composition, properties & applications of 9.2.1 Soft solder. 9.2.2 Tinmann's solder, 9.2.3 Brazing alloy, 9.2.4 Plumber's solder 9.2.5 Rose metal 9.2.6Woods metal . | 03 | 04 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR LAB WORK AND PRACTICAL EXAMINATION

a) Assessment Criteria for Lab work:

Specification table for setting question paper for semester end theory examination :

| Section / | | Distribution | n of marks (Cognitiv | e level-wise) | Course | Tota |
|-----------|--|--------------|----------------------|---------------|----------|-----------|
| Topic no. | Name of topic | Remember | Understand | Application | Outcome | 1 mark |
| I/1 | Atomic structure | 06 | 02 | _ | CCG104-1 | 08 |
| I/2 | Electrochemistry | 02 | 02 | 04 | CCG104-2 | 08 |
| I/3 | Corrosion &protective coating | 02 | 02 | 02 | CCG104-3 | 06 |
| I/4 | Catalysis | 02 | 02 | - | CCG104-4 | 04 |
| I/5 | Chemistry of nonmetallic engg. materials | 04 | 06 | 04 | CCG104-5 | 14 |
| II//6 | Water | 04 | 04 | 04 | CCG104-6 | 12 |
| II/7 | Cell & Batteries | 04 | 04 | 02 | CCG104-7 | 10 |
| II/8 | Metallic conductors | 06 | 06 | 02 | CCG104-8 | 14 |
| II/9 | Solders | 02 | 02 | - | CCG104-9 | 04 |
| | Total | | | | | 80 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

Criteria for Continuous Assessment of Practical work

b) Assessment Criteria for Term work:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per given criteria.

| Domain | Particulars | Marks out of 50 |
|--------------|----------------------------|-----------------|
| Cognitive | Understanding | 05 |
| Cognitive | Application | 05 |
| Psychomotor | Operating Skills | 10 |
| 1 sychomotor | Writing skills | 10 |
| Affective | Discipline and punctuality | 10 |
| Affective | Timeliness and accuracy | 10 |
| | 50 | |

ii) Progressive Skill Test:

One mid-term Progressive Skill Test of 25 marks shall be conducted as per criteria given below

Criteria for Continuous Assessment of Practical work and Progressive skill Test:

| Domain | Particulars | Marks out of 50 |
|--------------|---|-----------------|
| Cognitive | Understanding | 05 |
| Cognitive | Application | 05 |
| Psychomotor | Operating Skills | 05 |
| 1 sychomotor | Writing skills | 05 |
| Affective | Discipline and punctuality Timeliness and accuracy | 05 |
| | 25 | |

Final marks of term work shall be awarded as per Assessment Pro-forma II.

c) Criteria for assessment at semester end practical exam:

Every student has to perform one practical within 2 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. no | Criteria | Marks allotted |
|--------|--------------------------------------|----------------|
| 1 | Preparedness for practical | 10 |
| 2 | Correct figures / diagrams | 10 |
| 3 | Observation tables | 10 |
| 4 | Result table / calculations / graphs | 10 |
| 5 | Safety / use of proper tools | 10 |
| | Total | 50 |

Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks as per following criteria.

| Domain | Particulars | Marks out of 50 |
|--------------|---|-----------------|
| Cognitive | Understanding | 05 |
| Cognitive | Application | 05 |
| Psychomotor | Operating Skills | 05 |
| 1 sychomotor | Writing skills | 05 |
| Affective | Discipline and punctuality Timeliness and accuracy | 05 |
| | 25 | |

Final marks of term work shall be awarded as per Assessment Pro-forma II.

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

- 1. Lectures cum Demonstrations
- 2. Classroom practices
- 3. Home Assignments
- 4. Discussion.

Teaching and Learning resources:

- 1. Chalk board
- 2. LCD presentations
- 3. Audio presentations
- 4. Item Bank
- 5. Charts.

RATIONALE:

Mathematics is an important prerequisite for the development and understanding of engineering and technological concepts. For an engineer and technologist, knowledge of mathematics is an effective tool to pursue and master the applications in the engineering and technological fields. Algebra provides the language and abstract symbols of mathematics. The topics Matrices and Determinants are helpful for finding optimum solution of system of simultaneous equations which are formed in the various branches of engineering using different parameters . Trigonometry is the study of triangles and angles. Contents of this subject will form foundation for further study in mathematics.

Competency:

Apply principles of Basic Mathematics to solve mathematical problems as follows -

1.Cognitive : To understand the mathematical concepts

2. Psychomotor: Proper handling of scientific calculator

3. Affective : Attitude of accuracy, punctuality, proper reasoning and presentation

Course Outcomes(CO's):

CCG105-1: To solve given problems based on laws of logarithm.

CCG105-2: To solve simultaneous equations using Cramer's rule & find area of triangle.

CCG105-3: To resolve a given function into partial fractions.

CCG105-4: To learn algebra of matrices & hence find Adjoint & Inverse of a given matrix.

CCF105-5: To memorize and solve problems using trigonometric formulae.

CONTENT:

A) TUTORIALS: Note - Tutorials are to be used to get enough practice

| Sr.No | Topics | Tutorial Content (10 problems in each tutorial) | |
|-------|---|---|--|
| 1 | Logarithm | Solve simple problems of Logarithms based on definition and laws | |
| 2 | Determinants | Solve problems on determinant to find area of triangle, and solution of simultaneous equations by Cramer's rule | |
| 3 | Partial Fractions | To resolve given function into partial fraction using appropriate method. | |
| 4 | Matrices | Examples on addition ,Subtraction and Multiplication of Matrix | |
| 5 | Matrices | To find Adjoint ,Inverse of a given matrix. | |
| 6 | Trigonometric Ratios and Identities | Examples on conversion of degree to radian and vice versa, simple examples on trigonometry. | |

| 7 | Allied Angles | Solve examples on Allied angles |
|----|---|---|
| 8 | Compound Angles | Solve examples on Compound angles |
| 9 | Factorization & De-factorization angles | Solve examples on Factorization & De-factorization formulae |
| 10 | Inverse Trigonometric Ratios | Solve examples on principle value and Inverse trigonometric functions |

B) THEORY:

Curriculum MPECS 2020 Diploma in Industrial Electronics

Course ID:

Course Name : Basic Electrical Engineering (IE/ET)

Course Code : EIG107
Course Abbreviation : GBEE
Pre-requisites : Nil

Teaching Scheme:

| Scheme component | Hours / week | Credits |
|------------------|--------------|---------|
| Theory | 03 | 05 |
| Practical | 02 | 05 |

Evaluation Scheme:

| | Progressiv | e Assessment | Term En | d Examination | |
|--------------------------|--|--|---------------------------------------|--|-------|
| Mode of Evaluation | Theory | Practical | Theory Examination | Practical Examination (Internal) | Total |
| Details of Evaluation | Average of two tests of 20 marks each | i) 25 marks for continuous assessment ii)One PST of 25 marks | Term End Theory Exam (03 hours) | As per Proforma- II | |
| Marks | 20 | - | 80 | 50I | 150 |

Rationale:

The subject deals in understanding the basics of laws, working principle, construction, operation and applications of the various equipment, instruments and machines in electrical engineering.

COMPETENCY:

Apply the basic principles of electrical engineering to solve engineering problems.

Cognitive:

- i) Understanding and applying principles and laws of electrical engineering to simple practical problems / situations.
- ii) Observing
- iii) Classifying
- iv) Interpreting

Psychomotor:

Handling of instruments, apparatus and tools of electrical engineering.

Affective:

- i) Attitude
- ii) Safety
- iii) curiosity, interest and self-confidence
- iv) working in team

Course Outcomes:

- EIG107-1. Apply basic laws and principles of electrical engineering to electrical applications.
- EIG107-2. Use principles of magnetic circuits to calculate various parameters in magnetic circuits.
- EIG107-3. Understand basic principles of electromagnetic induction.
- EIG107-4. Apply basic principles of AC circuits in electrical devices.

EIG107-5. Understand circuit parameters in AC circuits.

EIG107-6. Apply basic laws of electromagnetic induction principles in electric machines.

Competency, course outcomes and programme outcomes/programme specific outcomes (cp-co-po/pso) matrix.

CONTENT:

A. Practical exercises

The following practical exercises shall be conducted in the *Laboratory for developed* by the Institute in practical sessions of batches of about 20- 22 students:

| Sr. no | Title of Practical | Skills/Competencies to be developed | Course outcome |
|--------|--------------------------------------|--|----------------|
| 1 | by measuring voltage and current and | Build the circuit as per circuit diagram. Record currents and voltages. Calculate resistance and verify Ohm's law. | EIG107-1 |
| 2 | | Build the circuit as per circuit diagram. Record currents and voltages. Verify Kirchhoff's voltage law. | EIG107-1 |

| Sr. no | Title of Practical | Skills/Competencies to be developed | Course outcome |
|--------|---|---|----------------|
| 3 | Measure the currents across resistances in the circuit and verify the readings using Kirchhoff's Current Law. | Build the circuit as per circuit diagram. Record currents and voltages. Verify Kirchhoff's current law. | EIG107-1 |
| / | Determine the permeability of magnetic material by plotting its B-H curve. | Record currents and voltages. Draw graph of voltage Vs current. | EIG107-2 |
| 5 | Observe and identify the direction of induced emf in the coil for the relative motion between magnet and coil. (Verify Faraday's law of electromagnetic induction and Lenz's law) | 2. Perform the relative motion between coil and magnet. | EIG107-3 |
| 0 | Connect resistances in series and parallel connection and measure its resistances by using Ohm's law. Verify if by multi-meter. | | EIG107-4 |
| 7 | Use rheostat as a current regulator. | Build the circuit as per circuit diagram. Record currents and voltages. Calculate resistance required for current regulation. | EIG107-4 |
| 8 | Use rheostat as a potential divider. | Build the circuit as per circuit diagram. Record currents and voltages. Calculate resistance required for voltage regulation. | EIG107-4 |
| 9 | Calculate R, L and power factor of series RL circuit by measuring voltages and currents in circuit. | 1. Build the circuit as per circuit diagram. | EIG107-5 |
| | Calculate R, C and power factor of series RC circuit by measuring voltages and currents in circuit. | D Record currents voltages and nower | EIG107-5 |
| 11 | Calculate R, L, C and power factor of series RLC circuit by measuring voltages and currents in circuit. | Build the circuit as per circuit diagram. Record currents, voltages and power. Calculate resistance, reactance, pf, KVA and KVAR. | EIG107-5 |
| 12 | To study construction of single phase low voltage transformers. | Draw the diagram of construction of transformer. Identify the different parts of transformer. Identify the type of transformer. | EIG107-6 |

B. Theory

Section I

| | Section I | ı | |
|------------|--|-------------------------|-------------------------------|
| Sr. no. | Topics Subtopics | Teachi ng (Hours) | Theory evaluation Marks |
| EIG1 | 07-1: Apply basic laws and principles of electrical engineering to electr | ical application | ations. |
| 1 | BASIC LAWS AND PRINCIPLES OF ELECTRICAL ENGINEERING 1. Definition of electric current and potential difference. Concept of voltage drop and terminal voltage. 2. Concept of resistance and conductance Laws of resistance (Simple Numerical) Concept of resistivity and conductivity 3. Classification of electric current: Direct current (DC) & alternating current (AC) 4. Concept of power and energy with simple numerical. (in DC circuit) 5. Series and parallel connection of resistances. (Simple numerical) 6. Theorems for DC circuits: | 10 | 12 |
| EIG1 | Ohm's Law (Simple Numerical) Kirchhoff's Laws (Simple Numerical with maximum two equations) 07-2: Use principles of magnetic circuits to calculate various parameter its. | s in magne | tic |
| 2 | MAGNETIC CIRCUITS Magnetic Circuit - Ohm's law of magnetic circuit. Definitions concerning magnetic circuit: Magneto-Motive-Force (MMF), Ampere Turns (AT), Reluctance, Permeance, Reluctivity. Comparison between electric and magnetic circuit. Calculations of ampere-turns for simple series magnetic circuit (Simple Numerical) Concept of leakage flux, leakage coefficient, useful flux & fringing. Concept of magnetization curve (B - H Curve) Magnetization curve for magnetic and non-magnetic materials. Concepts of magnetic hysteresis, hysteresis loop. Hysteresis loops for hard & soft magnetic materials. Significance of area of hysteresis loop, hysteresis loss. (No Derivation and No Numerical), Definition of eddy current loss and it formula. Concepts of permanent magnet and electromagnet. | 08 | 16 |
| EIG1 | O7-3: Understand basic principles of electromagnetic induction. ELECTROMAGNETIC INDUCTION 1. Faraday's laws of electromagnetic induction. (Simple Numerical) 2. Induced E.M.F: Statically induced E.M.F., dynamically induced E.M.F. (Simple Numerical) 3. Direction of induced E.M.F. and currents. Fleming's right hand rule, Lenz's law. 4. Basic concepts of self induction and mutual induction. (No | 06 | 12 |

| Sr. no. | Topics Subtopics | Teachi ng (Hours) | Theory evaluation Marks |
|------------|--|-------------------------|-------------------------------|
| | numerical) 5. Basic principle of elementary alternator. 6. Energy stored in magnetic field (No Derivation and No Numerical) 7. Lorentz force principle (Simple numerical). Fleming's left hand rule. | | |

RATIONALE:

Engineering Graphics is one of the ways of communication among engineering professionals. It describes scientific facts, concepts, principles and techniques of drawing in any engineering fields to express the ideas and conveying the instructions which are use for carrying out tasks at work place. This preliminary course aims at building a foundation for the further course in drawing and other allied subjects. This subject is useful in developing, drafting and sketching skills of students. So it is necessary to all programmes.

COMPETENCY:Read, draw & Interpret the engineering drawing of simple objects.

Cognitive: Understand various drawing procedures.

Psychomotor: Produce engineering drawing from the given problem.

Affective: Attitude of usingi) Procedures ii) Practices iii) Drawing Instruments iv) Accuracy v) Drafting Skill

COURSE OUTCOMES:

CCG109-1Understand various fundamentals in engineering drawing.

CCG109-2Produce the projection of point, lines& planes inclined to one reference plane.

CCG109-3Produce orthographic drawing from given pictorial view.

CCG109-4 Produce sectional orthographic drawing from given pictorial view.

CCG109-5Visualize & draw accordingly the pictorial view by correlating the given views.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

^{*} Assessment as per Pro-forma – III

RATIONALE:

Workshop practices mainly deals with various trades such as Wood working, Fitting and Sheet metal. A technician has to work in such environment with his peers, superiors and subordinates for a major part of his life. Therefore the emphasis on the practical work is needed for the primary experience of working in the team.

COMPETENCY:

Prepare a simple job using wood working, fitting and sheet metal trade.

Cognitive: Understand different types of tools in wood working, sheet metal and fitting trade.

Psychomotor: Prepare a simple job using wood working, fitting and sheet metal trade.

Affective: Develop attitude of i) Interpret drawing ii) Safety

COURSE OUTCOMES:

CCG 114-1 Select different types of wood material.

CCG 114-2 Select different types of tools used in workshop.

CCG 114-3 Preparing simple components in workshop.

CCG 114-4 Interpret drawing.

CCG 114-5 Practicing safety in workshop.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

CONTENTS:

A) PRACTICALS

| Sr. No. | Topics/ Sub-Topics | Practical (Hours)/ Evaluation (Marks) | Skills/ Competencies to be developed | Course outcome |
|------------|----------------------|--|--------------------------------------|----------------|
| 1 | Wood Working shop :- | 10/18 | | |

| | a)Any one composite job from the following involving different operations, joints, turning & planning, surface finishing by emery paper, varnishing etc. i)Switch board. ii)Computer table. iii)Printer Table | | a)Study of carpentry tools, Identifying materials b)Measuring dimensions c)Interpretation of drawing d) Operating on planning, cutting, drilling machines e) Time management and observing safety habits f)Prepare furniture or article with carpentry joints | CCG1 to CCG 5 |
|---|---|-------|---|-------------------|
| 2 | FITTING a) Demonstrations of different fitting tools & drilling machine and power tools b)Demonstrations of different operations like marking, filing, cutting, drilling and tapping c)One simple fitting job (male female assembly type) involving practice of filing drilling cutting tapping etc. | | a)Studying fitting tools, Identifying materials b)Measuring dimensions c)Interpretation of drawing d)Operating drill, saw machines e) Time management and observing safety habits | CCG 2 to CCG 5 |
| 3 | Sheet Metal shop: a) Demonstrations of different sheet metal tools & Machines b) Demonstrations of different sheet metal operations like sheet cutting, bending, edging, end cutting, Lancing, soldering, riveting. c) To select proper sheet gauge and types of G.I. Sheet required for the job d) One simple job involving sheet metal operations, soldering and riveting e) One composite job from the following 1)Dustbin 2) Letter box 3) Grain container 4)Bucket 5) Tray 6) Trunk 7) Tin box Batch size should be selected depending volume of work | 10/16 | a) Studying sheet metal tools, Identifying materials b) Measuring dimensions c) Interpretation of drawing d) Operating sheet cutting bending machines e) Time management and observing safety habits f) Prepare utility article | CCG2 to CCG 5 |

The students will submit the following.

Workshop record book showing the details of the job viz. Drawing, Raw material size, time required completing the job.

The journal consisting of the neat sketches, specifications use of the hand tool, and hand operations based on the demonstration in all the trades during the practical work.

ASSESSMENT CRITERIA FOR PRACTICAL AND PRACTICAL EXAMINATION

a) Assessment Criteria for Practical work:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 50 marks as per following criteria:

| Domain | Particulars | Marks out of 50 |
|-------------|----------------------------|-----------------|
| Comitivo | Understanding | 05 |
| Cognitive | Application | 05 |
| Davahamatan | Operating Skills | 10 |
| Psychomotor | Drawing / drafting skills | 10 |
| A 66 active | Discipline and punctuality | 10 |
| Affective | Decency and presentation | 10 |
| | 50 | |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 50 marks shall be conducted. Final marks of Practical shall be awarded as per *Assessment Pro-forma III*.

Instructional Strategies:-

Demonstration during Practicals Workshop Record Book, maintenance record book. Workshop Journal.

Teaching and learning resources:-

Shop Demonstration Hands on training on machine

RATIONALE:

Nowadays, Yoga and Sports have become an integral part to lead healthy life. Considering the need of society and industry, this course has been designed with theoretical foundation and practical demonstration. The main objective of the course is to acquire natural tranquility and steadiness of the mind. For acquiring mastery and perfection in Yoga and Sports, consistent practice is necessary.

COMPETENCY: Apply principles of Yoga and Sports in daily life.

COGNITIVE: Understanding and applying principles of Yoga and Sports in various situations.

AFFECTIVE: Attitude of i) Perfection, ii) Confidence and iii) Presentation.

PSYCHOMOTOR: i) Use of correct Yoga posture. ii) Practice of correct breathing. iii) Practice team work.

COURSE OUTCOMES:

On successful completion of the course the students will be able to:

CCG117-1: Practice Physical activities and Yoga for strength, flexibility, and relaxation.

CCG117-2: Learn techniques for increasing concentration and decreasing anxiety which leads to stronger academic performance.

CCG117-3: Learn breathing exercises and healthy fitness activities

CCG117-4: Understand basic skills associated with yoga and physical activities including strength and flexibility, balance and coordination.

CCG117-5: Perform yoga movements in various combination and forms.

CCG117-6: Assess current personal fitness levels.

CCG117-7: Identify opportunities for participation in yoga and sports activities.

CCG117-8: Develop understanding of health-related fitness components: cardio respiratory endurance, flexibility and body composition etc.

CCG117-9: Improve personal fitness through participation in sports and yogic activities.

CCG117-10: Develop understanding of psychological problems associated with the age and lifestyle.

CCG117-11: Demonstrate an understanding of sound nutritional practices as related to health and physical performance.

CCG117-12: Assess yoga activities in terms of fitness value.

CCG117-13: Identify and apply injury prevention principles related to yoga and physical fitness activities.

CCG117-14: Understand and correctly apply biomechanical and physiological principles elated to exercise and training.

CONTENT:

| Sr. No. | Topics / Sub-topics | | | | | |
|------------|---|--|--|--|--|--|
| 1 | Introduction to Physical Education | | | | | |
| | o Meaning & definition of Physical Education | | | | | |
| | o Aims & Objectives of Physical Education | | | | | |
| | o Changing trends in Physical Education | | | | | |
| 2 | Physical Fitness, Wellness & Lifestyle | | | | | |
| _ | o Meaning & Importance of Physical Fitness & Wellness | | | | | |
| | o Components of Physical fitness | | | | | |
| | o Components of Health related fitness | | | | | |
| | o Components of wellness | | | | | |

| | o Preventing Health Threats through Lifestyle Change o Concept of Positive Lifestyle |
|---|--|
| 3 | Introduction to Ashtang Yog o Meaning & Importance Yam, Niyam, Aasan, Pranayam, Pratyahar, Dharana, Dhyan & Samadhi |
| 4 | Postures o Meaning and Concept of Postures. o Causes of Bad Posture. o Advantages & disadvantages of weight training. o Concept & advantages of Correct Posture. o Common Postural Deformities – Knock Knee; Flat Foot; Round Shoulders; Lordosis, Kyphosis, Bow Legs and Scoliosis. o Corrective Measures for Postural Deformities |
| 5 | Yoga o Meaning & Importance of Yoga o Elements of Yoga o Introduction - Asanas, Pranayama, Meditation & Yogic Kriyas o Yoga for concentration & related Asanas (Sukhasana; Tadasana; Padmasana & Shashankasana) o Relaxation Techniques for improving concentration - Yog-nidra |
| 6 | Pranayam & its types |
| | o Meaning & Importance of Pranayam o Breathing Exercises: Slow & Fast, Kapalbhati 1.Nadishodhan (Anulom- Vilom) 2.Sheetali 3.Sitkari 4.Ujjayi 5.Bhramari 6.Bhastrika |
| 7 | Yoga & Lifestyle o Asanas as preventive measures. o Hypertension: Tadasana, Vajrasana, Pavan Muktasana, Ardha Chakrasana, Bhujangasana, Sharasana. o Obesity: Procedure, Benefits & contraindications for Vajrasana, Hastasana, Trikonasana, Ardh Matsyendrasana. o Back Pain: Tadasana, Ardh Matsyendrasana, Vakrasana, Shalabhasana, Bhujangasana. o Diabetes: Procedure, Benefits & contraindications for Bhujangasana, Paschimottasana, Pavan Muktasana, Ardh Matsyendrasana. o Asthema: Procedure, Benefits & contraindications for Sukhasana, Chakrasana, Gomukhasana, Parvatasana, Bhujangasana, Paschimottasana, Matsyasana. |
| 8 | Sun Salutation (Suryanamaskar) |

| | o Meaning and concept of Suryanamaskar |
|-----|--|
| | o Postures |
| | o Use of breathing techniques and Mantras |
| | o ose of breathing techniques and Manuas |
| 9. | Yogasan |
| | o Meaning and Importance of Yogasan |
| | o Types of Yogasan : Naukasan, Dhanurasan, Garudasan, Virasan, Sarvangasan, |
| | Matsyasan, Parighasan, Ushtrasan, Hansasan & Mayurasan |
| 10 | Prayer |
| | o Meaning and Importance of Prayer |
| | o Omkar Chanting |
| | o Meditation & Mudras |
| 11. | Psychology & Sports |
| | o Definition & Importance of Psychology in Physical Edu. & Sports |
| | o Define & Differentiate Between Growth & Development |
| | o Adolescent Problems & Their Management |
| | o Emotion: Concept, Type & Controlling of emotions |
| | o Meaning, Concept & Types of Aggressions in Sports. |
| | o Psychological benefits of exercise. |
| | o Anxiety & Fear and its effects on Sports Performance. |
| | o Motivation, its type & techniques. |
| | o Understanding Stress & Coping Strategies. |
| 12. | Sports / Games |
| | Following sub topics related to any one Game/Sport of choice of student out of: |
| | Athletics, Redwinter Reshethell Chass Cristset Veheddi Lever Tennis Swimming Tehle |
| | Badminton, Basketball, Chess, Cricket, Kabaddi, Lawn Tennis, Swimming, Table Tennis, Volleyball, |
| | Yoga etc. |
| | |
| | o History of the Game/Sport. o Latest General Rules of the Game/Sport. |
| | o Specifications of Play Fields and Related Sports Equipment. |
| | o Important Tournaments and Venues. |
| | o Sports Personalities. |
| | o Proper Sports Gear and its Importance. |
| | o i roper sports dear and its importance. |

COURSE ID:

Course Name : ENGINEERING MATHEMATICS (EE/IE/ET/IT)

Course Code : CCG118 Course Abbreviation : GEMB

TEACHING AND EVALUATION SCHEME:

Pre-requisite Course(s) : CCG105 Basic Mathematics

Teaching Scheme:

| Scheme component | Hours / week | Credits |
|------------------|--------------|---------|
| Theory | 03 | 04 |
| Practical | 01 | 04 |

Evaluation Scheme:

| | Progressive Assessment | | Term End | | Total |
|----------------------|---------------------------------------|------------------------------|---------------------------------|-----------|-------|
| Component | Theory | Assignments | Theory | Practical | Total |
| Details and Duration | Average of two tests of 20 marks each | As mentioned in the syllabus | Term End Theory Exam (03 hours) | | |
| Marks | 20 | | 80 | | 100 |

RATIONALE:

This subject is an extension of Basic mathematics of first semester and a bridge to further study of applied mathematics. The knowledge of mathematics is useful in other technical areas. Differential calculus has applications in different engineering branches. For example concepts such as bending moment, curvature, maxima and minima. Numerical methods are used in programming as an essential part of computer engineering. In Metrology and quality control statistical methods are used to determine the quality and suitability of components. Engineering mathematics lays the foundation to understand technical principles in various fields.

Competency:

Apply principles of Engineering Mathematics to solve Engineering problems as follows-

1.Cognitive : Understanding and applying principles of Engineering Mathematics to

Engineering problems

2. Psychomotor: a) Use of co-ordinate geometry in animation, autocad, computer graphics etc.

b) Proper handling of calculator.

3. Affective : Attitude of accuracy, punctuality, presentation, visualization.

Course Outcomes(CO's):

CCG118-1: To understand and solve examples of complex numbers.

CCG118-2: To solve problems on two dimensional co-ordinate geometry for straight line.

CCG118-3: To find approximate solution of algebraic equations and simultaneous equations by various methods.

CCG118-4: To find limits of different types of functions using various methods.

CCG118-5: To solve the problems of maxima, minima and geometrical applications.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| Competency and COs | PO 1 Basic & Discipline specific knowledge | PO 2 Problem analysis | PO 3 Design / development of solutions | PO 4 Engineering Tools,Experi mentation and Testing | PO 5 Engineering practices for society,sustain ability & environment | PO 6 Project Management | PO 7 Life –long learning | PSO1 Plan & Design | PSO2 Construc tion & Mainten ance |
|---|--|-----------------------------|---|---|---|-------------------------------|--------------------------------|--------------------------|---|
| Competency: Apply principles of Engineering Mathematics to solve Engineering problems | 3 | 2 | 2 | 2 | 1 | - | 3 | | |
| CCG118-1 | 3 | 2 | 2 | 2 | 1 | - | 3 | | |
| CCG118-2 | 3 | 2 | 2 | 2 | 1 | - | 3 | | |
| CCG118-3 | 3 | 2 | 2 | 2 | 3 | - | 3 | | |
| CCG118-4 | 3 | 2 | 2 | 2 | 1 | - | 3 | | |
| CCG118-5 | 3 | 2 | 2 | 2 | 3 | - | 3 | | |

CONTENT:

A) TUTORIALS:

Note - Tutorials are to be used to get enough practice

| Sr No. | Topic | Tutorial Content (10 problems in each tutorial) |
|--------|----------------|---|
| 1 | Complex Number | Solve problems based on algebra of complex numbers & De- moivre's theorem |
| 2 | | Examples on different forms of straight line. |

| 3 | Straight line | Examples on to find perpendicular distance of a point from a line, angle between two lines, intersection of lines. |
|----|-----------------------------------|--|
| 4 | Numerical solution of Algebraic & | Numerical solution of algebraic equations. |
| 5 | simultaneous Equations | Numerical solution of simultaneous equations |
| 6 | Functions | Examples on value of functions, Odd & Even functions, Composite functions |
| 7 | Limits | Evaluation of limits by Factorization, Rationalization, Simplification, Infinity method |
| 8 | Differentiation | To find derivatives by product rule, quotient rule, Chain rule, Inverse function, Implicit function |
| 9 | Differentiation | To find derivatives of Parametric function, Logarithmic function, Derivatives of second order |
| 10 | Applications of Derivatives. | To find equation of Tangent, Normal & To find Maxima and Minima of a function. |

B) THEORY:

Section I

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluation (Marks) | |
|------------|---|---------------------|---------------------------------|--|
| | Course outcome CCG106-1: To understand and solve example | ples of com | olex numbers. | |
| 1 | Complex Number 1.1Definition ,Algebra of complex numbers, simple examples 1.2 Polar form, Exponential form 1.3 De- Moivre's theorem | 06 | 10 | |
| | Course outcome CCG106-2: To solve problems on two dimensional co-ordinate geometry of straight line. | | | |

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluation (Marks) |
|------------|---|---------------------|---------------------------------|
| | Course outcome CCG106-1: To understand and solve exam | ples of com | olex numbers. |
| 2 | The Straight line 2.1 Slope, intercepts & various methods of finding slope 2.2 Conditions for two straight lines to be parallel and Perpendicular to each others 2.3 Various forms of equations of straight line 2.4 Perpendicular distance of a point from a line 2.5 Distance between two parallel lines 2.6 Angle between two straight lines 2.7 Intersection of two straight lines & the equation of line passing through this point of intersection | 06 | 10 |
| | Course outcome CCG106-3: To find approximate solution and simultaneous equations by various methods. | on of algebi | raic equations |
| 4 | Numerical solution of Algebraic Equations 4.1 Bisection Method 4.2 Regula- Falsi Method | 06 | 10 |
| 5 | Numerical solution to simultaneous equations 5.1 Jacobi's Method 5.2 Gauss-Seidel method . | 06 | 10 |
| | Total | 24 | 40 |

Section II

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluation (Marks) |
|------------|---|---------------------|---------------------------------|
| | Course outcome CCG106-4: To find limits of different | t types of fi | unctions using |
| | various methods. | | |
| 6 | Functions 6.1 Definition and Concept of function 6.2 Definition of Odd & Even functions, Explicit & implicit functions, Composite functions, Parametric functions 6.3 Value of a function 6.4 Examples on value of functions, Odd & Even functions, Composite functions | 04 | 06 |
| 7 | Limits 7.1 Definition 7.2 Limits of algebraic functions by factorization, simplification, rationalization ,Limit as x→∞ | 05 | 08 |

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluation (Marks) |
|------------|--|---------------------|---------------------------------|
| | Course outcome CCG106-4: To find limits of different various methods. | t types of fi | unctions using |
| | Course outcome CCG106-5: To solve the problems of maxi geometrical applications. | ma, minima d | and |
| 8 | Differentiation 8.1 Definition, Derivative of standard functions (without poof), 8.2 Derivative of sum, difference, product and quotient of two or more functions 8.3 Derivative of composite functions 8.4 Derivative of Inverse functions 8.5 Derivative of Implicit functions 8.6 Derivative of Parametric functions 8.7 Derivative of exponential and logarithmic functions 8.8 Logarithmic differentiation 8.9 Differentiation of second order | 12 | 20 |
| 9 | Applications Of Derivatives 9.1 Geometrical meaning of derivative (To find equation of Tangent and normal) 9.2 Maxima and minima of functions | 03 | 06 |
| | Total | 24 | 40 |

¹.Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

Specification table for setting question paper for semester end theory examination:

| Topic | NI | Distrib | Total | | |
|-------|---|-----------|---------------|-------------|-------|
| No. | Name of topic | Knowledge | Comprehension | Application | Marks |
| 1 | Complex Number | 4 | 2 | 4 | 10 |
| 2 | Straight line | 2 | 2 | 6 | 10 |
| 3 | Numerical solution of Algebraic Equations and | 2 | 2 | 16 | 20 |
| 4 | simultaneous Equations | | | | |
| 5 | Functions | 2 | - | 4 | 6 |
| 6 | Limits | 2 | 2 | 4 | 8 |

^{2.} In each topic corresponding applications will be explained

| 7 | Differentiation | 4 | 4 | 12 | 20 |
|---|--------------------------------|----|----|----|----|
| 8 | Applications Of Derivatives | | | 6 | 6 |
| | Total | 16 | 12 | 52 | 80 |

Semester end exam question paper should be such that total marks of questions on each topic is one and times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

RATIONALE:

Computers play a vital role in various fields like business, academics, defense, budget, research, engineering, medicine. In the present Industrial & commercial environment, the technician is expected to use computers skillfully.

This course is intended to make students comfortable with computing environment - Understanding Computer Hardware, Learning basic computer skills, basic application software tools, basic knowledge and applications of Internet and Cyber security awareness.

COMPETENCY:

Apply Fundamental knowledgeof computer system to work with simple applications.

Cognitive: i) State the basic parts of a computer system and relationships among component.

ii) Describe characteristics and functions of CPU's, motherboard, RAM, Storage devices

Psychomotor: i) Identify computer system and Network ii) Create word documents, spreadsheets and presentation

Affective: Attitude of i) Precision ii) Accuracy iii) Safety iv) Punctuality

COURSE OUTCOMES:

CCG201-1:State basic components & applications of a computer system.

CCG201-2:Classify system and application software of a computer system.

CCG201-3:Design files of word processors, spreadsheets, presentation software, and database application

CCG201-4: Describe importance of Internet and cyber law.

COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX

[Note: Correlation levels: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| PO | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PSO1 | PSO2 |

CONTENT:

A) LABORATORY WORK/PRACTICALS:

Laboratory experiments and related skills to be developed:

| Sr. No. | Title of Experiment | Skills to be developed | Course outcome |
|------------|-----------------------------------|--|----------------|
| 1. | Identify system unit ,connections | . Identify different components inside the | CCG201-1 |
| | of internal components and | CPU cabinet. | |
| | input/output devices. | . Identify input/output and storage devices | |
| 2. | Manage files and folders. | . Create, copy, rename, delete, move files and | CCG201-1 |
| | | folders. | |
| 3. | Install and configure device | . Install driver software for a printer, Scanner | CCG201-1 |
| | driver for printer and scanners | . Set up a printer & scanner | & |
| | _ | Scan a page, print a test page | CCG201-2 |

| 4. | Identify configuration of OS & Computer system. | Understanding the concept of system and application software. Use start icon, taskbar, Recycle Bin, My Computer icon, The Recycle Bin and deleted files Creating shortcuts on the desktop | CCG201-2 |
|----|---|--|-------------------|
| 5. | Creating and Editing a word document | Use of menus and submenus. Type and format the text matter in paragraphs. Set up page size, margins Insert headers and footers, bullets. Use of borders and shading Format picture, word-art, text box etc. Typing text in multi-columns Use of equation editor | CCG201-3 |
| 6. | Inserting table and Mail-Merge | Table: Insert,format Table. Sort data in table Mail-Merge: 1. Create main document and data source 2. Merge the main document anddata source. 3. Merge to file and merge to print. | CCG201-3 |
| 7. | Creating and Editing a Spreadsheet | Use of menus and submenus. Creating a table in worksheet. Insert formulas, IF condition and functions. Apply sort, filter and data validations. Set up page size, margins. & set the print area. | CCG201-3 |
| 8 | Creating and editing a presentation. | Insert new / duplicate slides Create objects on a slide and use general editing operations. Use of different views in presentation Apply standard templates for slides. Use preset animation, slide transition and Prepare speaker notes. | CCG201-3 |
| 9 | Apply advance features of slide- show | 1. Use of custom animation effect 2. Use of action buttons on slides 3. Rehearse time-setting of slide show | CCG201-3 |
| 10 | Internet Basics | Check internet connections & its properties. Configure Browser settings and use browser. Use search engines. Visit various website ,Digital India portals (state and national portals) and college portals | CCG201-4 |
| 10 | Making use of Internet (Email, virus protection.) | Register for e-mail ID. Communicate with others using e-mail Installation, use of Anti-virus software, | CCG201-4 |
| 11 | Mini Project | Mini Project based presentation, database & spreadsheet handling, word processing skills. | CCG201-1 to -4 |

B) THEORY:

| Sr. | Topics / Sub-topics | Lectures |
|-----|---|----------|
| No. | CCC201 1. State basis commenced a small actions of a commenter material | (Hours) |
| 1 | CCG201-1: State basic components & applications of a computer system. INTRODUCTION TO COMPUTERS | 6 |
| 1 | 1.1 Introduction to Information Technology | O |
| | 1.2 Basic computer components:-Block of Computer System, I/O Unit, | |
| | CPU, ALU, Memory Unit. | |
| | 1.3 Internal System Components:- Processor, Motherboards, RAM, | |
| | ROM, Graphics Cards, Sound Cards, HDD, SSD(Introduction to latest devices | |
| | for all above points) | |
| | 1.4 External System Components:- Introduction to <u>Input Devices</u> -Keyboards, | |
| | mouse, joystick, pen, scanners, (Introduction to latest types) | |
| | Output Devices-Monitors, Projectors, Speakers, Printers (Introduction to latest | |
| | types) | |
| | 1.5 Secondary Storage Devices:- CD/DVD, USB/ Flash Dives, External Hard | |
| | Disks (Introduction to latest types) | |
| | 1.6 Applications of IT –Education, Medical, ,Computer application in Offices, | |
| | data analysis ,accounting, Investment, inventory control, graphics, database | |

| | Animation) | |
| | 4.1.2 Inserting Elements to Presentation (Shapes Charts, Image, Header Footer, | |
| | Page number) | |
| | 4.1.3 Preparing Slide Show | |
| | 4.2 Creating and Editing a Database | |
| CCG201 | 1-4: Describe importance of Internet and cyber laws. | |
| 5 | COMPUTER NETWORKS | 4 |
| | 5.1 Basic elements of a communication system | |
| | 5.2 Introduction to Digital & Analog data | |
| | 5.3 Types of Networks : LAN, MAN, WAN | |
| | 5.4 Virus, Types of Viruses, Virus Protection | |
| 6 | INTERNET & CYBER LAWS | 4 |
| | 6.1 Internet basic terminology – Web page, Web site, WWW, HTTP, HTML, | |
| | 6.2 Client, server concepts | |
| | 6.3 Introduction to ISP with example | |
| | 6.4 Various examples of Browsers, Search Engines | |
| | 6.5 Awareness about Digital India portals (state and national portals) and | |
| | college portals. | |
| | 6.6 Introduction to Cyber Law | |
| | 6.7 Information Technology Act of India 2000, 2008 | |
| | | |

Progressive Skills Test:

Criteria for Continuous Assessment of Practical work and Progressive skill Test:

| Sr. no | Criteria | Marks allotted |
|-----------|---|-------------------|
| 1 | Attendance at regular practical | 05 |
| 2 | Preparedness for practical | 02 |
| 3 | Neat & complete Diagram. | 04 |
| 4 | Observations & computer handling skill | 02 |
| 5 | Use of toolbar, menu bar and short cut keys. | 04 |
| 6 | Logical thinking and approach | 04 |
| 7 | Oral Based on Lab work and completion of task | 04 |
| | TOTAL | 25 |

Assessment at semester end practical exam as per Pro-forma II.

Criteria for assessment at semester end practical exam:

| Sr. no | Criteria | Marks allotted |
|-----------|---------------------|----------------|
| 1. | Technical ability | 20 |
| 2. | Communication skill | 10 |
| 3. | Logical approach | 20 |
| | TOTAL. | 50 |

INSTRUCTIONAL STRATEGIES:

InstructionalMethods:

- 1. Lectures cum Discussions
- 2. Regular HomeAssignments.
- 3. Laboratory experiences and laboratory interactive sessions

Teaching and Learning resources:

1. Chalk board 2. Slides(PPT) 3. Self-learning Online Tutorials

COURSE ID:

Course Name : COMMUNICATION SKILLS

Course Code : CCG203 Course Abbreviation : GCMS

TEACHING AND EVALUATION SCHEME:

Pre-requisite Course(s) : <*nil* >

Teaching Scheme:

| Scheme component | Hours / week | Credits |
|------------------|--------------|---------|
| Theory | 03 | 05 |
| Practical | 02 | 03 |

Evaluation Scheme:

| Mode of | Progressive Assess | ment | Term End | | | Total |
|--------------------------|---|---------------------------------------|--|---|---------------------------|-------|
| Evaluation | Theory | Practical | Theory | Practical * | TW | Total |
| Details of Evaluation | Average of two tests of 20 marks each to be converted out of 10 marks | One Mid- Term Skill Test(2 hrs) | Term End Theory Exam (02 hours) | Term End Practical Exam (02 hours) | As per Proforma II. | |
| Marks | 10 | | 40 | 50 I | | 100 |

I- Internal Examination

RATIONALE:

Communication being an integral part of every personal and professional human activity, communication skills plays a fundamental role in education as well as technology. As a unanimous feedback from the industry in general, technicians need to be specially strengthened in communication skills for their effectiveness in profession and career. Considering the age group and socio-economical background of the students of the Institute, this course has been designed with a skill-oriented content with some necessary theoretical foundation. For mastery and perfection in these skills, consistent practice and integrated application is necessary in all subjects of the Programme.

COMPETENCY:

Apply principles of communication to communicate in formal and informal scenario as follows:

Cognitive : Understanding and applying principles of communication in various situations **Affective :** Attitude of i) perfection ii) iii) confidence iv) punctuality v) aesthetic presentation

Psychomotor: i) Use of correct pronunciation, tone, accent & intonation

ii) writing formal letters, drafts, reports, draft e-mails and prepare technical documents etc.

iii) Use of correct nonverbal code in formal & informal situations

iv)Speaking in formal & informal situations

^{*} Practical Examination to be conducted by internal examiner (course teacher) and external examiner (course teacher of different class from the Institute) and marks to be entered as per Proforma II.

COURSE OUTCOMES:

CCG203-1 Understand the concept of Communication and identify Communication barriers.

CCG203-2 Deliver Speeches to express thoughts, ideas and emotions.

CCG203-3 Write letters, reports, and E-mail in correct language.

CCG203-4 Make effective use of body language & graphical communication.

CCG203-5 Prepare and present simple media aided presentation.

CCG203-6 Prepare and face interview.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels:1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

CONTENT:

A) ASSIGNMENTS:

Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical assignments as given in the *Workbook on Communication Skills* developed by the Institute in practical sessions of batches of about 22 students:

| Sr No. | Title of Practical Exercise | Skills / Competencies to be Developed | Course Outcome |
|-----------|------------------------------|---------------------------------------|-------------------|
| 1. | Characteristics of | Analysis of communication process | CCG203-1 |
| | Communication Process | | |
| 2. | My Communication Barriers | Self analysis | CCG203-1 |
| 3. | Oral Communication: Prepared | Preparing and delivery | CC G203-2 |
| | Speech | | |

| 4. | Oral Communication : Extempore Speech | Creative thinking and speaking | CC G203-2 |
|-----|---|------------------------------------|-----------|
| 5. | Oral Communication : Conversation | Listening, thinking and speaking | CC G203-2 |
| 6. | Oral Communication : Group Discussion | Listening, thinking and convincing | CC G203-2 |
| 7. | Oral Communication : Group Debate | Listening, thinking and convincing | CC G203-2 |
| 8. | Written Communication : Writing formal Letters | Drafting | CCG203-3 |
| 9. | Written Communication : Writing Reports | Drafting with comprehension | CCG203-3 |
| 10. | Written Communication : Drafting of E-mail | Drafting | CCG203-3 |
| 11. | Written Communication : Technical Writing | Drafting | CCG203-3 |
| 12. | Non-verbal Communication : Graphic Communication | Graphic skills | CCG203-4 |
| 13. | Non-verbal Communication : Body Language | Body language | CCG203-4 |
| 14. | Using Presentation Aids | Preparing Presentation Aids | CCG203-5 |
| 15. | Interview Techniques | Facing an Interview | CCG203-6 |

B) THEORY:

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluation (Marks) |
|------------|---|---------------------|---------------------------------|
| | COURSE OUTCOME CCG203-1 Understand the concept of Communication barriers. | Communicati | on and identify |
| 1 | Introduction to Communication | 10 | 12 |
| | 1.1 Definition and Importance of Communication | | |
| | 1.2 Model of communication | | |
| | 1.3 Principles of effective communication | | |
| | 1.4 Types of communication : Formal, Informal, Oral, | | |
| | Written, Verbal, Non Verbal, Horizontal, Upward and | | |
| | Downward. | | |
| | 1.5 Barriers in communication : Physical, Mechanical, | | |
| | Psychological and Language. | | |
| | COURSE OUTCOME CCG203-2 Deliver Speeches to express | thoughts, ide | eas and |
| | emotions. | | |
| 2 | Oral Communication | 08 | 04 |
| | 2.1 Characteristics of Oral Communication. | | |
| | 2.2 Tone, pronunciation and accents. | | |
| | 2.3 Spoken English: Conversation, Prepared and | | |
| | Extempore speech, Group Discussion and Debate. | | |
| | COURSE OUTCOME CCG203-3 Write letters, reports, and E | -mail in corre | ect language. |

| 3 | Written Communication | 12 | 10 |
|---|---|-------------|----------------|
| | 3.1 Characteristics of written communication. | | |
| | 3.2 Writing Reports : Accident, Progress & Fall in | | |
| | Production | | |
| | 3.3 Letter Writing : Application with Resume, Enquiry | | |
| | Letter, Complaint Letter and Order Letter. | | |
| | 3.4 E-mail Drafting | | |
| | 3.5 Technical Writing: | | |
| | COURSE OUTCOME CCG203-4 Make effective use of b | ody langua | ge & graphical |
| | communication. | T | |
| 4 | Non-verbal communication | 06 | 06 |
| | 4.1 Importance of Non-Verbal Communication. | | |
| | 4.2 Non Verbal Codes : Proxemics, Chronemics & Artefacts | | |
| | 4.3 Aspects of Body Language: Facial Expressions, Eye | | |
| | Contact, Vocalics, Gestures, Posture, Dress and Appearance | | |
| | & Haptics. | | |
| | 4.4 Graphical Communication : i) Advantages and | | |
| | Disadvantages of Graphical Communication. | | |
| | ii) Tabulation of Data and its depiction in the form of Bar | | |
| | Graphs and Pie Charts | | |
| | COURSE OUTCOME CCG203-5 Prepare and present simple | media aided | presentation. |
| 5 | Media Aided Presentation | 06 | 04 |
| | 5.1 Media aids for presentation: strengths and precautions | | |
| | 5.2 Planning, preparing and making a presentation | | |
| | 5.3 Use of presentation media. | | |
| | COURSE OUTCOME CCG203-6 Prepare and face Interview | 7 | |
| 6 | Interview Techniques | 06 | 04 |
| | 6.1 Types of Interview | | |
| | 6.2 Advantages of Mock Interview. | | |
| | 6.3 Facing an Interview | | |
| | Total | 1 | |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

Specification table for setting question paper for semester end theory examination:

| Topic | Name of topic | Distribution | Distribution of marks (Cognitive levelwise) | | Course outcome | Total |
|-------|-------------------------------|--------------|---|-------------|----------------|-------|
| No. | • | Remember | Understand | Application | | Marks |
| 1 | Introduction to Communication | 02 | 06 | 04 | CCG203-1 | 12 |
| 2 | Oral Communication | 00 | 02 | 02 | CCG203-2 | 04 |
| 3 | Written Communication | 02 | 02 | 06 | CCG203-3 | 10 |
| 4 | Non-verbal Communication | 02 | 02 | 02 | CCG203-4 | 06 |
| 5 | Media aided Presentation | 00 | 02 | 02 | CCG203-5 | 04 |
| 6 | Interview Techniques | 00 | 02 | 02 | CCG203-6 | 04 |
| | Total >> | 06 | 16 | 18 | | 40 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

C) INDUSTRIAL EXPOSURE:

(Included in Workbook on Communication Skills)

| SN | Mode of Exposure | Topic |
|----|--|-----------------------|
| 1. | Oral and Written Communication Exercises | Industrial situations |
| 2. | Interview Techniques Exercises | Industrial situations |

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

a) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in *Workbook on Communication Skills*.

| Domain | Particulars | Marks out of 25 |
|-------------|----------------------------|-----------------|
| Cognitive | Understanding | 06 |
| Cognitive | Application | 06 |
| Davahamatan | Presentation Skills | 04 |
| Psychomotor | Drafting skills | 05 |
| Affective | Discipline and punctuality | 02 |
| Affective | Decency | 02 |
| | 25 | |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given in *Workbook on Communication Skills*

Final marks of practical assignments shall be awarded as per Assessment Pro-forma II.

b) Assessment Criteria for Term-end Practical Examination:

Term-end Practical Examination shall be conducted by internal examiner (course teacher) and external examiner (course teacher of different class from the Institute) as per the following criteria.

| Item > | Oral | Written | Total | Marks Converted out of |
|---------|------|---------|-------|------------------------------|
| Marks > | 25 | 25 | 50 | 25 |

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

- 1. Lectures cum Demonstrations
- 2. Classroom practices
- 3. Self Learning Methods using Language Lab

Teaching and Learning Resources:

- 1. Chalk board
- 2. LCD Projector
- 3. Audio Visual Streaming
- 4. Item Bank

COURSE ID:

Course Name : **ENVIRONMENTAL SCIENCE.** (ME/EE/IE/IT/ET/MT)

Course Code : CCG204 Course Abbreviation : GEVS

TEACHING AND EVALUATION SCHEME:

Pre-requisite Course(s) : Nil

Teaching Scheme:

| Scheme component | Hours / week | Credits |
|------------------|--------------|---------|
| Theory | 02 | NI:1 |
| Practical | - | Nil |

RATIONALE:

Increase in environmental pollution and depletion of natural resources is causing depletion of ecosystem. Therefore it is necessary to conserve natural resources and to protect the environment. Environmental studies integrates Physical, Chemical and Biological sciences with the study of the environment. It provides interdisciplinary approach to the study of environmental system & gives solutions of environmental problems.

COMPETENCY:

Apply knowledge of environmental science to tackle environment related issues.

Cognitive: Understanding, interpreting issues of environment in engineering practices.

Affective: Skill of curiosity, interest and problem solving related to environmental issues

COURSE OUTCOMES:

CCG204-1 Develop public awareness about environment.

CCG204-2 Select alternative energy resources for Engineering Practices.

CCG204-3 Understand & Conserve Ecosystem

CCG204-4 Apply techniques to reduce Environmental Pollution.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX

| Walks | the studen | t and assign | him grades | as mentioned | l at ##. | |

RATIONALE:

The course aims at imparting basic principles of thought process, reasoning and inferencing. Sustainability is at the core of Indian Traditional knowledge Systems connecting society and nature. Holistic life style of yogic science and wisdom capsules in Sanskrit literature are also important in modern society with rapid technological advancements and societal disruptions.

The course is introduced to get knowledge in Indian Philosophical Foundations and to know Indian Languages and Literature and the fine arts in India & their Philosophy. It also aims to explore the Educational system, Science and Scientists of Ancient, Medieval and Modern India.

COMPETENCY:

Ability to interpret, connect up and explain basics of Indian traditional knowledge in modern scientific perspective.

Cognitive: Summarize philosophy of Indian culture and Distinguish the Indian languages and literature among difference traditions..

Psychomotor: Acquire the information about the fine arts in India.

Affective: Attitude of Unity in diversity, Tolerance and Universal acceptance, cultural synthesis and values of life.

COURSE OUTCOMES:

CCG205-1: Summarize and classify philosophy of Indian culture of ancient, medieval and modern India.

CCG205-2: Distinguish the Indian languages and literature among different traditions.

CCG205-3: Differentiate between Dharma and Religion.

CCG205-4: Acquire the information about the fine arts in India.

CCG205-5: Study the contribution of education systems of different eras in India.

B. Suggested Assignments:

Practical Assignments and related skills to be developed:

The following practical exercises / assignments shall be conducted and the student should be assessed for attainment of the competency (any 08 assignments).

| Sr No. | Title of Practical Exercise | Skills / Competencies to be Developed | Course Outcome |
|-----------|--|--|-------------------|
| 1 | Write the definition of | 1) Interpret the definition of Health. | CCG205-1 |
| | Health according to WHO | 2) Understand different components of | |
| | and describe important components of it. | Health. | |
| 2 | Give introduction of any | 1) Search different religious books. | CCG205-2 |
| | one Religious book. | 2) Select a religious book of our own | |
| | | choice and study it. | |
| 3 | Collect information about | 1) Collect information about meditation | CCG205-3 |
| | "Anapansati", the method | methods. | |
| | of meditation. Conduct a | 2) Meditate and interpret the mental state | |
| | session of Anapansati with | before and after the meditation | |
| | your family members, | sessions. | |
| | submit photographs of the | | |
| | session, and discuss the | | |
| | after effects amongst the | | |

| | meditators. | | |
|----|--|--|----------|
| 4 | Write an essay on any one Indian traditional festival. Prepare a relevant festival dish and submit a photograph of the dish. | Gather the information about Indian traditional festivals. Understand the science and psychology behind the festive culture of India. | CCG205-3 |
| 5 | Collect pictures / photographs of any five objects received during the excavation of "Sindhu culture" era and write their descriptions. | Search the pictures / photographs of ancient age. Read and interpret information about our heritage. | CCG205-4 |
| 6 | Prepare / construct any model (like pair of oxen, figurine of God or human face etc.) from soil, mud, clay or any other material | Construct a model using soil. Enjoy the artistic experiences. | CCG205-4 |
| 7 | Collect and write information of any five herbal medicinal plants. Grow one of them and submit the photograph. | Search herbal medicinal plants and interpret their applications. Grow different types of plants. | CCG205-4 |
| 8 | Collect information about "Nalanda University" and write a short-note about it with reference to its establishment, progress, contribution, causes of destruction etc. | Collect information of Indian ancient universities. Interpret their contribution in building India as a nation. | CCG205-5 |
| 9 | Write a descriptive note on the role of Indian mathematician in the development of mathematics. | Collect information about ancient Indian scientists and mathematicians. Prepare a write-up of great Indian scientists – mathematicians. | CCG205-5 |
| 10 | Prepare a role play (in a group of 5 / 6 students) based on "Daily life in Gurukul". | Conduct a role play on any topic. Understand value based education and its significance in daily life. | CCG205-5 |
| 11 | Write a descriptive note on "Maritime Trade in Ancient India". | Gather information about trad in ancient India. Understand the position of India in world trade market and India's contribution in it. | CCG205-4 |

C. THEORY:

SECTION-I

| Sr. No. | Topics / Sub-topics | Lectures (Hours) |
|------------|--|---------------------|
| | CCG205-1: Understand philosophy of Indian culture of ancient, medieval and modern India. | |
| 1. | Introduction to Indian Philosophy: 1.1 Basics of Indian Philosophy 1.2 culture & civilization 1.3 culture and heritage 1.4 Importance of culture in human literature 1.5 General characteristics of Indian culture — Unity in diversity, Tolerance and Universal acceptance, वसुधैव कुटुंबकम् (The World is a family), Freedom of worship (रुचीनां वैचित्र्यादृजुकुटिलनानापथजुषाम्। नृणामेको गम्यस्त्वमसि पयसामर्णव इव॥), Cultural synthesis- not cultural conflicts, unbroken traditions, 1.6 Indian culture Ancient India, Medieval India, Modern India. | 4 |
| | CCG205-2: Distinguish the Indian languages and literature among different traditions | |
| 2. | Indian Philosophy & Literature: 2.1 Tradition of metaphysical knowledge 2.2 Vedas & Upanishads 2.3 Schools of Vedanta, and other religion Philosophical Literature 2.4 Philosophical Ideas 2.5 The role of Sanskrit 2.6 Significance of scriptures to current society Indian languages and literature of India. | 6 |
| | CCG205-3: Differentiate between Dharma and Religion. | |
| 3. | Dharma, Religion and Philosophy: 3.1 Meaning of Dharma as duties of Human being, (जगतः स्थितिकारणं प्राणिनां साक्षात् अभ्युदयनिःश्रेयसहेतुर्यः स धर्मः, आगमानां हि सर्वेषाम् आचारः श्रेष्ठ उच्यते । आचारप्रभवो धर्मो धर्मोदायुर्विवर्धते ॥) 3.2 Dharma and Religion 3.3 Religious Philosophy in ancient India 3.4 Religious Philosophy in Medieval India Religious Reform Movements in Modern India (selected movements only) | 6 |

| | CCG205-4: Acquire the information about the fine arts in India | |
|----|---|---|
| 4. | Indian Fine Arts & Its Philosophy (Art, ,ScienceTechnology & Engineering): 4.1 Indian Painting 4.2 Indian handicrafts 4.3 Music, divisions of Indian classic music, modern Indian music 4.4 Dance and Drama 4.5 Indian Architecture - ancient, medieval and modern Science and Technology in Indian, development of science in ancient, medieval and modern Indian. | 8 |
| | CCG205-5: Study the contribution of education systems of different eras in India | |
| 5. | Education System in India: 5.1 The role of "Gurukulas" in Education System 5.2 Value based Education 5.3 Education in ancient, medieval and modern India, aims of education, subjects, languages Science and Scientists of Ancient India, Scientists of Medieval India, Scientists of Modern India. | 8 |

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS

Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per following table.

| Domain | Particulars | Marks out of 25 |
|--------------|---------------------------------------|-----------------|
| Cognitive | Cognitive Understanding the objective | |
| Davishomoton | Manual work and | 10 |
| Psychomotor | Observation | |
| A 664: | Discipline and punctuality | 05 |
| Affective | Presentation of concept | 05 |
| | 25 | |

Grade to the students should be allotted as follows:-

| Range of continuous assessment marks | Grade |
|---|------------|
| continuous assessment marks > 90 | A + |
| 90 = / > continuous assessment marks > 85 | A |
| 85 = / > continuous assessment marks > 80 | B + |
| 80 = / > continuous assessment marks > 75 | В |
| 75 = / > continuous assessment marks > 70 | C + |

| 70 = / > continuous assessment marks > 60 | C |
|---|---|
| | |

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

1. Lectures cum Discussions 2. Collaborative mini projects. 3. Regular Home Assignments.

Teaching and Learning Resources:

1. Chalk board 2. Video clips 3.PPT 4. Charts

| Montra | From the assessment of submission on given topics the teacher should evaluate | | | | | | | |
| Marks the student and assign him grades as mentioned at ##. | | | | | | | | |

RATIONALE:

The course is designed to have basic knowledge of our Constitution, Its formation and process of forming the constitution and its importance. Also it is expected that the student should at least know the political system of nation, state, district and village also.

The judiciary system is also important part in the life of person and it is expected that the diploma student must at least know the system and its provisions in brief.

COMPETENCY:

Ability to understand, connect up and explain basics of Indian constitution, Indian Politics and Indian judiciary in brief.

Cognitive: Understand philosophy of Indian Constitution and Politics.

Psychomotor: Acquire the information about Politics, Judiciary and constitutional provisions. **Affective:** Know the provisions of constitutions and legal process of changing the provisions in constitutions, political impacts on human life and provisions in judiciary and there importance.

COURSE OUTCOMES:

CCG206-1: Understand philosophy of Indian constitution.

CCG206-2: Know the formation process of state and central Government.

CCG206-3: Concept of Union Territory and provisions.

CCG206-4: Indian Politics.

CCG206-5: Study the Judiciary system in India.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels:1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | Programme Outcomes POs and PSOs | | | | | | | | |
|--|--|-----------------------------|--|---|--|-----------------------------------|-----------------------------------|------|------|
| Competency and Cos | PO 1 Basic and Discipline specific knowledge | PO 2 Problem Analysis | PO 3 Design / Development of solutions | | PO 5 Engineering Practices for society, sustainability and Environment | PO 6 Project Manageme nt | PO 7 Life- long Learning | PSO1 | PSO2 |

CONTENT:

Suggested Assignments: It is expected that the student should prepare write up of at least 5 topics as a home work and submit report to the teacher before the grant of term.

THEORY:

| | SECTION-I | |
|------------|--|---------------------|
| Sr. No. | Topics / Sub-topics | Lectures (Hours) |
| | Unit 1. The Constitution:- | |
| | 1.1 Introduction. | |
| 1 | 1.2 The History of making of the Indian Constitution. | 4 |
| | 1.3 Basic structure and its interpretation. | |
| | 1.4 Fundamental Rights and Duties and their interpretation | |
| | Unit 2 .Union Government | |
| | 2.1 Structure of the Indian Union. | |
| 2 | 2.2 President –Role and power. | 6 |
| 4 | 2.3 Prime minister and council of ministers. | 6 |
| | 2.4 Lok sabha and Rajya Sabha. | |
| | 2.5 Union Teritories and their limitations. | |
| | Unit 3. State Government. | |
| | 3.1 Governer –Role and power. | |
| 3 | 3.2 Chief Minster and council of ministers. | 6 |
| | 3.3 State secretariat. | |
| | 3.4 Administrative Regions of Maharashtra. | |

| | SECTION -II | |
|---|---|---|
| 4 | Unit.4 Local Administration:- 4.1 District Administration. 4.2 Municipal Corporation. 4.3 Zilla Panchayat 4.4 Taluka (Tahasil) Administration. | 4 |
| 5 | Unit 5. Election Commission. 5.1 Role and functioning. 5.2 Chief Election Commissioner – Appointment. 5.3 State Election Commission. 5.4 Elections and duties of government /Non government servants – introduction | 6 |
| 6 | Unit 6. Judiciary Provisions:- 1.1 Introduction 1.2 Different courts. 1.3 Government legal advisor-provisions. 1.4 Limitations of courts and co-ordination with Home department. | 6 |

.ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS: It is expected that the student should prepare write up of at least 5 topics as a home work and submit report to the teacher before the grant of term.

- 1.Indian constitution formation.
- 2. Indian constitution important provisions.
- 3. Formation of Indian government process.
- 4. Power of president and prime minister/important facilities to them.
- 5.District administration along with administareation at municipal corporation,tahasil and jilha panchayat.
- 6. Election commission and their responsibilities.
- 7. Judiciery system in india-District courts and their limitations.

Continuous Assessment of Practical Assignments: No practical's but student should write at least 5 assignments on above topics..

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

1. Lectures cum Discussions.

Teaching and Learning Resources:

1. Chalk board 2. Video clips 3.PPT 4. Suggested websites.

^{*} I-Internal Assessment Assessment at semester end practical exam as per Pro-forma IV.

RATIONALE:

The course *Professional Skills* is in continuation of the courses *Generic Skills* and *Communication Skills* studied in semesterI and II respectively. In order to be a successful technician in industry, a diploma holder is required to acquire certain professional skills. These skills shall be studied in this course. An overview and awareness about the world of industry has been provided in Chapter 1. Professional skills like leadership skills, team building, stress and conflict management, time management have been dealt with. Aptitude tests have been introduced. A study of major technological projects in the respective programme discipline has been included in the syllabus. Term work assignments of the course provide the student on-field activities as well as self-learning activities providing professional exposure in order to help develop professional skills.

COMPETENCY:

Apply principles of organizational behavioral science for professional skill as follows:

Cognitive: Understanding and applying principles of professional practices in various situations

Psychomotor: i) Use of correct pronunciation, tone, accent & intonation ii) writing formal letters, drafts, reports etc. iii) Use of correct nonverbal code in formal & informal situations iv)Speaking in formal & informal situations

Affective: Attitude of i) perfection ii) iii) confidence iv) punctuality v) aesthetic presentation.

COURSE OUTCOMES:

IEG207-1 - Develop awareness about industrial scenario of world and India

IEG207-2 - Acquire professional skills like leadership, stress and conflict management, team building skills

IEG207-3 - Identify major technological project in program discipline

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels:1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | Programme Outcomes POs and PSOs | | | | | | | | |
|--|--|-----------------------------|---|---|--|-----------------------------------|-----------------------------------|-----|---|
| Competency and Cos | PO 1 Basic and Discipline specific knowledge | PO 2 Problem Analysis | PO 3 Design / Development of solutions | | PO 5 Engineering Practices for society, sustainability and Environment | PO 6 Project Manageme nt | PO 7 Life- long Learning | and | PSO2 Supervision and Providing Solution |
| Competency:Design, implement and maintain 8051 microcontroller based embedded systems | - | - | - | - | 2 | 2 | 1 | - | - |
| IEIG207-1 | - | - | - | - | 2 | - | 1 | - | - |
| IEIG207-2 | - | - | - | - | 2 | 2 | 1 | - | 1 |
| IEG207-3 | 1 | - | - | - | 2 | 3 | 1 | - | - |

PSO 1: Operate and Maintain:Competency to apply the concepts of Industrial Electronics in theoperation and maintenance of engineering application systems.

PSO 2: Supervision and providing solution: Ability to supervise work and reach appropriatesolution to simple practical problems in Industrial Electronics engineering industry.

CONTENT:

B) SUGGESTED PRACTICAL'S/EXERCISE

A.1 Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any 10/20 out of 15/25 experiments).

| Sr No. | Title of Practical Exercise | Skills / Competencies to be Developed | Course Outcome |
|-----------|--|--|-------------------|
| 1 | Information Search through internet on | Information search and | IEG207-1 |
| | Industrial Scenario of India | interpretation skills | |
| 2 | Information Search through actual visit to | Information search and | IEG207-2 |
| | MIDCs on classification of industries | interpretation skills | |
| 3 | Biography and contribution of Sir M. | Information search and | IEG207-3 |
| | Visverayya and J.R.D.Tata | presentation skills | |

| 4 | Biography and contribution of two eminent | Information search and | IEG207-3 |
|-----|---|--------------------------------|----------|
| | industrialists from programme discipline | presentation skills | |
| 5 | Individual SWOT analysis as a professional | Self-analysis skills | IEG207-2 |
| | technician | | |
| 6 | Leadereship | Leadership skills | IEG207-2 |
| 7 | Stress and Conflict Management | Stress and conflict management | IEG207-2 |
| | | skills | |
| 8 | Aptitude test | Self-testing skills | IEG207-2 |
| 9 | Case study of a major technological project | Case study skills | IEG207- |
| | in the programme discipline | | 1,2,3 |
| 10. | Breathing exercises, pranayam, omkar | Attaining calmness of mind and | IEG207-2 |
| | chanting and meditation | balance of emotions | |

A.2 Micro-project

Each student should allotted one microproject in the beginning of the semester. In 3rd and 4th semester the microprojects are group based (group of 3 students) and in 5th and 6th semesters it should be preferably individualy undertaken. Each microproject should encompass two or more COs.

Each student have to maintain dated work diary consisting of individual contribution in the microproject work.

Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of microprojects is as follows:

- a) Prepare a video resume of self of atleast 2 to 3 minutes.
- b) Prapare a list of inspiring movies and write a review on any one of it.
- c) Read about transformational leadership and write a note on "Shivaji Maharaj as Transformational Leader"
- d) Arrange an interview with successful entrepreneur and prepare a report of interview session.
- e) Visit MIDC office and collect information about industries under the office, role and responsibilities of the office staff.
- f) Visit any social project / NGO and have informal intervies with the Chief of the project. (The discussion shall include the points like team building, stress management, time management, financial aids, public and government support etc)
- g) Conduct any one activity which will bbost your strengths and help to overcome weaknesses.

C) THEORY:

SECTION I

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | | | |
|------------|---|---------------------|--|--|--|
| IEG | IEG207-1 - Develop awareness about industrial scenario of world and India. | | | | |
| 1 | Industrial Development of India | 4 | | | |
| _ | 1.1 Introduction to industrial revolution in the world 1.2 Brief history of industry in India | 7 | | | |
| | 1.3 Broad categories of industries : Manufacturing industry, service industry | | | | |
| | 1.4 Present industrial scenario of India: Small scale, medium scale and major industries in the programme discipline | | | | |
| | 1.5 Major issues related to industrialization | | | | |
| | 207-2 - Acquire professional skills like leadership, stress and conflict mobilities building skills. | nanagement, | | | |
| | Profession and Professional Skills | | | | |
| 1FC | 2.1 Difference in profession, occupation, business 2.2 Leadership: definition, styles and skills 2.3 Team Building: Types of teams. Characteristics of good team and effective teamwork 2.4 Conflict management: Definition and causes of conflict. Methods of resolution - negotiating, compromising, withdrawal, forcing, engagement 2.5 Self SWOT analysis as a professional technician 2.6 Aptitude test. 2.7 Emotion Management and Interpersonal Skills: Use of yogic processes like yogasanas, yognidra, breathing exercises and pranayam, omkar, meditation for effective handling of emotions and interpersonal relations | 8 | | | |
| IEG | 207-3 - Identify major technological project in program discipline. | | | | |
| 3 | Industrial Personalities and Major Projects 3.1 Pioneers of Industrial development of India: Brief biography of Sir M. Visvesarrya and JRD Tata 3.2 Biography and contribution of two great industrial personalities from programme discipline 3.3 Study of 5 major technological projects in the programme discipline | 4 | | | |
| | Sub-total Sub-total | 24 | | | |

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

d) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain | Particulars | Marks out of 25 |
|-------------|--|-----------------|
| Cognitive | Understand the thoutht behind the practical assignment. (assessment based on questions) | 05 |
| | Writing skills / Diagrams / Photos | 05 |
| Psychomotor | Observation / Conclusion / Inference / moral of the assignment | 05 |
| | Discipline and punctuality | 05 |
| Affective | Procedure/Safety Measures/Decency/Presentation | 05 |
| | 25 | |

ii) Progressive Skill Test:

One mid-term Progressive Skill Test of 25 marks shall be conducted as per criteria given

| Sr. No. | Criteria | Marks allotted |
|------------|--|----------------|
| 1 | Complete write-up – Content, observations, conclusion | 10 |
| 2 | Oral Based on Test :- Verbal – non verbal communication, presentation, Gestures, General knowledge | 15 |
| | Total | 25 |

e) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. No. | Criteria | Marks allotted |
|------------|--|----------------|
| 1 | Complete write-up – Content, observations, conclusion | 10 |
| 2 | Oral Based on Test :- Verbal – non verbal communication, presentation, Gestures, General knowledge | 15 |
| | Total | 25 |

Term-end Oral Examination shall be conducted by internal examiner (course teacher) and external examiner (course teacher of different class from the Institute).

* Assessment at semester end practical exam as per Pro-forma IV.

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

- 1. Online/Offline Lectures cum Discussions
- 2. Regular home assignments
- 3. Industrial visits and interview sessions

Teaching and Learning Resources:

LEVEL- III LIFE SKILLS AND PROFESSIONAL SKILLS COURSES

COURSE ID

Course Name : APPLIED MATHEMATICS

Course Code : EIG301 Course Abbreviation : GAMT

TEACHING AND EVALUATION SCHEME:

Pre-requisite Course(s) : CCG105, CCG106

Teaching Scheme:

| Scheme component | Hours / week | Credits |
|------------------|--------------|---------|
| Theory | 03 | 04 |
| Practical | 01 | |

Evaluation Scheme:

| | Progressive Asse | ssment | Tern | n End | |
|-------------------------|---------------------------------------|------------------------------|---------------------------------|-----------|-------|
| Component | Theory | Tutorials | Theory | Practical | Total |
| Details and Duration | Average of two tests of 20 marks each | As mentioned in the syllabus | Term End Theory Exam (03 hours) | NIL | |
| Marks | 20 | | 80 | | 100 |

RATIONALE:

Mathematics is an important pre-requisite for the development and understanding of engineering and technological concepts. For an engineer and technologist, knowledge of Mathematics is an effective tool to pursue and to master the applications in the engineering and technological fields. Applied mathematics is designed for its applications in engineering and technology. It includes integration, differential equation,. The connection between applied mathematics and its applications in real life can be understood and appreciated. Integral calculus helps in finding the area, mean value R. M. S value etc. Differential equation is used in finding curve, rectilinear motion. Statistics and probability will help a student to analyze data of large volume in their higher studies. The fundamentals of these topics are directly useful in understanding engineering applications in various fields.

COMPETENCY:

The course should be taught and implemented with the aim to develop the course outcomes (CO's) for the student to acquire the competency needed to apply the mathematical techniques for engineering subjects.

- 1. Cognitive: understanding and applying principles of mathematics to engineering problems
- 2. Psychomotor: To prepare charts displaying the area of irregular shapes using the concept of integration, prepare charts to displaying grouped and ungrouped data
- 3. Attitude: discipline, consistency, hard work, to concentrate, accuracy, punctuality, aesthetics

COURSE OUTCOMES:

EIG301.1 Apply the concept of integration to find the areas

EIG301.2 Solve Differential equation of first order and first degree by various methods

EIG301.3 Solve examples on Laplace Transform

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

| Marks | 20 | | 80 | 75E | 175 |

^{*} E-External Assessment *Assessment at semester end practical exam as per Pro-forma III.

RATIONALE:

Knowledge of Electronic components & devices is quite essential for a student of electronic engineering diploma programme while maintaining electronics equipments. The contents of this subject are in continuation of contents of Basic Electronics. It introduces more specialized devices and circuits, their characteristics and functions. It also discusses more examples of the basic processes of an electronic circuit.

COMPETENCY:

Apply and build simple electronics circuits.

Cognitive: Understand applications of electronic circuits.

Psychomotor: .Build circuits as per application

Affective: Attitude of i) Logic ii) accuracy

COURSE OUTCOMES:

EIG302-1. Select type of feedback amplifier as per requirement in industry

EIG103-2 Examine and operate rectifier and filter.

EIG302-3 Assemble different wave shaping circuits and change input waveform shape as per requirement

EIG302-4. Analyze various power amplifiers and choose particular power amplifier as per requirement

EIG302-5 Analyze transistor behavior as a switch and use it's switching property in multivibrator applications

EIG302-6 Use sweep generators in electronics circuits

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

A) SUGGESTED PRACTICAL'S/EXERCISE

A.1 Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any '20' experiments).

| Sr No. | Title of Practical Exercise | Skills / Competencies to be developed | Course Outcome |
|-----------|--------------------------------|--|-------------------|
| 1. | Tuned circuit oscillator | Calculate the oscillator frequency Verify calculated frequency with actual observed frequency | EIG 302-2 |
| 2. | Hartley Oscillator | Calculate the oscillator frequency Verify calculated frequency with actual observed frequency | EIG 302-2 |

| | T | | |
|-----|--|---|-----------|
| | | | |
| 3. | Colpitts Oscillator | Calculate the oscillator frequency Verify calculated frequency with actual observed frequency | EIG 302-2 |
| 4. | RC phase shift Oscillator | Calculate the oscillator frequency Verify calculated frequency with actual observed frequency | EIG 302-2 |
| 5. | RC differentiator circuit | a)Build RC circuit as an differentiator b) Check applications of differentiator as waveshaping circuit(response of the circuit for square and triangular input) | EIG 302-3 |
| 6. | RC Integrator Circuit | a) Build RC circuit as an integrator b)Check applications of integrator as waveshaping circuit(response of the circuit for square input) | EIG 302-3 |
| 7. | Positive Clipping circuit waveform observation. | Build diode clipper circuit Observe Clipping waveform on CRO | EIG 302-3 |
| 8. | Negative Clipping circuit waveform observation. | Build diode clipper circuit Observe Clipping waveform on CRO | EIG 302-3 |
| 9. | Combination Clipper | Build diode combination clipper circuit Observe Clipping waveform on CRO by changing clipping levels | EIG 302-3 |
| 10. | Positive Clamping circuit :waveform observation | Build diode clamper circuit Observe Clamping waveform on CRO | EIG 302-3 |
| 11. | Negative Clamping circuit :waveform observation | Build diode clamper circuit Observe Clamping waveform on CRO | EIG 302-3 |
| 12. | Voltage doubler | 1) Build and verify how the output voltage gets doubled the input voltage using voltage doubler. | EIG 302-3 |
| 13. | Class A power amplifier with resistive load | 1)Build class A power amplifier with resistive load 2)Check output of circuit | EIG302-4 |
| 14. | Complementary symmetry class B Power amplifier | 1) Build class B power amplifier in complementary symmetry configuration 2) Check output of circuit | EIG302-4 |
| 15. | Single tuned Voltage amplifier | Build single tuned voltage amplifier 2)check output response and draw on semilog graph paper | EIG302-4 |

| 16. | Astable multivibrator using transistor: time measurement and calculations. | To generate square wave form on CRO using transistor astable multivibrator To measure time period on CRO and verify it by using calculation formula | EIG 302-5 |
|-----|--|--|-----------|
| 17. | Monostable multivibrator using transistor: time measurement and calculations | 1)To check output of transistor monostable multivibrator 2)TO measure time period on CRO and verify it by using calculation formula | EIG 302-5 |
| 18. | Bistable multivibrator using transistor | 1)To check output of transistor Bistable multivibrator | EIG 302-5 |
| 19. | Schmitt trigger using transistor | 1) To check how the input waveform is converted in to the square wave using Schmitt trigger | EIG 302-5 |
| 20. | Exponential switch sweep circuit | Build Exponential switch sweep circuit Check output and draw it on graph | EIG 302-6 |
| 21. | Transistor switch sweep circuit | Build Transistor switch sweep circuit Check output and draw it on graph | EIG 302-6 |
| 22. | Miller sweep generator | Build Miller sweep circuit Check output and draw it on graph | EIG 302-6 |
| 23. | Clamping circuit using simulation software | 1)Build Clamping circuit using relevant software 2)Check output response | EIG 302-3 |
| 24. | Multivibrator circuit using simulation software | 1)Build any Multivibrator circuit using relevant software 2)Check output response | EIG 302-5 |
| 25. | Clipper circuit using simulation software | 1)Build any clipper circuit using relevant software 2)Check output response | EIG 302-3 |

A.2 Micro-project

Each student should allotted one microproject in the beginning of the semester. In 2^{nd} and 4^{th} semester the microprojects are group based (group of 3 students) and in 5^{th} and 6^{th} semesters it should be preferably individualy undertaken. Each microproject should encompass two or more COs.

Each student have to maintain dated work diary consisting of individual contribution in the microproject work.

Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of microprojects is as follows:

- a) Construct a door bell using transistor
- b) Using transistor, construct a clap switch
- c) Simple Water Level Indicator.
- d) Automatic LED Emergency Light.
- e) Infrared Motion detector.
- f) Multivibrator based alarm system
- g) Fire Alarm Project.

- h) Lead-acid battery charger.
- i) FM transmitter using transistor
- j) Clap operated remote control for fans
- k) Battery Charger using solar light
- l) Automatic street light control

Specification table for setting question paper for semester end theory examination:

| Topic | Name of topic | Distribution | n of marks (Cogni wise) | Course outcome | Total | |
|-------|------------------------------|--------------|----------------------------|----------------|----------|----|
| No. | Name of topic | Remember | Understand | | Marks | |
| 1 | Feedback Amplifier | 02 | 04 | 06 | EIG103-1 | 12 |
| 2 | Sinusoidal Oscillator | 02 | 04 | 08 | EIG103-2 | 14 |
| 3 | Waveshaping Circuits | 02 | 06 | 06 | EIG103-3 | 14 |
| 4 | Power and Tuned Amplifier | 04 | 06 | 06 | EIG103-4 | 16 |
| 5 | BJT Switching Circuits | 02 | 04 | 06 | EIG103-5 | 12 |
| 6 | Sweep Generators | 02 | 04 | 06 | EIG103-6 | 12 |
| | Total >> | 14 | 28 | 38 | | 80 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

f) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain | Particulars | Marks out of 25 |
|-------------|---|-----------------|
| Cognitive | Technical preparedness for practical | 05 |
| Doughomotor | Operating skills/ Algorithm/ flowchart | 05 |
| Psychomotor | Observation/ Logic/ Program/ Result | 05 |
| | Discipline and punctuality | 05 |
| Affective | Procedure/ Safety Measures/ Decency/ Presentation | 05 |
| | 25 | |

ii) Progressive Skill Test:

One mid-term Progressive Skill Test of 25 marks shall be conducted as per criteria given

| Sr. No. | Criteria | Marks allotted |
|------------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algoritm/ Flowchart/ Program | 05 |
| 2 | Observations, Result, Output | 05 |
| 3 | Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs & Procedure / workmanship and Safety measures | 05 |
| 5 | Oral Based on Term Work | 05 |
| | Total | 25 |

g) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. no | Criteria | Marks allotted |
|-----------|-----------------------------------|----------------|
| 1 | Technical ability | 10 |
| 2 | Correct figures / diagrams/ Logic | 10 |

| 3 | Observation table/ Algorithm/ flowchart/ Program | 10 |
|---|---|----|
| 4 | Correctness of - Result / Output / Calculations / Graphs | 10 |
| 5 | Safety / Use of proper tools / overall Decency & Presentation / Workmanship | 10 |
| | Total | 50 |

^{*}Assessment at semester end practical exam as per Pro-forma I.

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

1.Online or offline Lectures cum Discussions 2. Regular Home Assignments.3. Laboratory work

Teaching and Learning Resources:

| Marks | 20 | | 80 | 501 | 150 |

^{*}I-Internal Assessment *Assessment at semester end practical exam as per Pro-forma IV.

RATIONALE:

This subject intends to provide the students practical information & technical background. It also provides the students with concepts, principles and procedures of Analog and Digital electronic measuring instruments and the measurement techniques for the measurement of various electronic quantities. Because of the scope of the subject, students are well exposed to a good and wide area of the various electronic measuring instruments as the subject comprises of those basic equipment and transducers of which students should have knowledge.

This subject presumes that the students are familiar with basic utilization of measuring instruments. The era of this subject consists of the information about concepts, principles and Procedures of analog and digital electronic measuring instruments and measuring techniques.

COMPETENCY:

Illustrate practical information & technical background for different engineering applications.

Cognitive: Differentiate different types of measuring instruments.

Psychomotor: Calibrate different types of measuring instrument.

Affective: Attitude of i) accuracy ii) precision iii) punctuality iv) knowledge

COURSE OUTCOMES:

EIG303-1 Describe various characteristics of measuring instruments.

EIG303-2 Identify unknown values of components using bridges for industrial applications.

EIG303-3 Describe & suggest suitable digital instruments and transducers for measurement of various electronic parameters.

EIG303-4 Explain and demonstrate the uses of CRO.

EIG303-5 Explain & demonstrate various test & recording instruments.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels:1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | Programme Outcomes POs and PSOs | | | | | | | | |
|--|--|-----------------------------|---|---|--|-----------------------------------|------|------------------------------------|---|
| Competency and Cos | PO 1 Basic and Discipline specific knowledge | PO 2 Problem Analysis | PO 3 Design / Development of solutions | | PO 5 Engineering Practices for society, sustainability and Environment | PO 6 Project Manageme nt | long | PSO1 Operate and Maintain | PSO2 Supervision and Providing Solution |
| Competency:Illustrate practical information & technical background for different engineering applications. | 2 | 3 | 2 | 1 | - | - | 1 | 2 | 3 |
| EIG303-1 | 2 | 2 | 2 | - | - | - | 1 | 2 | 2 |
| EIG303-2 | 1 | 2 | 2 | - | - | - | - | 2 | 2 |

A) SUGGESTED PRACTICALS/ EXERCISE

A.1 Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any 10/20 out of 15/25 experiments).

| Sr No. | Title of Practical Exercise | Skills / Competencies to be Developed | Course Outcome |
|-----------|---|--|-------------------|
| 1. | Use of analog and digital multimeter. 1)Measurement of voltage 2)Measurement of current | 1. Connect power supply | EIG303, 3 |
| | 3)Measurement of resistance 4)Checking for continuity | 2. Check voltage, current, & resistance using multimeter. | |
| 2. | Use of LCRQ meter 1) measurement of different values of inductors | 1. start LCR-Q meter in idle mode | EIG303-3 |
| | 2) Capacitors 3) resistors | 2. measure resistor, inductor, & capacitor at different ranges | |
| 3. | Use of CRO as component tester. 1) Checking different components such as resistor, diode, capacitor etc. | Connect CRO & adjust intensity and focus Test different components like | EIG303-4 |
| | 2) Observation of patterns. | diode, transistor etc. 3. Know front panel of CRO | |
| 4. | Identify various types of transducers 1)Categorize transducers(such as pressure ,temp etc.) | Identifying particular type of transducer. 2. Fig. 1: 1. 1. 1. 1. 1. 1. 1. 1. 1. 1. 1. 1. 1. | EIG303-3 |
| | 2)Identify particular type(e.g.PT-100) | 2. Finding sub type of the given transducer. | |
| 5. | Use of CRO for measurement of AC DC voltage & frequency. | 1. Connect CRO & adjust intensity and focus | EIG303-4 |
| | | 2. Measure AC, DC voltage3. Measure time period & | |
| | | frequency | |
| 6. | Test performance of inductive transducer LVDT. | 1)Implement the setup needed. 2)Checking and comparing voltages for the performance of LVDT. | EIG303-3 |
| 7. | Use of CRO for measurement of phase & frequency using Lissajous figures | e phase difference & frequency ratio using Lissajous figure | IG303-4 |
| 8. | Use of function generator | 1. connect function generator | EIG303-5 |
| | | 2. Know front panel of function generator | |

| Study of whetstone's bridge 1. Connect circuit of AC bridge as per diagram | | | 3. Check different output | |
|--|-----|--|---------------------------------|-----------|
| 9. Use of detectors for Ac bridge like headphone 10. Study of whetstone's bridge for measurement of unknown resistances. 11. Connect circuit of Wheatstone bridge as per diagram 2. Detect the balancing condition 12. Detect balancing condition 3. Find out unknown resistance 13. Measurement of unknown capacitance using bridge. 14. Use of any type of temperature transducer. 15. Demonstrate any one type of 16. Connect circuit of AC bridge as per diagram 2. Detect balancing condition 3. Find out unknown capacitance 14. Use of any type of temperature transducer. 2. Measure parameters necessary 15. Demonstrate any one type of 16. Connect circuit of AC bridge as per diagram 2. Detect balancing condition 3. Find out unknown inductance. 1. Connect circuit of AC bridge as per diagram 2. Detect balancing condition 3. Find out unknown inductance. 1. Connect frequency meter 2. Know front panel of frequency meter 3. Measure different freq of sign. 18. ElG303-3 | | | _ | |

A.2 Micro-project

Each student should allotted one microproject in the beginning of the semester. In 3^{rd} and 4^{th} semester the microprojects are group based (group of 3 students) and in 5^{th} and 6^{th} semesters it should be preferably individually undertaken. Each microproject should encompass two or more COs.

Each student have to maintain dated work diary consisting of individual contribution in the microproject work.

Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of microprojects is as follows:

- a. Battery charger circuit
- b. Low cost fire alarm circuit
- c. Oscillator
- d. Schmitt trigger
- e. Opamp as adder, sub etc.
- f. BCD to seven segment display Many more.....

Specification table for setting question paper for semester end theory examination:

| Topic | Name of topic | Distribution of marks (Cognitive level-wise) | | | Course Outcome | Total |
|-------|---|--|------------|-------------|-------------------|-------|
| No. | • | Remember | Understand | Application | | Marks |
| 1 | Basics of Measurement | 04 | 02 | 02 | EIG303-1 | 08 |
| 2 | AC/DC bridges & applications | 04 | 04 | 08 | EIG303-2 | 16 |
| 3 | Digital Meters and introduction to transducers. | 04 | 04 | 08 | EIG303-3 | 16 |
| 4 | Oscilloscope | 06 | 06 | 08 | EIG303-4 | 20 |
| 5 | Signal Generators Analyzers | 02 | 08 | 02 | EIG303-5 | 12 |
| 6 | Recorders | 02 | 04 | 02 | EIG303-5 | 08 |
| | Total >> | 22 | 28 | 30 | | 80 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

a) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain Particulars | | Marks out of 25 |
|--------------------|---|-----------------|
| Cognitive | Technical preparedness for practical | 05 |
| Develometer | Operating skills/Algorithm/ flowchart | 05 |
| Psychomotor | Observation/Logic/ Program/Result | 05 |
| | Discipline and punctuality | 05 |
| Affective | Procedure/ Safety Measures/ Decency/ Presentation | 05 |
| | 25 | |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment Pro-forma X*.

| Sr. No. | Criteria | Marks allotted |
|------------|--|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algorithm/ Flowchart/ Program | 05 |
| 2 | Procedure followed to achieve the result | 05 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs, workmanship and Safety measures | 05 |
| 5 | Oral Based on Test | 05 |
| | Total | 25 |

^{*}Final marks of practical assignments shall be awarded as per Assessment Pro-forma 4.

b) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. No | Criteria | Marks allotted |
|-----------|--|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algorithm/ Flowchart/ Program | 10 |
| 2 | Procedure followed to achieve the result | 10 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 10 |
| 4 | Proper Graphs, workmanship and Safety measures | 10 |
| 5 | Oral | 10 |
| | Total | 50 |

^{*}Assessment at semester end practical exam as per Proforma 4

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

- 1. Online/Offline Lectures cum Discussions
- 2. Regular home assignments
- 3. Laboratory work

Teaching and Learning Resources:

1. Chalk board 2. Video clips 3.PPTs 4. Question Bank 5. Charts

^{*} E- External Assessment Assessment at semester end practical exam as per Pro-forma III.

RATIONALE:

This course is designed to develop programming attitude and attract the interest of the students in the C Language. C is a very powerful, widely used, efficient and compact, which combines features of high-level language and low-level language. It is used in many scientific programming situations. It forms the core of the modern languages Java and C++. Almost every set up in software Engineering domain chooses C as a first priority programming language.

COMPETENCY

Develop programming skills of C Programming to solve engineering problems in procedural way.

Cognitive: Understanding and implementing concepts of procedural programming

Psychomotor:i) Operating Computer system efficiently

Affective: Attitude of i) precision ii) accuracy iii) safety iv) punctuality v) aesthetic presentation

COURSE OUTCOMES:

EIG304-1 Identify C expressions with character set and operators.

EIG304-2 Apply decision making and branching and looping constructs in programming.

EIG304-3 Implement user defined functions and arrays.

EIG304-4 Implement library functions for string handling.

EIG304-5 Develop C programs using structures and pointers.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX

[Note: Correlation levels: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation

A.2 Micro-project

Each student should allotted one microproject in the beginning of the semester. In 3rd and 4th semester the microprojects are group based (group of 3 students) and in 5th and 6th semesters it should be preferably individualy undertaken. Each microproject should encompass two or more COs.

Each student have to maintain dated work diary consisting of individual contribution in the microproject work.

Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of micro projects is as follows:

- a) Prepare sample mark sheets for 20 students.
- b) Generate salary slips of employee in an organization.
- c) Prepare book issue system of library.
- d) Any other similar kind of micro project suggested by Course teacher

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

i) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain Particulars | | Marks out of 25 |
|--|--|-----------------|
| Cognitive Technical preparedness for practical | | 05 |
| Davahamatan | Operating skills/Algorithm/ flowchart | 05 |
| Psychomotor | Observation/Logic/ Program/Result | 05 |
| | Discipline and punctuality | 05 |
| Affective | Procedure/ Safety Measures/ Decency/ Presentation | 05 |
| | 25 | |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment Pro-forma X*.

| Sr. No. | Criteria | Marks allotted |
|------------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algoritm/ Flowchart/ Program | 05 |
| 2 | Procedure followed to achieve the result | 05 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs, workmanship and Safety measures | 05 |
| 5 | Oral Based on Test | 05 |
| | Total | 25 |

^{*}Final marks of practical assignments shall be awarded as per Assessment Pro-forma X.

j) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. No | Criteria | Marks allotted |
|-----------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algoritm/ Flowchart/ Program | 10 |
| 2 | Procedure followed to achieve the result | 10 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 10 |
| 4 | Proper Graphs, workmanship and Safety measures | 10 |
| 5 | Oral | 10 |
| | Total | 50 |

^{*}Assessment at semester end practical exam as per Pro-forma I.

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

| Marks | 20 | | 80 | 50I | 150 |

^{*} I- Internal Assessment *Assessment at semester end practical exam as per Pro-forma IV.

RATIONALE:

Analog Communication is the subject that presents information about the basic processes, circuits and other building blocks of communication system. The study of basic operating and handling of various analog communication system will help them to troubleshoot and maintain analog communication systems used for varios types of communication.

COMPETENCY:

Explain, operate and maintain different Analog communication systems.

Cognitive: Describe the fundamentals of different electronics communication systems.

Psychomotor: Demonstrate the operation of modulator and demodulator based on various modulating techniques.

Affective: Attitude of i) Logic ii) accuracy iii) soft skills v) punctuality

COURSE OUTCOMES:

EIG305-1 Use relevant frequency ranges for different communication systems.

EIG305-2 Use relevant modulation techniquecs for specific applications.

EIG305-3 Maintain transmitter circuit of AM and FM.

EIG305-4 Maintain receiver circuit of AM and FM.

EIG305-5 Use relevant media for transmission and reception of signals.

EIG305-6 Use relevant type Antenna for various aplications.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels:1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | Programme Outcomes POs and PSOs | | | | | | | | |
|--|--|-----------------------------|---|---|--|-----------------------------------|-----------------------------------|-----|---|
| Competency and Cos | PO 1 Basic and Discipline specific knowledge | PO 2 Problem Analysis | PO 3 Design / Development of solutions | | PO 5 Engineering Practices for society, sustainability and Environment | PO 6 Project Manageme nt | PO 7 Life- long Learning | and | PSO2 Supervision and Providing Solution |
| Competency: Explain, operate and maintain different Analog communication systems. | 2 | 1 | 2 | 1 | - | - | - | 1 | 1 |
| EIG305-1 | 1 | - | - | - | - | - | - | - | - |

| EIG305-5 | - | 1 | - | - | - | - | - | - | - |
| EIG305-6 | - | 1 | - | - | - | - | - | - | - |

PSO 1: Operate and Maintain: Competency to apply the concepts of Industrial Electronics in the operation and maintenance of engineering application systems.

PSO 2: Supervision and providing solution: Ability to supervise work and reach appropriate solution to simple practical problems in Industrial Electronics engineering industry.

CONTENT:

C) SUGGESTED PRACTICAL'S/EXERCISE

A.1 Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any 10/12 out of 15 experiments).

| Sr No. | Title of Practical Exercise | Skills / Competencies to be Developed | Course Outcome |
|-----------|-------------------------------|---|-------------------|
| 1 | Generate Amplitude modulation | Trace the circuit identify carrier, | EIF305-2 |
| | Wave | Modulating signal and modulated signal. | |

| 2 | Observation & measurements of AM wave | Observe AM waveform on CRO. Calculate modulating index | EIF305-2 |
|----|--|---|----------------|
| 3 | Study trapezoidal pattern | Observe various trapezoidal patterns on CRO. Calculate modulating index using this pattern | EIF305-2, |
| 4 | Demodulation of FM using Diode detector | Trace the circuit, Identify Modulated and demodualed signal and observewaveforms on CRO | EIF-2,4 |
| 5 | Generation of Frequency modulated waveform | Trace the circuit, Identify carrier, modulating signal and modulated signal | EIF305-2, |
| 6 | Observation and measurement of FM wave | Observe FM waveforms on CRO Calculate modulating index | EIF-2,3 |
| 7 | Demodulation of FM signal | Observe FM and FM demodulated waveforms on CRO. Observe similarities in modulated signal and demodulated signal. | EIF305- 2,4 |
| 8 | Visit to AM Transmitter | Understand AM transmitter and prepare a project report | EIF305-1- |
| 9 | Visit to FM Transmitter | Understand FM transmitter and prepare a project report | EIF305-1- |
| 10 | Study of super heterodyne radio receiver | Identify different blocks & expected waveforms of superheterodyne radio receiver, Identify different controls and their functions and measure the voltages at different check points. | EIF305-1- |
| 11 | Fault finding in Super heterodyne receiver | Locate faults using voltage and waveform technique at different check points and correct them. | EIF305-1- 4 |
| 12 | To plot selectivity and fidelity curve for superhetrodyne radio receiver | Give input AM wave from signal generator to the circuit and observe output on CRO. Plot the selectivity & fidelity curve by varying carrier frequency. | EIF305- 4,5 |
| 13 | Study of FM Receiver | Identify different blocks & expected waveforms of slope or ratio detector. Identify different controls and their functions and measure the voltages at different check points | EIF305- 4,5 |
| 14 | Study and design Of Yagi-Uda Antenna | Draw diagram of yagi_uda antenna. Identify and describe parts of yagi_uda antenna. | EIF305- 5,6 |
| 15 | Study and design of Parabolic reflector (Dish Antenna) | Draw diagram of Dish antenna. Identify and describe parts of Dish antenna for particular λ . | EIF305- 5,6 |

A.2 Micro-project

Each student should allotted one microproject in the beginning of the semester. In 3rd and 4th semester the microprojects are group based (group of 3 students) and in 5th and 6th semesters it should be preferably individualy undertaken. Each microproject should encompass two or more COs.

Each student have to maintain dated work diary consisting of individual contribution in the microproject work.

Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of microprojects is as follows:

- **a) Modulation**: Built a cicuit for modulation using IC MC1496/8038 on general purpose PCB and prepare the report.
- **b) FM Transmitter:** Built a cicuit on general purpose PCB for FM transmitte using IC 8038 / transmitter BF549 and prepare the report.
- **c) Antenna:** simulate a microstrip patch antenna for frequency 2.4GHz frequency using HFSS (high frequency structure simulator) software.
- d) Tuning of IFT: Build a circuit on genral purpose PCB for tunig IFT at 455KHz.

D) THEORY:

SECTION I

Specification table for setting question paper for semester end theory examination:

| Topic | Name of topic | Distribution of marks (Cognitive level-wise) | | | Course Outcome | Total |
|-------|---|--|------------|-------------|-------------------|-------|
| No. | wante of topic | Remember | Understand | Application | | Marks |
| 1. | Introduction to electronic communication system | 04 | 06 | - | EIF305-1 | 10 |
| 2. | Amplitude modulation and SSB technique. | 04 | 08 | 04 | EIF305-2 | 16 |
| 3. | Angle modulation and FM transmitters | 04 | 06 | 04 | EIF305-3 | 14 |
| 4. | Radio receivers | 04 | 10 | 04 | EIF305-4 | 18 |
| 5. | Antennas | 04 | 06 | - | EIF305-5 | 10 |

| 6. | Electromagnetic Wave | 06 | 06 | - | EIF305-6 | 12 |
|----|----------------------|----|----|----|----------|----|
| | Propagation | | | | | |
| | Total >> | 26 | 42 | 12 | | 80 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

k) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain | Domain Particulars | |
|--|---|----|
| Cognitive Technical preparedness for practical | | 05 |
| | Operating skills/Algorithm/ flowchart | 05 |
| Psychomotor | Observation/Logic/ | 05 |
| | Program/Result Discipline and punctuality | 05 |
| Affective | Procedure/ Safety Measures/ Decency/ Presentation | 05 |
| | 25 | |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment Pro-forma X*.

| Sr. No. | Criteria | Marks allotted |
|------------|--|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algorithm/ Flowchart/ Program | 05 |
| 2 | Procedure followed to achieve the result | 05 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs, workmanship and Safety measures | 05 |
| 5 | Oral Based on Test | 05 |
| | Total | 25 |

^{*}Final marks of practical assignments shall be awarded as per Assessment Pro-forma X.

1) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. No | Criteria | Marks allotted |
|-----------|--|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algorithm/ Flowchart/ Program | 10 |
| 2 | Procedure followed to achieve the result | 10 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 10 |
| 4 | Proper Graphs, workmanship and Safety measures | 10 |
| 5 | Oral | 10 |
| | Total | 50 |

^{*}Assessment at semester end practical exam as per Pro-forma I.

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

RATIONALE:

In the present scenario most of the electronic equipment like computers, mobiles, music systems, ATM, automation and control circuits and systems are based on digital circuits which the diploma electronic engineering passouts (also called technologists) have to test & troubleshoot these systems. This requires knowledge of basic logic gates, combinational and sequential logic circuits using discrete gates, ADC, DAC as well as digital ICs which will enable the students to interpret the working of digital equipment and maintain them. After completion of the course, students will be able to develop digital circuits based applications.

COMPETENCY:

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

• I) Build/test digital logic circuits consisting of digital ICs.

Cognitive: Understand Logic gates and Digital circuits.

Psychomotor: Build digital circuits on Breadboard & observe the output.

Affective: Attitude of i) Logical thinking ability ii) Digital circuit design skills.

COURSE OUTCOMES (COs):-

The theory, practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

IEG306-1: Use number system and codes for interpreting working of digital system.

IEG306-2: Use Boolean expressions to realize logic circuits.

IEG306-3: Analyze different Logic families & working of basic logic gates.

IEG306-4: Build simple combinational circuits.

IEG306-5: Build simple sequential circuits.

IEG 306-6: Test data converters in digital electronics systems & identify memory types.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels:1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | Programme Outcomes POs and PSOs | | | | | | | | |
|---|--|-----------------------------|---|--|--|-----------------------------------|-----------------------------------|-----|---|
| Competency and Cos | PO 1 Basic and Discipline specific knowledge | PO 2 Problem Analysis | PO 3 Design / Development of solutions | PO 4 Engineering Tools, Experimenta tion and Testing | PO 5 Engineering Practices for society, sustainability and Environment | PO 6 Project Manageme nt | PO 7 Life- long Learning | and | PSO2 Supervision and Providing Solution |
| Competency: Design, implement and maintain Digital Logic circuits or systems | 2 | 3 | 3 | - | - | - | 1 | 3 | 3 |
| IEG306-1 | 2 | 3 | 1 | - | - | - | 1 | 1 | - |
| IEG306-2 | 2 | 3 | 3 | - | - | - | 1 | 3 | 2 |
| IEG306-3 | 2 | 2 | 2 | - | - | - | 1 | 3 | 3 |
| IEG306-4 | 2 | 3 | 3 | 1 | - | - | 1 | 3 | 3 |
| IEG306-5 | 2 | 3 | 3 | 1 | - | - | 1 | 3 | 3 |
| IEG306-6 | 2 | 3 | 3 | 1 | - | - | 1 | 3 | 3 |

PSO 1: Operate and Maintain: Competency to apply the concepts of Digital Electronics in the operation and maintenance of engineering application systems.

PSO 2: Supervision and providing solution: Ability to supervise work and reach appropriate solution to simple practical problems in Electronics engineering industry.

CONTENT:

E) SUGGESTED PRACTICAL'S/EXERCISE

A.1 Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any '10' experiments).

| Sr No. | Title of Practical Exercise/ Outcomes(PrOs) | Skills / Competencies to be Developed | Course Outcome |
|-----------|---|---|-------------------|
| 1 | Test the functionality of NOT,AND,OR & Ex-OR logic gates using breadboard. (IC 7404,7408,7432,7486) | Identification of IC's. Testing of logic gates. | IEG 306-2 |
| 2 | Test the functionality of NAND & NOR logic gates using breadboard. (IC 7400 & 7402) | Identification of IC's. Testing of logic gates. | IEG 306-2 |
| 3 | Construct AND, OR & NOT gates using Universal gates NAND & NOR | Buiding circuit on breadboard. Verifying the output with truth table of each gate. | IEG 306-2 |
| 4 | Build the logic circuit on breadboard to check the De Morgan's theorems for 2 input variables. | Buiding circuit on breadboard. Verifying the output with truth table of each gate. | IEG 306-2 |
| 5 | Design Half adder & Full adder using Boolean expressions | '' | IEG 306-3 |
| 6 | Design Half subtractor & Full subtractor | '' | IEG 306-3 |
| 7 | Build 8-bit Binary adder using Binary adder IC 7483. | '' | |
| 8 | Construct & test BCD to 7-segment decoder using IC 7447/7448 | '' | IEG 306-3 |
| 9 | Build 4:1 Mux using AND-OR gates. | '' | |
| 10 | Build 1:4 DMux using NAND gates. | '' | |
| 11 | Build & test fuction of MUX using IC 74151/74150/any other equivalent | '' | IEG 306-3 |
| 12 | Build / test function of DEMUX IC 74155/74154/any other equivalent | '' | IEG 306-3 |
| 13 | Build Full Adder using multiplexer | (, | IEG 306-3 |
| 14 | Build and test Priority encoder using IC 74147 | '' | |
| 15 | Build/ test function of RS flip flop using NAND gate | '' | IEG 306-4 |
| 16 | Build & test function of JK flip flop using IC 7476 | '' | IEG 306-4 |
| 17 | Use IC 7476 to construct & test the functionality of D and T flip flop. | '' | IEG 306-4 |
| 18 | Build 4-bit Right Shift Register using D flip flop IC 7474 | '' | IEG 306-4 |
| 19 | Implement 4-bit Left Shift Register. | '' | IEG 306-4 |
| 20 | Build 4-bit Ring Counter and Twisted Ring counter. | '' | IEG 306-4 |
| 21 | Implement 4-bit ripple counter using IC 7476. | '' | IEG 306-4 |
| 22 | Use IC 7490 to construct BCD and Mod-6 | (, | IEG 306-4 |

| | counter. | | |
|----|--|----|-----------|
| 23 | Build 3-bit UP/DOWN ripple counter | '' | IEG 306-4 |
| 24 | Build MOD-12 Synchronous UP counter | '' | IEG 306-4 |
| | using IC 74160. | | |
| 25 | Build R-2R resistive network on | '' | IEG 306-5 |
| | breadboard to convert given digital data | | |
| | into analog output. | | |

A.2 Suggestive Micro-project list:-

Each student should be allotted one microproject in the beginning of the semester. In 3nd and 4th semester the microprojects are group based (group of 3 students) and in 5th and 6th semesters it should be preferably individualy undertaken. Each microproject should encompass two or more COs. The number of students in the group should **not exceed three**.

The micro project could be Industry application based, internet based, workshop based, laboratory based or field based.

Each student have to maintain dated work diary consisting of individual contribution in the microproject work. He has to give seminar presentation of it before submission. The students ought to submit micro project by the end of the semester. Micro project report may be of four to five pages. Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

- **1.** Build Digital IC tester.
- 2. Build a circuit to implement 4 bit Binary adder.
- 3. Build a circuit to implement One Digit BCD adder.
- 4. Build a circuit to test 7-segment decoder.
- 5. Build a circuit for LED flasher.
- 6. Build a circuit for LED BAR display.
- 7. Design and analyze Digital Arithmetic circuits
- 8. Build Digital Thermometer.
- 9. Build Digital Object Counter.
- 10. Build Digital stopwatch.
- 11. Buid Digital water level controller for overhead tanks.
- 12. Build Decoration lights using LED's.
- 13. Build digital fan speed regulator.
- 14. Build a circuit for Home Automation Systems.

F) THEORY:

SECTION I

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluation (Marks) |
|------------|---|---------------------|---------------------------------|
| IEG : | 306-1 : Use number system and codes for interpreting working | of digital sy | vstem |

| 1 | Number system & codes 1.1 Decimal, binary, octal and hexadecimal number systems. 1.2 Decimal to binary and binary to decimal conversion. 1.3 Decimal to octal and octal to decimal conversion. 1.4 Decimal to hex and hex to decimal conversion. 1.5 Binary to hex and hex to binary conversion 1.6 Binary addition 1.7 Binary subtraction using 1's & 2's compliment 1.8 BCD addition & subtraction using 9's and 10's compliment. 1.9 ASCII code | 08 | 12 |
|-----|---|--------------|----|
| | IEG 306-2: Use Boolean expressions to realize logic circuits. | 1 | |
| 2 | Boolean Algebras. 2.1 Boolean Algebra. Fundamentals of Boolean laws 2.2 Basic gates and derived gates,Ex-OR and EX-NOR gates(symbols and truth tables & IC's). 2.3 De Morgan's Theorems.(upto 2 variables) 2.4 Sum of Product(SOP) and Product of Sum(POS) reduction methods. 2.5 Maxterm and Minterm, 2.6 Standard conversion between SOP and POS form 2.7 K – map reduction techniques (upto 4 variables only SOP equations) | 09 | 16 |
| IEG | 306-3: Analyze different Logic families & working of basic | logic gates. | |
| 3 | Digital Logic Families 3.1 Characteristics of logic families (fan in, fan out, propagation delay, power dissipation, noise margin) 3.2 TTL family: Circuit diagram & working of TTL NAND gate 3.3 CMOS family: a) Circuit diagram & working of CMOS inverter b) Circuit diagram & working of CMOS NAND & NOR gates(2 inputs) 3.6 Comparison of logic families TTL & CMOS. | 07 | 12 |

Section II

| Sr. No | Topics | Teaching hours | Marks |
|-----------|--|----------------|-----------|
| IEG | 306-4 : Build simple combinational circuits. | | |
| 4. | Combinational Logic Circuits 4.1 Full and half adder 4.2 Full adder using half adders 4.3 Parallel binary adder 4.4 Study of 4 bits binary adder IC 7483 4.5 One digit BCD adder using IC 7483 4.6 Half and full subtractor 4.7 Multiplexer, their uses in combinational Logic design, multiplexer tree. 4.8 Demultiplexers / decoders and their use in combinational logic design. 4.9 Study of IC's 74150 and 74154. 4.10 Study of decoder / drivers for 7-segment displays IC7447 4.11 Priority on adder IC 74147 | 10 | 16 |
| IEG | 4.11 Priority encoder IC 74147. 306-5 : Build simple sequential circuits | | |
| 5 | Sequential Logic Circuits 5.1 Circuit diagram, truth table and working of S-R flipflop, J-K, master-slave J-K, D and T flip-flop. 5.2 Race around condition in JK flip-flop. 5.3 Levels triggered and edge triggered flip-flop. 5.4 Specifications of edge triggered flipflop. 5.5 SISO,SIPO, PISO &PIPO modes of operation of Shift register. 5.6 4-bit Right & Left Shift register 5.7 Asynchronous/Ripple UP Counter (Mod-8,10 &12) 5.8 Ripple DOWN counter, UP/DOWN counter(3-bit). 5.9 Synchronous Counters UP counter (Mod-8 & Mod 10) 5.10 Study of IC's 7474, 7490, 74193, 74160, 7476, (logic Diagram and truth table only expected.) | . 10 | 16 |
| | IEG 306-6: Test data converters in digital electronics systetypes. | ems & identi | fy memory |
| 6. | Data converters and Memories 6.1 DAC Types – Weighted resistor method and R-2R method, specifications of DAC 6.2 ADC types, specifications, block diagram and working of Dual slope ADC and SAR ADC 6.3 Classification of memories 6.4 RAM- Static, Dynamic and Volatile, Nonvolatile 6.5 ROM – PROM, EPROM, EEPROM | 4 of | 8 |

| 6.6 Flash memory | | |
|------------------|----|----|
| Total | 48 | 80 |

Specification table for setting question paper for semester end theory examination:

| | | Distribution | of marks (Cogn | itive level- | | |
|-------|---------------------------------|--------------|----------------|-------------------|-----------|-------|
| Topic | Name of topic | wise) Course | | | Total | |
| No. | Traine of topic | Remember | Understand | Applica- -tion | Outcome | Marks |
| 1 | Number systems and codes | 4 | 4 | 4 | IEG 306-1 | 12 |
| 2 | Boolean algebra | 4 | 6 | 6 | IEG 306-2 | 16 |
| 3 | Digital logic families | 2 | 4 | 6 | IEG 306-3 | 12 |
| 4 | Combinational Logic Circuits | 2 | 6 | 8 | IEG 306-4 | 16 |

| 6 | Data converters and Memories | 2 | 2 | 4 | IEG 306-6 | 8 |
| TOTAL | | 16 | 28 | 36 | Total | 80 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR TERM WORK AND PRACTICAL EXAMINATION

m) Assessment Criteria:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per given criteria

| Domain | Particulars | Marks out of 25 |
|-------------|----------------------------|-----------------|
| Cognitive | Understanding | 05 |
| Cognitive | Application | 05 |
| Davahamatar | Operating Skills | 05 |
| Psychomotor | Drawing / drafting skills | 05 |
| Affective | Discipline and punctuality | 05 |
| | TOTAL | 25 |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per **Assessment Pro-forma III**.

n) Criteria for assessment at semester end practical exam:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. no | Criteria | Marks allotted |
|-----------|--------------------------------------|----------------|
| 1 | Preparedness for practical | 10 |
| 2 | Correct figures / diagrams | 10 |
| 3 | Observation tables | 10 |
| 4 | Result table / calculations / graphs | 10 |
| 5 | Safety / use of proper tools | 10 |
| | Total | 50 |

Assessment at semester end practical exam as per Pro-forma III

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

- 1. Lectures cum Discussions
- 2. Regular Home Assignments.
- 3. Laboratory work

4. Google meet or Zoom platforms.

| Marks | 20 | | 80 | 75E | 175 |

^{*} E-External Assessment *Assessment at semester end practical exam as per Pro-forma III.

RATIONALE:

The physical world is inherently analog, indicating that there is always need for analog circuitry. Today the growth of any industry is depending upon electronics to a great extent. Integrated circuit is one of the main components of electronics. This subject acquaints students with general analog principles and design methodologies using practical devices & application. It focus on process of learning about signal conditioning, signal generation, instrumentation, timing & control using various IC circuitry.

COMPETENCY:

Maintain electronics circuits consisting of Linear integrated circuits.

Cognitive : Interpret the operation of IC 741 & IC555 based circuits.

Psychomotor: Maintain and operate circuits based on IC 741 & IC555 for wide range of applications.

Affective: Attitude of i) Logic ii) accuracy iii) precision v) punctuality

COURSE OUTCOMES:

EIG307-1. Select the proper op-amp parameters for a given industrial application.

EIG307-2. Use various configuration of op-amp in electronics circuit.

EIG307-3 Examine and use linear and non-linear applications of op-amp.

EIG307-4 Maintain oscillators and multivibrators circuits using op-amp

EIG307-5 Illustrate operation of active filters and design various types of filters

EIG307-6 Examine operation of timer IC and its applications.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels:1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | | | Prog | gramme Ou | itcomes PO | s and PSC | Os | | |
|--|--|-----------------------------|---|-----------|--|-----------------------------------|-----------------------------------|-----|---|

| EIG307-6 | - | 2 | 1 | 2 | 2 | 1 | 3 | 3 | 2 |

PSO 1: Operate and Maintain: Competency to apply the concepts of Industrial Electronics in the operation and maintenance of engineering application systems.

PSO 2: Supervision and providing solution: Ability to supervise work and reach appropriate solution to simple practical problems in Industrial Electronics engineering industry.

CONTENT:

A) SUGGESTED PRACTICAL'S/EXERCISE

A.1 Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any 20 out of 25 experiments).

The following practical exercises shall be conducted on trainer kit/bread-board:-

| Sr No. | Title of Practical Exercise | Skills / Competencies to be developed | Course Outcome |
|-----------|--|--|-------------------|
| 1. | OP Amplifier IC 741 | i)Identify Pin out of IC 741.ii) Analyze features of IC 741.iii) Define electrical parameters of IC 741. | EIG 307-1 |
| 2. | Practical Parameter of Op-amp IC741 | i) Measure the differential input resistance, input offset voltage, output offset voltage and CMRR.ii) Compare measured values with Datasheet of IC741. | EIG 307-1 |

| 3. | Output voltage swing parameter of Op-amp IC741 | Measure Output voltage swing parameter of Op-amp IC741. | EIG 307-1 |
|-----|--|--|-----------|
| 4. | Inverting Amplifier using op-amp IC741 | i)Illustrate operation of Open loop and closed loop Inverting Amplifier ii)Measure and verify the output voltage for various gain for Close loop Inverting Amplifier | EIG 307-2 |
| 5. | Non Inv. Amplifier using op-amp IC741 | i)Illustrate operation of Open loop and closed loop Inverting Amplifier ii)Measure and verify the output voltage for various gain for Close loop Inverting Amplifier | EIG 307-2 |
| 6. | Inverting and Non- Inverting Adder using op-amp IC741 | i)Build the circuit as per circuit diagram ii)Measure and verify the output voltage for various combination of inputs for inverting and non-inverting adder. | EIG 307-2 |
| 7. | Subtractor using op-amp IC741 | i) Build the circuit as per circuit diagram ii) Measure and verify the output voltage for various combinations of inputs for Subtractor. | EIG 307-2 |
| 8. | Active Integrator using op-amp IC741 | i) Build the circuit as per circuit diagram ii) Verify and plot the output voltage for square wave, sine wave as a input | EIG 307-2 |
| 9. | Active Differentiator using op-amp IC741 | i) Build the circuit as per circuit diagram.ii) Verify and plot the output voltage for square wave, sine wave as a input | EIG 307-2 |
| 10. | Invering and Non- Inverting Zero Crossing Detector using op-amp IC741 | i) Build the circuit as per circuit diagram. ii) Measure output of Inverting ZCD iii) Measure output of Non-Inverting ZCD | EIG 307-3 |
| 11. | V-I Converter with Floating load using opamp IC741 | i) Build the circuit as per circuit diagram. ii)Measure output current for given i/p voltage iii) Compare theoretical and practical values. | EIG 307-3 |
| 12. | V-I Converter with grounded load using op- amp IC741 | i)Construct the circuit as per circuit diagram ii)Measure output current for given i/p voltage iii) Compare theoretical and practical values. | EIG 307-3 |
| 13. | I-V Converter using op- amp IC741 | i) Construct the circuit as per circuit diagram ii) Measure output voltage for given i/p current iii) Compare theoretical and practical values. | EIG 307-3 |
| 14. | Monostable multivibrator using Op- amp IC741 | i) Construct the circuit as per circuit diagram.ii) Verify and plot the output voltage for various RC combinations. | EIG 307-4 |
| 15. | Astable multivibrator using Op-amp IC741 | i) Construct the circuit as per circuit diagram.ii) Verify and plot the output voltage for various RC combination | EIG 307-4 |

| 16. | | i) Construct the circuit as per circuit | |
|-----|--|---|-----------|
| 10. | Triangular wave Generator using op-amp IC741 | diagram ii) Observe the square wave output at 1st opamp sixth pin. iii) Observe the triangular wave output at 2nd op-amp sixth pin. | EIG 307-4 |
| 17. | RC Phase Shift Oscillator using Op-amp IC741 | i) Construct the circuit as per circuit diagram.ii) Measure frequency of oscillation of RC Phase Shift oscillator. | EIG 307-4 |
| 18. | Wein Bridge Oscillator using Op-amp IC741 | i) Construct the circuit as per circuit diagramii) Measure frequency of oscillation of Wein Bridge Oscillator. | EIG 307-4 |
| 19. | Low pass filter using op-amp(1 st order) | i) Construct the circuit as per circuit diagram ii)Plot frequency Response of filters on semi log paper. iii)Measure and verify cut-off frequency of LPF. | EIG 307-5 |
| 20. | Low pass filter using op-amp(2 nd order) using Simulation Software | i) Construct the circuit as per circuit diagram ii)Record the readings & Plot frequency Response of filters on semi log paper. iii)Measure and verify cut-off frequency of LPF. | EIG 307-5 |
| 21. | High pass filter using op-amp(1 st order) | i) Construct the circuit as per circuit diagram ii) Record the readings & Plot frequency Response of filters on semi log paper. iii) Measure and verify cut-off frequency of HPF. | EIG 307-5 |
| 22. | High pass filter using op-amp(2 nd order) using Simulation Software | i) Construct the circuit as per circuit diagram ii) Record the readings & Plot frequency Response of filters on semi log paper. iii) Measure and verify cut-off frequency of HPF. | EIG 307-5 |
| 23. | Timer IC555 | i) Identify Pin out of IC 555 ii) List the features of IC 555. iii) Identify the specifications of IC555. | EIG 307-6 |
| 24. | Monostable multivibrator using IC555 | i) Construct the circuit as per circuit diagram.ii) Verify and plot the output voltage for various RC combinations.iii) Measure the Ton and Toff i.e duty cycle | EIG 307-6 |
| 25. | Astable multivibrator using IC555 | i) Construct the circuit as per circuit diagram. ii) Verify and plot the output voltage for various RC combination iii) Measure the Ton and Toff i.e duty cycle | EIG 307-6 |

A.2 Micro-project

Each student should allotted one microproject in the beginning of the semester. In 3rd and 4th semester the microprojects are group based (group of 3 students) and in 5th and 6th semesters it should be preferably individually undertaken. Each microproject should encompass two or more COs.

Each student have to maintain dated work diary consisting of individual contribution in the microproject work.

Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of microprojects is as follows:

- a) Build Instrumentation amplifier (IC LM324) for measuring of temperature using thermistor/RTD/Thermocouple.
- b) Build sound sensor circuit IC 741 and microphone
- c) Build Clamp switch using IC741
- d) Build shadow sensor circuit using IC741
- e) Develop tone generator using IC555
- f) Develop PWM LED Dimmer/Brightness control using IC55
- g) Simulate using Orcad capture software linear IC applications.

Note: Use general purpose PCB for making Microprojects.

B) THEORY:

SECTION I

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluation (Marks) |
|------------|---|---------------------|---------------------------------|
| 1 | EIG307-1.Select the proper op-amp parameters for a given in | ndustrial app | olication. |
| 1 | Basics Of Operational Amplifier | 06 | 12 |
| | 1.1 Differential amplifier-basics | | |
| | 1.2 Circuit Diagram and circuit description only: | | |
| | DIBO,DIUO,SIBO,SIUO | | |
| | 1.3 Block diagram of OP-Amp: | | |
| | 1.3.1 Input Stage | | |
| | 1.3.2 Intermediate Stage | | |
| | 1.3.3 Level Shifting Stage: Need and circuit diagram | | |
| | 1.3.4 Output Stage: Circuit Diagram | | |
| | 1.4 Op-Amp IC-741 pin diagram and function. | | |
| | 1.5 Equivalent Circuit, Circuit Symbols And | | |
| | Terminals | | |
| | 1.6 Ideal OP-AMP and transfer curve | | |
| | Electrical parameters of 741 | | |
| | 1.7 Input offset voltage, Input offset current, Input | | |
| | bias current, Differential input resistance, Input | | |
| | capacitance, Offset voltage adjustment range, Input | | |
| | voltage range, CMRR, SVRR, Large signal voltage | | |
| | gain, Output voltage swing, Output resistance, | | |
| | Output short circuit current, supply current, Power | | |

| | consumption, Slew rate. | | |
|----|--|---------------|------|
| | | | |
| | EIG307-2. Use various configuration of op-amp in elec | ctronics circ | uit. |
| 2. | Op-Amp Configuration and Feedback Amplifiers | 10 | 14 |
| | 2.1 Open Loop and closed loop configuration of op-amp comparison | 10 | |
| | 2.2 Virtual ground, virtual short concept. | | |
| | Circuit Diagram, operation, Equations and derivation | | |
| | for output for following:- | | |
| | 2.3 Open loop configuration – Inverting, Non-inverting | | |
| | 2.4 Close loop configuration – Inverting, non-inverting, | | |
| | 2.5 Voltage follower, Inverter (Sign changer) | | |
| | 2.6 Inverting and non-inverting configuration of Adders | | |
| | (summing amplifier, scaling Amplifier, averaging | | |
| | amplifier) | | |
| | 2.7 Subtractor | | |
| | 2.8 Basic and Practical Integrator | | |
| | 2.9 Basic and Practical Differentiator | | |
| | Numerical Examples on based on Inverting and Non- | | |
| | Inverting amplifier, adder and Substractor. | | |
| | EIG307-3 Examine and use linear and non-linear applic | ations of op- | amp. |
| 3 | Op-Amp. Applications | 0 8 | 14 |
| | (Circuit Diagram , Operation, Equation and | | |
| | applications) | | |
| | 3.1 Voltage comparator: | | |
| | 3.1.1 Inverting & non inverting comparator(transfer | | |
| | characteristics) | | |
| | 3.1.2 Zero crossing detector-Inverting & Non-inverting | | |
| | 3.1.3 Window comparators(Detector) | | |
| | 3.1.4 Inverting Schmitt Trigger | | |
| | 3.2 Voltage to current(V to I) converter with floating | | |
| | load and grounded load | | |
| | 3.3 Current to voltage (I to V) converter 3.4 Precision Rectifier: Half wave and Full Wave | | |
| | | | |
| | 3.5 Three op amp Instrumentation amplifier | | |
| | Circuit diagram, operation, advantages& | | |
| | application. Sub-Total | 24 | 40 |
| | Sub-10tal | 24 | 40 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

SECTION II

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluation (Marks) |
|------------|---|---------------------|---------------------------------|

|------------|---|---------------------|---------------------------------|
| | 6.5 Application of IC555 as Water level controller, VCO and Schmitt Trigger | | |
| | Sub-Total | 24 | 40 |
| | Total | 48 | 80 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

Specification table for setting question paper for semester end theory examination:

| Topic | Name of topic | Distribution of marks (Cognitive level-wise) | | | Course Outcome | Total |
|-------|--------------------------------------|--|------------|-------------|-------------------|-------|
| No. | rume of topic | Remember | Understand | Application | | Marks |
| 1 | Basics Of Operational Amplifier | 02 | 04 | 06 | EIG307-1 | 12 |
| 2 | Op-Amp Configuration &f/b amplifiers | 04 | 04 | 06 | EIG307-2 | 14 |
| 3 | Op-Amp Applications | 04 | 04 | 06 | EIG307-3 | 14 |
| 4 | Waveform Generators | 04 | 04 | 06 | EIG307-4 | 12 |
| 5 | Active filters | 04 | 06 | 06 | EIG307-5 | 14 |
| 6 | Timer IC's | 02 | 04 | 04 | EIG307-6 | 10 |
| | Total >> | 20 | 26 | 34 | | 80 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

a) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain | Particulars | Marks out of 25 |
|-------------|---------------------------------------|-----------------|
| Cognitive | Technical preparedness for practical | 05 |
| Psychomotor | Operating skills/Algorithm/ flowchart | 05 |
| | Observation/Logic/ Program/Result | 05 |
| A ffe etime | Discipline and punctuality | 05 |
| Affective | Procedure/ Safety | 05 |

| Measures/ Decency/ Presentation | |
|------------------------------------|----|
| TOTAL | 25 |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment Pro-forma X*.

| Sr. No. | Criteria | Marks allotted |
|------------|--|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algorithm/ Flowchart/ Program | 05 |
| 2 | Procedure followed to achieve the result | 05 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs, workmanship and Safety measures | 05 |
| 5 | Oral Based on Test | 05 |
| | Total | 25 |

^{*}Final marks of practical assignments shall be awarded as per Assessment Pro-forma III.

b) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. No | Criteria | Marks allotted |
|-----------|--|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algorithm/ Flowchart/ Program | 10 |
| 2 | Procedure followed to achieve the result | 10 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 10 |
| 4 | Proper Graphs, workmanship and Safety measures | 10 |
| 5 | Oral | 10 |
| | Total | 50 |

^{*}Assessment at semester end practical exam as per Pro-forma III.

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

- 1. Online/Offline Lectures cum Discussions
- 2. Regular home assignments
- 3. Laboratory work

Teaching and Learning Resources:

1. Chalk board 2. Video clips 3.PPTs 4. Question Bank 5. Charts **REFERENCE MATERIAL**:

a) Books / Codes

| Sr. No. | Author | Title | Publisher |

^{*} I-Internal Assessment *Assessment at semester end practical exam as per Pro-forma IV

RATIONALE:

Basic circuit theory is the foundation of electronics engineering and technology. The development of all engineering topics requires good understanding of fundamental principles in circuit theory, further studying of which develops scientific methodology in the circuit analysis and technical aptitudes in the students. A good foundation in circuit theory is essential for self-development in future to cope up with the innovations and advancement in technology through self-study.

This course is designed in such a way that, the students will able to apply knowledge to solve electronics engineering applications.

COMPETENCY:

Analyze various circuits and networks for different engineering applications predict circuit responses. Cognitive: Understanding circuit behavior.

Psychomotor: Determining circuit responses using various network theorems.

Affective: Attitude of i) Logic ii) Accuracy iii) Precision iv) Test

COURSE OUTCOMES:

EIG 308-1 Apply different rules and laws for circuit analysis.

EIG 308 -2Differentiate series and parallel circuits.

EIG 308 -3 Predict circuit responses using network theorems.

EIG 308 -4 Design RC circuits

EIG 308-5 Analyze output of resonant circuits.

EIG 308-6 Select appropriate filters as per requirement

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels:1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

A.1 Suggested Practical's/ Exercise

Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any 10 experiments). Experiments numbered from 13 onwards can be performed or demonstrated by using simulation software.

| Sr No | Title of Practical Exercise | Skills / Competencies to be Developed | Course Outcome |
|----------|--|--|-------------------|
| 1 | Verify series and parallel combination formulae of resistors | 1)Tracing and Connection of circuit2)Calculation of parameters3)Formulation of result | EIG 308- 2 |
| 2 | Verification of Ohm's law | Tracing and Connection of circuit Calculation of parameters Formulation of result Plotting of graph | EIG 308- |
| 3 | Verification of KVL | 1.Tracing and Connection of circuit 2.Calculation of parameters 3 .Formulation of result | EIG 308- 1 |
| 4 | Verification of KCL | 1.Tracing and Connection of circuit | EIG 308- |

| | | 2.Calculation of parameters 3.Formulation of result | 2 |
|----|--|--|---------------|
| 5 | Verify Superposition Theorem | 1.Tracing and Connection of circuit 2.Calculation of parameters 3.Formulation of result | EIG 308- |
| 6 | Verify Thevenin's theorem | 1.Tracing and Connection of circuit 2.Calculation of parameters 3.Formulation of result | EIG 308- |
| 7 | Verify Maximum Power Transfer theorem | 1.Tracing and Connection of circuit 2.Calculation of parameters 3.Formulation of result | EIG 308- |
| 8 | Verify Norton's theorem | 1.Tracing and Connection of circuit 2.Calculation of parameters 3.Formulation of result | EIG 308- |
| 9 | Analysis of simple RC circuit | 1.Tracing and Connection of circuit 2.Calculation of parameters 3.Formulation of result | EIG 308- |
| 10 | Analysis of simple RLC circuit | 1.Tracing and Connection of circuit 2.Calculation of parameters 3.Formulation of result | EIG 308- 5 |
| 11 | Frequency response of Low Pass Filter | 1.Tracing and Connection of circuit2.Calculation of parameters3.Formulation of result4.Plotting of graph on semilog paper | EIG308- 6 |
| 12 | Frequency response of High Pass Filter | 1.Tracing and Connection of circuit2.Calculation of parameters3.Formulation of result4.Plotting of graph on semilog paper | EIG308- 6 |
| 13 | Verification of equivalent resistance formulae using simulation software | 1.Build circuit in relevant software 2.Check equivalent resistance | EIG 308- 2 |
| 14 | Verification of KVL using simulation software | 1.Build circuit in relevant software 2.Verify KVL | EIG 308- |
| 15 | Verification of KCL using simulation software | 1.Build circuit in relevant software 2. Verify KCL | EIG 308- |

A.2 Micro-project

Each student should allotted one microproject in the beginning of the semester. In 2^{nd} , 3^{rd} and 4^{th} semester the microprojects are group based (group of 3 students) and in 5^{th} and 6^{th} semesters it should be preferably individualy undertaken. Each microproject should encompass two or more COs.

Each student have to maintain dated work diary consisting of individual contribution in the microproject work.

Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of microprojects is as follows:

a) Verification of KVL(Build given circuit on PCB and verify Law)

- b) Verification of KCL(Build given circuit on PCB and verify Law)
- c) Principles of circuit analysis (Prepare power point presentation on source transformation, mesh analysis, nodal analysis and present it in classroom)
- d) Superposition Theorem (Select proper components for given circuit and build it on PCB and verify theorem theoretically and practically)
- e)Theremin's Theorem (Select proper components for given circuit and build it on PCB and verify theorem theoretically and practically)
- f)Norton's Theorem(Select proper components for given circuit and build it on PCB and verify theorem theoretically and practically)
- g) Maximum power transfer theorem (Select proper components for given circuit and build it on PCB and verify theorem theoretically and practically)
- h) Resonance circuit (Build series RLC resonance circuit on PCB and tuned it to resonance condition and find out quality factor and bandwidth)
- i)Resonance circuit(Build parallel RLC resonance circuit on PCB and tuned it to resonance condition and find out quality factor and bandwidth)
- j) Low pass filter (Build RC low pass filter for given cut off frequency on PCB and draw its response on semilog paper)
- k) High pass filter (Build RC high pass filter for given cut off frequency on PCB and draw its response on semilog paper)

C. THEORY:

SECTION-I

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluation (Marks) |

| 6 | Passive Filters | 02 | 06 | 08 | EIG308-6 | 16 | | |
| | Total >> | 12 | 26 | 42 | | 80 | | |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

o) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain | Particulars | Marks out of 25 | | |
|-------------|---|-----------------|--|--|
| Cognitive | Technical preparedness for practical | 05 | | |
| Dayahamatar | Operating skills/ Algorithm/ flowchart | 05 | | |
| Psychomotor | Observation/ Logic/ Program/ Result | 05 | | |
| | Discipline and punctuality | 05 | | |
| Affective | Procedure/ Safety Measures/ Decency/ Presentation | 05 | | |
| | TOTAL | | | |

ii) Progressive Skill Test:

One mid-term Progressive Skill Test of 25 marks shall be conducted as per criteria given

.

| Sr. No. | Criteria | Marks allotted |
|------------|--|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algorithm/ Flowchart/ Program | 05 |
| 2 | Observations, Result, Output | 05 |
| 3 | Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs & Procedure / workmanship and Safety measures | 05 |
| 5 | Oral Based on Term Work | 05 |
| | Total | 25 |

^{*}Final marks of practical assignments shall be awarded as per Assessment Pro-forma IV.

p) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. no | Criteria | Marks allotted | |
|-----------|-------------------|----------------|--|
| 1 | Technical ability | 10 | |

| 2 | Correct figures / diagrams/ Logic | 10 |
|---|---|----|
| 3 | Observation table/ Algorithm/ flowchart/ Program | 10 |
| 4 | Correctness of - Result / Output / Calculations / Graphs | 10 |
| 5 | Safety / Use of proper tools / overall Decency & Presentation / Workmanship | 10 |
| | Total | 50 |

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

1.Online or offline Lectures cum Discussions 2. Regular Home Assignments. 3. Laboratory work

Teaching and Learning Resources:

1. Chalk and board

2. Video clips

3.PPT

4. question Bank

REFERENCE MATERIAL:

a) Books / Journals / IS Codes

| Sr. No. | Author | Title | Publisher |

COURSE ID:

Course Name : MICROCONTROLLERS

Course Code : EIG 309
Course Abbreviation : GMCS

TEACHING AND EVALUATION SCHEME:

Pre-requisite Course(s) : EIG 306

Teaching Scheme:

| Scheme component | Hours / week | Credits |
|------------------|--------------|---------|
| Theory | 03 | 07 |
| Practical | 04 | 07 |

Evaluation Scheme:

| | Progressiv | e Assessment | Te | rm End | |
|--------------------------|--|--|----------------------|--|-------|
| Mode of Evaluation | Theory | Practical | Theory | Practical * & Micro-project ** | Total |
| Details of Evaluation | Average of two tests of 20 marks | (i) 25 marks for each practical (ii)One PST of 25 marks | Theory exam (3hours) | Term End Practical Exam (03 hours) | |
| Marks | 20 | | 80 | 75E | 175 |

^{*} E-External Assessment *Assessment at semester end practical exam as per Pro-forma III.

RATIONALE:

A microcontroller is the sole of all embedded electronic types of equipment and is used in most areas of electrical/electronics where automation and monitoring are needed. They include product lines ranging from small consumer electronic products to sophisticated industrial process controllers. A diploma engineer needs to maintain such systems. Programming practices will further enhance students' ability to develop local applications based on microcontrollers. Hence this course is designed to address the above.

COMPETENCY:

The course content should be taught and implemented with the aim to develop different types of skills so that students are able to acquire following competency:

Maintain microcontroller based equipment's/system.

Cognitive: Understand assembly language programming and peripheral interfacing

Psychomotor: Write assembly language programs for wide range of applications. **Affective:** Attitude of i) Logical thinking ability ii) System hardware design skills.

COURSE OUTCOMES:

EIG 309-1: Interpret prominent features of different kinds of microcontrollers.

EIG 309-2: Interpret the salient architectural features of 8051 microcontroller

EIG 309-3: Develop and maintain assembly language program for different operations

EIG 309-4: Interface and program different I/O devices with 8051 in assembly

EIG 309-5: Maintain different 8051 based applications

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | | | Prog | gramme Ou | itcomes PO | s and PSC | Os | | |
|--------------------------|--|-----------------------------|---|-----------|--|-----------------------------------|-----------------------------------|-----|---|
| Competency and Cos | PO 1 Basic and Discipline specific knowledge | PO 2 Problem Analysis | PO 3 Design / Development of solutions | | PO 5 Engineering Practices for society, sustainability and Environment | PO 6 Project Manageme nt | PO 7 Life- long Learning | and | PSO2 Supervision and Providing Solution |
| Competency: Maintain | | | | | | | | | |

| EIG 309-5 | 1 | 2 | - | - | - | - | - | 3 | 3 |

PSO 1: Operate and Maintain: Competency to apply the concepts of Industrial Electronics in the operation and maintenance of engineering application systems.

PSO 2: Supervision and providing solution: Ability to supervise work and reach appropriate solution to simple practical problems in Industrial Electronics engineering industry.

CONTENT:

G) SUGGESTED PRACTICAL'S/EXERCISE

A.1 Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any 20 out of 25 experiments).

| Sr No. | Title of Practical Exercise | Skills / Competencies to be Developed | Course Outcome |
|-----------|---|---|-------------------|
| 1 | Interpret details of Hardware kit for Microcontroller and practice to write and execute programs. | 3) Identify each block of Hardware kit.4) Understand the use and operating procedure of 8051 Hardware kit. | EIG309-1 |
| 2 | Identify different menus available in compiler software KEIL and demonstrate their use. | 1) Use KEIL compiler software for assembly language programming 8051microcontroller | EIG309-2 |

| | | 2) Understand the useful menus available in KEIL for 8051 | |
|----|---|---|----------------|
| 3 | Develop and execute Assembly language programs using Arithmetic Instructions and demonstrate outcome for a given input data | Microcontroller programming 1) Acquire Logical thinking ability 2) Identify the suitable instructions for the given problem 3) Writing, Compiling, debugging, and execution of program | EIG309-3 |
| 4 | Develop and execute Assembly language programs using Logical Instructions and demonstrate outcome for a given input | Acquire Logical thinking ability Identify the suitable instructions for the given problem Writing, Compiling, debugging, and execution of program | EIG309-3 |
| 5 | Develop and execute an Assembly language program for Addition of series of 8 bit nos, 16 bit result and demonstrate outcome for a given input data | Acquire Logical thinking ability Identify the suitable instructions for the given problem Writing, Compiling, debugging, and execution of program | EIG309-3 |
| 6 | Develop and execute Assembly language program for addition/subtraction of 16 bit no/multibyte nos. and demonstrate outcome for a given input data | Acquire Logical thinking ability Identify the suitable instructions for the given problem Writing, Compiling, debugging, and execution of program | EIG309-3 |
| 7 | Develop and execute Assembly language program for Block transfer from and to Internal/External memory using directives and demonstrate outcome for a given input data | Acquire Logical thinking ability Identify the suitable instructions for the given problem Writing, Compiling, debugging, and execution of program | EIG309-3 |
| 8 | Develop and execute Assembly language program Largest/smallest of given series of no. from Internal/External memory and demonstrate outcome for a given input data. | Acquire Logical thinking ability Identify the suitable instructions for the given problem Writing, Compiling, debugging, and execution of program | EIG309-3 |
| 9 | Develop and execute Assembly language program arrange no in ascending/descending order from Internal/External memory and demonstrate outcome for a given input data. | Acquire Logical thinking ability Identify the suitable instructions for the given problem Writing, Compiling, debugging, and execution of program | EIG309-3 |
| 10 | Develop and execute Assembly language program to interface LED with 8051 microcontroller and turn it on of using switch | Acquire Logical thinking ability Interfacing LED and switch with 8051 MC Identify the suitable instructions for the given problem Writing, Compiling, debugging, and execution of program | EIG309- 3,4 |
| 11 | Develop and execute Assembly language | 1) Acquire Logical thinking ability | EIG309- |

| | program for LED blinking/LED sequences using delay/timer mode. | 2) Interfacing LED with 8051 MC 3) Identify the suitable instructions for the given problem 4) Writing, Compiling, debugging, | 3,4 |
|----|--|--|------------------|
| 12 | Develop and execute Assembly language program for seven segment display to display 0 to 9 decimal number. | and execution of program 1) Acquire Logical thinking ability 2) Interfacing seven segment display with 8051 MC 3) Identify the suitable instructions for the given problem 4) Writing, Compiling, debugging, and execution of program | EIG309- 3,4 |
| 13 | Develop and execute Assembly language program to generate square wave of 5ms at P1.0 using timer delay. | Acquire Logical thinking ability Identify the suitable instructions for the given problem Writing, Compiling, debugging, and execution of program | EIG309- 3,4 |
| 14 | Develop and execute Assembly language program to count external events using counter mode. | Acquire Logical thinking ability Identify the suitable instructions for the given problem Writing, Compiling, debugging, and execution of program | EIG309- 3,4 |
| 15 | Interface Relay with microcontroller and Turn it On and Off after every 1s using Timer. | Acquire Logical thinking ability Interfacing Relay with 8051 MC Identify the suitable instructions for the given problem Writing, Compiling, debugging, and execution of program | EIG309- 3,4 |
| 16 | Develop and execute Assembly language program to transfer 8 bit data serially on serial port | 1) Acquire Logical thinking ability 2) Identify the suitable instructions for the given problem 3) Writing, Compiling, debugging, and execution of program | EIG309- 3,4 |
| 17 | Develop and execute Assembly language program to interface LED with microcontroller and turn it On and Off using microcontroller Interrupt | Acquire Logical thinking ability Interfacing LED with 8051 MC Identify the suitable instructions for the given problem Writing, Compiling, debugging, and execution of program | EIG309- 3,4 |
| 18 | Interface LCD with 8051 microcontroller to print some welcome message on it. | Acquire Logical thinking ability Interface LCD with 8051 MC Identify the suitable instructions for the given problem Writing, Compiling, debugging, and execution of program | EIG309- 3,4,5 |
| 19 | Develop a 4 bit binary counter with 8051 and display output count on LCD | Acquire Logical thinking ability Interface LCD with 8051 MC Identify the suitable instructions for the given problem | EIG309- 3,4,5 |

| | | 4) Writing, Compiling, debugging, and execution of program | |
|----|---|---|------------------|
| 20 | Interface the given Key board with 8051 and display the key pressed. | Acquire Logical thinking ability Interface 4x4 keypad with 8051 MC Identify the suitable instructions for the given problem Writing, Compiling, debugging, and execution of program | EIG309- 3,4,5 |
| 21 | Interface ADC with 8051 and verify input and output. | Acquire Logical thinking ability Interface ADC with 8051 MC Identify the suitable instructions for the given problem Writing, Compiling, debugging, and execution of program | EIG309- 3,4,5 |
| 22 | Interface DAC with 8051 and observe following waveform: square wave, triangular wave, saw-tooth wave. | Acquire Logical thinking ability Interface DAC with 8051 MC Identify the suitable instructions for the given problem Writing, Compiling, debugging, and execution of program | EIG309- 3,4,5 |
| 23 | Develop a program to interface a DC Motor with 8051 | Acquire Logical thinking ability Interface DC motor using motor driver to 8051 MC Identify the suitable instructions for the given problem Writing, Compiling, debugging, and execution of program | EIG309- 3,4,5 |
| 24 | Develop a program to interface a Stepper Motor with 8051 | 1) Acquire Logical thinking ability 2) Interface Stepper motor using Motor driver to 8051 MC 3) Identify the suitable instructions for the given problem 4) Writing, Compiling, debugging, and execution of program | EIG309- 3,4,5 |
| 25 | Interface 8051 with external memory | Acquire Logical thinking ability Interface external RAM to 8051 MC Identify the suitable instructions for the given problem Writing, Compiling, debugging, and execution of program | EIG309- 3,4,5 |

A.2 Micro-project

Each student should allotted one microproject in the beginning of the semester. In 3rd and 4th semester the microprojects are group based (group of 3 students) and in 5th and 6th semesters it should be preferably individually undertaken. Each microproject should encompass two or more COs. Each student have to maintain dated work diary consisting of individual contribution in the microproject work. Microproject term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of microprojects is as follows:

- a) Prepare a chart of various features using data sheets of 8051 microcontroller and its derivaives
- b) Prepare chart for stepper motor to display its features and steps for its operations using data sheets
- c) Prepare a chart of various types of LCDs to display its features, pin functions and step of operations using data sheet
- **d)** Build a circuit to turn the buzzer ON after 10 seconds
- e) Build a classperiod bell using a microcontroller
- f) Build a stepper motor controller using microcontroller
- g) Build a traffic light controller for specific delay
- **h**) Build a water level controller for given parameters.
- i) Build a Tempareture controller for given parameters.
- j) 4 Channel Quiz Buzzer using 8051 Microcontroller
- k) <u>Digital Voltmeter using 8051 Microcontroller</u>

H) THEORY:

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

q) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain | Particulars | Marks out of 25 |
|--|---|-----------------|
| Cognitive Technical preparedness for practical | | 05 |
| Davahamatan | Operating skills/Algorithm/ flowchart | 05 |
| Psychomotor | Observation/Logic/ Program/Result | 05 |
| | Discipline and punctuality | 05 |
| Affective | Procedure/ Safety Measures/ Decency/ Presentation | 05 |
| | TOTAL | 25 |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment Pro-forma X*.

| Sr. No. | Criteria | Marks allotted |
|------------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algoritm/ Flowchart/ Program | 05 |
| 2 | Procedure followed to achieve the result | 05 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs, workmanship and Safety measures | 05 |
| 5 | Oral Based on Test | 05 |
| | Total | 25 |

^{*}Final marks of practical assignments shall be awarded as per Assessment Pro-forma III

r) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. No | Criteria | Marks allotted |
|-----------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algoritm/ Flowchart/ Program | 10 |
| 2 | Procedure followed to achieve the result | 10 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 10 |
| 4 | Proper Graphs, workmanship and Safety measures | 10 |
| 5 | Oral | 10 |
| | Total | 50 |

^{*}Assessment at semester end practical exam as per Pro-forma III

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

- 1. Online/Offline Lectures cum Discussions
- 2. Regular home assignments
- 3. Laboratory work

Teaching and Learning Resources:

1. Chalk board 2. Video clips 3.PPTs 4. Question Bank 5. Charts

^{*}I-Internal Assessment

RATIONALE:

Electronics diploma holders have to operate electrical machines and control their speed, power factor, efficiency, torque, etc. This course aims to arm the students with the basic required knowledge in respect of operating various DC and AC machines.

COMPETENCY:

Use appropriate electrical machines in industrial applications.

Cognitive: i) Understanding and applying principles of working of electrical machines by

ii) Observing iii) Classifying iv) Interpreting

Psychomotor: Handling electrical machines and tools.

Affective: Skill of i) working in team ii) curiosity, interest and self-confidence

COURSE OUTCOMES:

IEG 310-1 Use DC machines in industrial applications.

IEG 310-2 Select transformers relevantly and use them in industrial applications.

IEG 310-3. Select relevant single phase induction motors and use them in industrial applications

IEG 310-4. Use appropriate alternators as per requirement

IEG 310-5. Select three phase induction motors relevantly and use them in industrial applications

IEG 310-6 Select the relevant special motors for industrial application

^{*} Assessment as per Pro-forma II.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

I) SUGGESTED PRACTICAL'S/EXERCISE

A.1 Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any 'X' experiments).

| Sr. No. | Title of Practical Exercise | Skills / Competencies to be Developed | Course Outcome |
|------------|--|---|-------------------|
| 01. | Dismantle a DC machine. | Identify parts of the machine. List the D.C. Machines in the laboratory. | IEG 310-1 |
| 02. | To perform load test on D.C.shunt motor | 1.Power stages in a D.C.machines | IEG 310-1 |
| 03 | To study the starting and reversal a of D.C.Shunt Motor | 1. Working principle of d.c.motor 2. Interaction of fields and resultant fields. | IEG310-1 |
| 04 | Three point starter of DC shunt motor | 1. Connect the starter and run the machine | IEG310-1 |
| 117 | 0 0 1 | Identify parts of the single phase transformer | IEG310-2 |
| | To verify the transformation ratio of single phase transformer | 1. Connect as per circuit diagram2.To observe the working principle of transformer | IEG310-2 |

| | Perform direct load test on 1 ph transformer to find efficiency and voltage regulation regulation. | Connect as per circuit diagram. Observe the voltage drops in transformer | IEG310-2 |
|----|--|---|----------|
| 08 | Check the functioning of isolation transformer. | Identify parts of the isolation transformer | IEG310-2 |
| 09 | Test the pulse transformer | To connect as per circuit | IEG310-2 |
| 10 | Construction of single induction motor | 1. Identify parts of the machine | IEG310-3 |
| 11 | To perform load test on single phase induction motor. | 1.Perform the test and provide conclusion | IEG310-3 |
| 12 | Relation between line and phase values of voltages and current in star and delta. | 1.To connect as per circuit | IEG310-4 |
| 13 | Dismantle of 3phase Induction Motor | 1.Identify parts of the machine | IEG310-5 |
| 14 | Reversal of rotation of 3 ph Induction Motor. | To connect as per circuit diagram To observe the direction of rotation To conclude from the method | IEG310-5 |
| 15 | To measure the slip of three phase induction motor by tachometer method | Production of rotating magnetic field. Lens law Principle of operation of three phase induction motor | IEG310-5 |
| 16 | Starters for Induction motors. a) DOL Starter b) 3-Phase Auto-transformer starter c) Rotor Resistance starter | To show all starters. To draw circuit diagram of all starters To connect all types of starters | IEG310-5 |
| 17 | Construction of stepper Motor. | Identify parts of the machine | IEG310-6 |
| 18 | Study of servo motor | Identify parts of the machine | IEG310-6 |

A.2 Micro-project

Each student should allotted one micro project in the beginning of the semester. In 2nd and 4th semester the micro projects are group based (group of 3 students) and in 5th and 6th semesters it should be preferably individually undertaken. Each micro project should encompass two or more COs. Each student have to maintain dated work diary consisting of individual contribution in the micro project work.

Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of micro projects is as follows:

- a. Prepare a report on different market survey of D.C.Machines
- b. Prepare a chart of different industrial applications of D.C.Machines
- c. Prepare a power point presentation related to D.C.Machines

- d. Prepare a power point presentation related to single phase transformer
- e. Prepare charts for construction of various AC motors.
 - f. Compare various AC motors according to its applications.
 - g. Prepare/Download a dynamic animation to illustrate the following:
 - Working principle of 3 phase induction motor
 - Working principle of 3 phase alternator
 - Working of different types of 3 phase induction motor starters
 - h. Carry out a market survey of local dealers for 1-phase Induction motor and compare them on following points:
 - i)Rating ii) Method of starting iii) Cost iv) Starting torque and v) Performance
 - i. Download the catalogue of three phase induction motor, Synchronous motor and alternator from websites of reputed manufacturers such as BHEL, SIMENS, CROMPTON, JYOTI, ABB, VOLTAS etc. to learn the latest Developments
 - j. Identify the different Electrical machines working in any kind of Industry. Make a survey of all electrical AC machine and prepare a report on it.
 - j. Prepare a drawing sheet for construction, working and application of single phase induction motor.
 - k. Prepare demo model of single phase alternator/motor
 - 1. Prepare a report on market survey on special motors.

B. THEORY:

Section I

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluation (Marks) |
|---------|---|---------------------|---------------------------------|

| | slip ring induction | | |
| | IEG310-6 Select the relevant special motors for indus | strial appli | cations |
| 6 | Special Motors | 09 | 14 |
| | 6.1 Unidirectional and bi-directional stepper motor | | |
| | 6.2 Permanent magnet stepper motor with 2 phase | | |
| | winding | | |
| | 6.3 Variable reluctance stepper motor | | |
| | 6.4 D.C. Servo Motor | | |
| | 6.5 A.C Servo Motors :Single Phase, Two Phase & | | |
| | Drag cup servo motor | | |
| | Construction, working principle, Characteristics, | | |
| | applications | | |
| | TOTAL | 24 | 40 |
| | Semester end exam question paper should be such that total marks of | | |
| | half times the marks allotted above but the candidates are able to atte | empt question | is of the above allotted |

Specification table for setting question paper for semester end theory examination :

| Section / | Name of topic | Distributi | Course | Total | | |
|-----------|---------------------------------|------------|------------|-------------|-----------|-------|
| Topic no. | | Remember | Understand | Application | Outcome | marks |
| I / 1 | D. C. Machines | 02 | 02 | 04 | IEG 310-1 | 08 |
| I / 2 | Transformer | 04 | 04 | 08 | IEG 310-2 | 16 |
| I / 3 | Single Phase Induction Motor | 04 | 04 | 08 | IEG 310-3 | 16 |
| II / 4 | Three Phase Alternator | 06 | 06 | - | IEG 310-4 | 12 |
| II / 5 | Three Phase induction | 04 | 04 | 08 | IEG 310-5 | 16 |
| II/6 | Special Motor | 06 | 06 | 1 | IEG 310-6 | 12 |
| | Total | 26 | 26 | 28 | | 80 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

s) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain | Particulars | | | Marks out of 25 |
|-----------|--------------------|--------------|-----|-----------------|
| Cognitive | Technical | preparedness | for | 05 |

| | practical | |
|-------------|-------------------------------|----|
| | Operating | 05 |
| Davahamatan | skills/Algorithm/flowchart | 05 |
| Psychomotor | Observation/ Logic/ | 05 |
| | Program/Result | 03 |
| | Discipline and punctuality | 05 |
| Affective | Procedure/Safety | 05 |
| | Measures/Decency/Presentation | 03 |
| TOTAL | | 25 |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment Pro-forma X*.

| Sr. No. | Criteria | Marks allotted |
|------------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/Algorithm/Flowchart/Program | 05 |
| 2 | Observations, Result, Output | 05 |
| 3 | Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs & Procedure / workmanship and Safety measures | 05 |
| 5 | Oral Based on Term Work | 05 |
| | Total | 25 |

t) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. no | Criteria | Marks allotted |
|-----------|---|----------------|
| 1 | Technical ability | 05 |
| 2 | Correct figures / diagrams/ Logic | 05 |
| 3 | Observation table/Algorithm/flowchart/Program | 05 |
| 4 | Correctness of - Result / Output/ Calculations / Graphs | 05 |
| 5 | Safety / Use of proper tools / overall Decency &Presentation/ Workmanship | 05 |
| | Total | 25 |

^{*} I-Internal Assessment *Assessment at semester end practical exam as per Pro-forma IV.

RATIONALE:

Industry expects a Diploma Engineer (technologist) to use modern day Electronic Design Automation (EDA) tools for analyzing, designing, and real time testing of analog, digital, and mixed electronic circuits and their PCB layouts. These operations are useful in developing, fabricating and testing new prototype circuits. Using basic features of EDA tool prepares student for learning advanced aspects of the modern EDA tool such as MATLAB, SCILAB and Orcad Capture using the simulation software for design of complex circuits.

EDA tool such as MATLAB, SCILAB and Orcad Capture etc are very powerful mathematical computation and electronic circuit design, simulation, and analysis tools. If an engineering problem can be solved using software tool, it is usually more efficient to use the software tool than to write a program in a computer language to solve the problem.

COMPETENCY:

Design and simulate various electronic circuits using software tool.

Cognitive: Understand applications of MATLAB, SCILAB and OrCAD tool.

Psychomotor: Write embedded C programs for wide range of applications.

Affective: Analyze and simulate electronic circuits

COURSE OUTCOMES:

EIG401-1 Identify and use different application tools of Matlab/Scilab.

EIG401-2 Use and write Matlab/Scilab programs using various function as per requirements.

EIG401-3 Build various models in simulink as per industry requirements.

EIG401-4 Identify and use different application tools of OrCAD.

EIG401-5 Design, Simulate and create PCB layout of electronic circuits.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | Programme Outcomes POs and PSOs | | | | | | | | |
|--|--|-----------------------------|---|---|--|-----------------------------------|------|------------------------------------|---|
| Competency and Cos | PO 1 Basic and Discipline specific knowledge | PO 2 Problem Analysis | PO 3 Design / Development of solutions | | PO 5 Engineering Practices for society, sustainability and Environment | PO 6 Project Manageme nt | iong | PSO1 Operate and Maintain | PSO2 Supervision and Providing Solution |
| Competency: Design and simulate various electronic circuits using software tool. | 1 | 2 | 3 | 2 | 1 | 2 | 3 | 2 | 2 |

| | | calculate frequency of oscillations. | |

A.2 Micro-project

Each student should allotted one microproject in the beginning of the semester. In 3^{rd} and 4^{th} semester the microprojects are group based (group of 3 students) and in 5^{th} and 6^{th} semesters it should be preferably individualy undertaken. Each microproject should encompass two or more COs.

Each student has to maintain dated work diary consisting of individual contribution in the microproject work.

Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of microprojects is as follows:

- a) Build the Digital IC tester circuit.
- b) Build 4 bit parity generator and parity checker circuit.
- c) Build a circuit to implement 4-bit adder.
- d) Build a circuit to test 7 segment displays.
- e) Build a circuit for LED flasher.
- f) Design and analyze digital arithmetic circuit.

B) **THEORY:**

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

a) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain | Particulars | Marks out of 25 |
|--|---|-----------------|
| Cognitive Technical preparedness practical | | 05 |
| Develometer | Operating skills/Algorithm/ flowchart | 05 |
| Psychomotor | Observation/Logic/ Program/Result | 05 |
| | Discipline and punctuality | 05 |
| Affective | Procedure/ Safety Measures/ Decency/ Presentation | 05 |
| | 25 | |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment Pro-forma IV*.

| Sr. No. | Criteria | Marks allotted |
|------------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algoritm/ Flowchart/ Program | 05 |
| 2 | Procedure followed to achieve the result | 05 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs, workmanship and Safety measures | 05 |
| 5 | Oral Based on Test | 05 |
| | Total | 25 |

^{*}Final marks of practical assignments shall be awarded as per Assessment Pro-forma IV.

b) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. No | Criteria | Marks allotted |
|-----------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algoritm/ Flowchart/ Program | 10 |
| 2 | Procedure followed to achieve the result | 10 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 10 |
| 4 | Proper Graphs, workmanship and Safety measures | 10 |
| 5 | Oral | 10 |
| | Total | 50 |

^{*}Assessment at semester end practical exam as per Pro-forma IV.

COURSE ID:

Course Name : EMBEDDED SYSTEM

Course Code : EIG402

Course Abbreviation : GEMS

TEACHING AND EVALUATION SCHEME:

Pre-requisite Course(s) : EIG309

Teaching Scheme:

| Scheme component | Hours / week | Credits |
|------------------|--------------|---------|
| Theory | 3 | 5 |
| Practical | 2 | 3 |

Evaluation Scheme:

| | Progressiv | e Assessment | Te | rm End | |
|--------------------------|---|---|---------------------------|--|-------|
| Mode of Evaluation | Theory | Practical | Theory | Practical * & Micro-project ** | |
| Details of Evaluation | Average of two tests of 20 marks each to be converted out of 20 marks | (i) 25 marks for each practical (CA) (ii) One PST of 25 marks | One Paper (3 hours) | Term End Practical/ Micro-project Exam (3 hours) | Total |
| Marks | 20 | | 80 | 50E | 150 |

^{*} E-External Assessment *Assessment at semester end practical exam as per Pro-forma III.

RATIONALE:

Embedded system is a new trend in the field of automation. The subject has been introduced in order to enhance the knowledge of microcontroller programming. This subject will help a student to design small embedded systems and write the code for the same.

COMPETENCY:

Design, implement and maintain 8051 microcontroller based embedded systems

Cognitive: Understand embedded C programming and peripheral interfacing.

Psychomotor: Write embedded C programs for wide range of applications.

Affective: Attitude of i) Logical thinking ability ii) System hardware design skills.

COURSE OUTCOMES:

EIG402-1 Classify, Define and State the functions of Embedded system

EIG402-2 Apply Embedded C programming

EIG402-3 Develop timer and interrupts based applications for 8051 micrcontroller

EIG402-4 Interface and Program various I/O devices with 8051 microcontroller

EIG402-5 Interpret features of Real Time Operating System

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels:1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | Programme Outcomes POs and PSOs | | | | | | | | |
|---|--|-----------------------------|---|---|--|-----------------------------------|-----------------------------------|-----|---|
| Competency and Cos | PO 1 Basic and Discipline specific knowledge | PO 2 Problem Analysis | PO 3 Design / Development of solutions | | PO 5 Engineering Practices for society, sustainability and Environment | PO 6 Project Manageme nt | PO 7 Life- long Learning | and | PSO2 Supervision and Providing Solution |
| Competency: Design, implement and maintain 8051 microcontroller based embedded systems | 1 | 3 | 3 | 1 | - | - | - | 3 | 3 |
| EIG402-1 | 1 | 1 | 2 | - | - | - | - | 2 | 2 |
| EIG402-2 | 1 | 3 | 2 | - | - | - | - | 2 | 2 |
| EIG402-3 | - | 3 | 3 | 1 | - | - | - | 2 | 2 |
| EIG402-4 | 1 | 2 | 3 | 1 | - | - | - | 3 | 3 |
| EIG402-5 | 1 | 2 | - | | - | - | - | 3 | 3 |

PSO 1: Operate and Maintain: Competency to apply the concepts of Industrial Electronics in the operation and maintenance of engineering application systems.

PSO 2: Supervision and providing solution: Ability to supervise work and reach appropriate solution to simple practical problems in Industrial Electronics engineering industry.

CONTENT:

A) SUGGESTED PRACTICAL'S/EXERCISE

A.1 Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any 10/20 out of 15/25 experiments).

| Sr No. | Title of Practical Exercise | Skills / Competencies to be Developed | Course Outcome |
|-----------|--|--|-------------------|
| 1) | Identify the different peripherals and its | 5) Identify different perpherals | EIG402-1 |
| | interfacing with 8051 microcontroller know | 6) Trace the interfacing of all the | |
| | how on the Development board available in | on board peripherals with | |
| | the laboratory | 8051 microcontroller | |
| 2) | Use Keil Compiler's integrated Development | 7) Writing programs using | EIG402-2 |
| | Environment (IDE) for developing embedded | Embedded C for 8051 | |
| | C programs | | |

| | т | | | |
|----|--|----------------|---|----------------|
| 3) | Development and execution of the program in C for sending data on port lines. 1) Sending ASCII characters/numbers to a particular port 2) LED Blinking continuously 3) LED state control by push button switch 4) Get status of a pin and output it on another pin | 9) | Writing programs using Embedded C for 8051 Programming using 8051 kit/ any standard compiler like KEIL | EIG402-2, 3 |
| 4) | Development and execution of the program in C for arithmetic operation and time delay 1) LED Blinking for 500 times 2) Toggle all the bits of a port with a 250 msec delay in between 3) Sounding a buzzer connected to a port pin upon door sensor sense the open condition | 2) | Writing programs using Embedded C for 8051 Programming using 8051 kit/ any standard compiler like KEIL Perform calculations | EIG402-2, 3 |
| 5) | Development and execution of the program in C to display numbers from 0 to 9 on 7 segment display interfaced with 8051 with a delay in between | 5) | Writing programs using Embedded C for 8051 Programming using 8051 kit/ any standard compiler like KEIL Perform calculations | EIG402-2, 3 |
| 6) | Development and execution of the program in C for logical operations and data conversion 1) Convert packed BCD to ASCII 2) Convert ASCI digits to packed BCD 3) Calculation of checksum byte 4) Data integrity check using checksum byte 5) Convert binary to decimal and display the digits on ports | 4) | Writing programs using Embedded C for 8051 Programming using 8051 kit/ any standard compiler like KEIL Perform calculations | EIG402-2, 3 |
| 7) | Development and execution of the program in C to generate square wave at a port pin 1) Generate square wave at a port pin P0.1 of any frequency using time delay generated using for loop 2) Generate square wave at a port pin P0.1 of a particular frequency using time delay generated using for loop | 1) 2) 3) | Writing programs using Embedded C for 8051 Programming using 8051 kit/ any standard compiler like KEIL Perform calculations | EIG402-3 |
| 8) | Development and execution of the program in C for Timers and Counters of 8051 1) Generate square wave at a port pin P1.1 of a particular frequency using Timer 0 2) Employ Counter 0/Counter 1 for | 1) 2) 3) | Writing programs using Embedded C for 8051 Programming using 8051 kit/ any standard compiler like KEIL Perform calculations | EIG402-3 |

| | counting the events outside 8051 and are being inputed at T0/T1 pin Count | | |
|-----|--|---|---------------|
| 9) | Development and execution of the program in C for 4X4 matrix Keyboard interfaced with 8051 | Writing programs using Embedded C for 8051 Programming using 8051 kit/ any standard compiler like KEIL | EIG402-4 |
| 10) | Development and execution of the program in C to display certain message on LCD interfaced with 8051 1) Display message "Electronics Department" on LCD using time delay method or Busy Flag method | Writing programs using Embedded C for 8051 Programming using 8051 kit/ any standard compiler like KEIL Perform calculations | EIG 402- 4 |
| 11) | Development and execution of the program in C to send data on serial port continuously | Writing programs using Embedded C for 8051 Programming using 8051 kit/ any standard compiler like KEIL Perform calculations | EIG402-4 |
| 12) | Development and execution of the program in C to rotate the stepper motor interfaced with 8051 in clockwise/ anticlockwise direction | Writing programs using Embedded C for 8051 Programming using 8051 kit/ any standard compiler like KEIL Perform calculations | EIG402-4 |
| 13) | Development and execution of the program in C to speed control of DC motor interfaced with 8051 using PWM | 4) Writing programs using Embedded C for 8051 5) Programming using 8051 kit/ any standard compiler like KEIL 6) Perform calculations | EIG402-4 |
| 14) | Development and execution of the program in C to display digital equivalent of analog input to ADC0808/0809 interfaced with 8051 | Writing programs using Embedded C for 8051 Programming using 8051 kit/ any standard compiler like KEIL Perform calculations | EIG402-4 |
| 15) | Development and execution of the program in C to generate analog waveforms like- sine. Step ramp, triangular at the output of DAC0808/0809 interfaced with 8051 | 4) Writing programs using Embedded C for 8051 5) Programming using 8051 kit/ any standard compiler like KEIL 6) Perform calculations | EIG402-4 |

A.2 Micro-project

Each student should allotted one microproject in the beginning of the semester. In 3rd and 4th semester the microprojects are group based (group of 3 students) and in 5th and 6th semesters it should be preferably individualy undertaken. Each microproject should encompass two or more COs.

Each student have to maintain dated work diary consisting of individual contribution in the microproject work.

Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of microprojects is as follows:

- a) Prepare a chart of various features using data sheets of 8051, PIC, AVR, ARM
- b) Prepare a chart of various features an operations of temperatutre sensors. Devices using data sheets
- c) Prepare a chart of various types of LCDs to display its features, pin functions and steps of operations using data sheets
- d) Draw the circuit diagram of minimum system configuration based on 8051 micocontroller and implement it
- e) Draw interfacing diagram of connecting Relay with 8051 on development board and write program to turn it ON/OFF
- f) Draw interfacing diagram of connecting Buzzer with 8051 on development board and write program to turn it ON
- g) Build an application of flashing display to flash advertisement
- h) Build a system to display department name with rolling display
- i) Build two digit counter system
- j) Build a class period bell system as per the given time table with 7 teaching periods of 1 hour each
- k) Build a temperature monitoring system to maintain the given temperature
- 1) Build automated door control system to open and close the door
- m) Build a pollution monitoring system to observe the level of CO2
- n) Build a traffic light controller for traffic signals as per specified delay
- o) Build a water level controller for given water levels

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

a) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in *Laboratory Manual*

| Domain | Particulars | Marks out of 25 |
|-------------------------|---|-----------------|
| Cognitive | Technical preparedness for practical | 05 |
| Describe and the second | Operating skills/Algorithm/ flowchart | 05 |
| Psychomotor | Observation/Logic/ Program/Result | 05 |
| | Discipline and punctuality | 05 |
| Affective | Procedure/ Safety Measures/ Decency/ Presentation | 05 |
| | TOTAL | 25 |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment Pro-forma III*

| Sr. No. | Criteria | Marks allotted |
|------------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algoritm/ Flowchart/ Program | 05 |
| 2 | Procedure followed to achieve the result | 05 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs, workmanship and Safety measures | 05 |
| 5 | Oral Based on Test | 05 |
| | Total | 25 |

^{*}Final marks of practical assignments shall be awarded as per Assessment Pro-forma III.

b) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. No | Criteria | Marks allotted |
|-----------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algoritm/ Flowchart/ Program | 10 |
| 2 | Procedure followed to achieve the result | 10 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 10 |
| 4 | Proper Graphs, workmanship and Safety measures | 10 |
| 5 | Oral | 10 |
| | Total | 50 |

^{*}Assessment at semester end practical exam as per Pro-forma III.

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

- 1. Online/Offline Lectures cum Discussions
- 2. Regular home assignments
- 3. Laboratory work

Teaching and Learning Resources:

1. Chalk and Board 2. Video Clips 3.PPTs 4. Question Bank 5. Charts

^{**} Assessment as per Pro-forma III.

RATIONALE:

Though Diploma holders are not design engineers, they must have some basic knowledge of circuit design. Electronic circuits are widely used in industries, communication, etc. Diploma engineers are able to design a circuits as per applications. This subject will help a student to maintain these various circuits and also for development of his career as a design Engineer.

COMPETENCY:

Design and build electronic circuit for different engineering applications.

Cognitive: Understanding specification of electronics component.

Psychomotor: Design electronic circuits for different applications.

Affective: Attitude of i) Design ii) Test iii) Diagnose iv) Analyze v) Formulate

III- Internal and external Examination.

COURSE OUTCOMES:

- **EIG 403-1** Identify specification of different electronics component.
- **EIG 403-2** Use power supply as per requirement.
- **EIG 403-3** Design small signal amplifier.
- **EIG 403-4** Differentiate and sketch power amplifier.
- **EIG 403-5** Classify and formulate oscillators as per frequency requirement.
- **EIG 403-6** Distinguish and select multivibrator.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels:1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | | | Prog | gramme Ou | itcomes PO | s and PSC | Os | | |
|--|--|-----------------------------|---|-----------|--|-----------------------------------|-----------------------------------|------------------------------------|-----|
| Competency and Cos | PO 1 Basic and Discipline specific knowledge | PO 2 Problem Analysis | PO 3 Design / Development of solutions | | PO 5 Engineering Practices for society, sustainability and Environment | PO 6 Project Manageme nt | PO 7 Life- long Learning | PSO1 Operate and Maintain | and |

PSO 1: Operate and Maintain:Competency to apply the concepts of Industrial Electronics in the operation and maintenance of engineering application systems.

PSO 2: Supervision and providing solution: Ability to supervise work and reach appropriate solution to simple practical problems in Industrial Electronics engineering industry.

CONTENT:

C) SUGGESTED PRACTICAL'S/EXERCISE

A.1 Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any 'X' experiments).

| Sr.no | Laboratory experiments | Skills Developed | Course |
|-------|-----------------------------------|-------------------------------|-----------|
| | | | Outcomes |
| 1 | Study of colour coding of | 1.Identify components. | EIG 403-1 |
| | resistor, capacitor, inductor and | 2.Understand specification of | |
| | specification of diode ,BJT , | component. | |

| | FET, OPAMP | | |
|----|--|---|-----------|
| 2 | Full wave rectifier design with filter with given specifications. | Perform calculations. Select components. Design circuit and test it on breadboard | EIG 403-2 |
| 3 | Design of zener regulator with given specifications. | Perform calculations. Select components. Design circuit and test it on breadboard | EIG 403-2 |
| 4 | Design of transistorised series regulator with given specifications. | Perform calculations. Select components. Design circuit and test it on breadboard | EIG 403-2 |
| 5 | Design of IC 723 regulator. Low Voltage | Perform calculations. Select components. Design circuit and test it on breadboard | EIG 403-2 |
| 6 | Design of IC 723 regulator. High voltage | Execute calculations. Choose components. Design circuit and test it on breadboard | EIG 403-2 |
| 7 | Design of small signal common emitter voltage amplifier. | Execute calculations. Choose components. Design circuit and test it on breadboard | EIG 403-3 |
| 9 | Design of small signal emitter follower voltage amplifier. | Perform calculations. Select components. Design circuit and test it on breadboard | EIG 403-3 |
| 10 | Design of class A power amplifier with resistive load. | Execute calculations. Select components. Design circuit and test it on breadboard | EIG 403-4 |
| 11 | Design class AB complementary symmetry power amplifier and test it | Perform calculations. Select components. Design circuit and test it on breadboard | EIG 403-4 |
| 12 | Design of RC oscillator | Execute calculations. Select components. Design circuit and test it on breadboard | EIG 403-5 |

| 13 | Design of LC oscillator | 1. Perform calculations. | EIG 403-5 |
|----|-------------------------|----------------------------------|-----------|
| | | 2. Select components. | |
| | | 3. Design circuit and test it on | |
| | | breadboard | |
| 14 | Design of Astable | 1. Perform calculations. | EIG 403-6 |
| | multivibrator. | 2. Select components. | |
| | | 3. Design circuit and test it on | |
| | | breadboard | |
| 15 | Design of Monostable | 1. Execute calculations. | EIG 403-6 |
| | multivibrator. | 2. Choose components. | |
| | | 3. Plan circuit and test it on | |
| | | breadboard | |

A.2 Micro-project

Each student should allotted one microproject in the beginning of the semester. In 2nd and 4th semester the microprojects are group based (group of 3 students) and in 5th and 6th semesters it should be preferably individualy undertaken. Each microproject should encompass two or more COs.

Each student has to maintain dated work diary consisting of individual contribution in the microproject work.

Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of microprojects is as follows:

- a) Build a bulgar alarm circuit.
- b) Construct one bit counter.
- c) Develop touch sensor.
- d) Construct water level indicator.
- e) Build rain alarm,
- f) Develop street light control.
- g) Construct dancing led.
- h) Build clamp sensor
- i) Develop batch counter.
- i) Construct mobile detector

D) **THEORY:**

| | | | TOTAL: | 24 | 40 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

Specification table for Setting question paper for semester end theory examination :

| Topic | Name of Topic | Distribution of Marks (Level wise) | | | Course | Total |
|-------|------------------------|-------------------------------------|---------------|-------------|-----------|-------|
| No. | | | | | Outcomes | Marks |
| | | Knowledge | Comprehension | Application | | |
| 1. | Electronics | 04 | 04 | 00 | | 08 |
| | Components and | | | | EIG 403-1 | |
| | Specifications | | | | | |
| 2. | Design of power | 04 | 04 | 08 | EIG 403-2 | 16 |
| | Supply | | | | EIG 405-2 | |
| 3. | Design of small signal | 04 | 04 | 08 | EIG 403-3 | 16 |
| | amplifier | | | | EIG 405-5 | |
| 4. | Power Amplifier design | 02 | 02 | 08 | EIG 403-4 | 12 |
| 5. | Design of Oscillators | 04 | 04 | 08 | EIG 403-5 | 16 |
| 6. | Design of | 02 | 02 | 08 | EIG 403-6 | 12 |
| | Multivibrators | | | | EIG 405-0 | |
| | | | | Total | | 80 |

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

k) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain | Particulars | Marks out of 25 |
|-------------|--------------------------------------|-----------------|
| Cognitive | Technical preparedness for practical | 05 |
| Psychomotor | Operating skills/Algorithm/flowchart | 05 |
| | Observation/ Logic/ Program/Result | 05 |
| Affective | Discipline and punctuality | 05 |

| Procedure/Safety Measures/Decency/Presentation | 05 |
|--|----|
| TOTAL | 25 |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment Pro-forma III*,

| Sr. No. | Criteria | Marks allotted |
|------------|--|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/Algoritm/Flowchart/Program | 05 |
| 2 | Observations, Result, Output | 05 |
| 3 | Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs & Procedure / workmanship and Safety measures | 05 |
| 5 | Oral Based on Term Work | 05 |
| | Total | 25 |

^{*}Final marks of practical assignments shall be awarded as per Assessment Pro-forma III.

1) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. no | Criteria | Marks allotted |
|-----------|--|----------------|
| 1 | Technical ability | 10 |
| 2 | Correct figures / diagrams/ Logic | 10 |
| 3 | Observation table/Algorithm/flowchart/Program | 10 |
| 4 | Correctness of - Result / Output/ Calculations / Graphs | 10 |
| 5 | Safety / Use of proper tools / overall Decency &Presentation/ Workmanship | 10 |
| | Total | 50 |

^{*}Assessmeat semester end practical exam as per Pro-forma III.

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

1. Lectures cum Discussions

2. Regular home assignments

3. Laboratory work

Teaching and Learning Resources:

^{*} I-Internal Assessment *Assessment at semester end practical exam as per Pro-forma II.

RATIONALE:

In the field of Electronics Technology various technologies (hardware and Software) needs to be integrated and proper paradigms needs to be implemented to develop any kind of electronic system. Hence it becomes essential to get hands on experience for developing industrial applications. The course of the "Project" is designed with an aim to develop the ability of "learning to Learn" on its own. This subject is essential to understand the implementation of the system development process i.e. analyze, design, coding, debugging and testing. This course also aims to develop the managerial skills such as leadership, coordination, team work, planning the resources, etc. Thus by studying this course, abilities like innovativeness, creativity, imitativeness, performance qualities, etc. are developed in students.

COMPETENCY:

Plan innovative/creative solutions to solve/complete the identified problems/task/shortcomings faced by industry/user w.r.t electronics/ telecommunication engg .

Cognitive: Create/Suggest solution to solve the idenfied problem.

Psychomotor: Operate and Maintain of a prototype for an industrial applications

Affective: Attitude of i) Leadership ii) Innovativeness iii) Logic iv) accuracy v) precision

vi) punctuality

COURSE OUTCOMES:

EIG 404-1 Write the problem/task specification in existing systems related to the occupation.

EIG 404-2 Select, collect and use required information/knowledge to solve the problem/complete the task.

EIG 404-3 Choose logically relevant solution.

EIG 404-4 Communicate effectively and confidently as a member and leader of team.

EIG 404-5 Prepare and present project proposals/project/seminar report...

EIG 404-6 Develop sense of environmental responsibility and impact on society.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | Programme Outcomes POs and PSOs | | | | | | | | |
|---|--|-----------------------------|---|--|--|-----------------------------------|------|------------------------------------|---|

| EIG 404-6 | - | 2 | 1 | - | 2 | - | - | - | - |

COURSE DETAILS:

Projects are culminating experiences in which students synthesize the competencies acquired over whole programme. In some cases they also integrate cross-disciplinary knowledge.

To develop the highly essential industry oriented skills and competencies in the students, the projects are offered in the last two semesters to serve for following purposes:

i) Integrate the competencies acquired by the students in the previous and current semesters.

ii) Provide opportunity for interdisciplinary work in tackling problems likely to be faced by them in industry which are exciting and challenging.

A) Project Planning:

Students are supposed to find out a suitable project and prepare a detailed plan in fifth semester so that it can be executed smoothly in sixth semester.

The project work is divided into two phases. In the first phase the group is expected to submit a synopsis upon choosing a project work. The project should be selected within two weeks on the group formation and a brief synopsis of the project should be submitted to the HOD & guide.

The projects will have a detailed project proposal, which must be executed or implemented within the time allocated, simultaneously maintaining a project diary periodically monitored by the teacher. A detailed project report is to be prepared as project progresses, which has to be submitted after the project is over. Project diary will be assessed by teacher.

Student should work on detailed system design and complete 30 to 40 percent of work out of complete project work as a part of term work submission in the form of joint report. The group should work every week in the project duration and appraise the guide about their work progress. Guide should closely monitor the work and help the students from time to time. The guide should also maintain a record of continuous assessment of project work progress on weekly basis.

A seminar should be delivered by each student in group on the selected project topic as part of oral examination. The oral examination will be conducted by internal examiner as appointed by the Institute.

B) Scopes of Projects

Scope of the project work should be decided based on following criteria:

- a) Relation to diploma programme curriculum: When students intend to select topics for the project work they need to choose a project which relates well to their curriculum (It may be beyond curriculum, but it should relate to it) and requires implementation of theories already learnt and skills already possessed by them from the previous semesters.
- b) Abilities possessed by the group of students: Projects should be chosen so that it can be completed mainly using students' problem solving capabilities and depth of learning. It is natural that highly motivated students or high achievers may come out with projects which are more complex and challenging. Teachers should guide students to choose challenging projects according to the students' ability.
- c) Resources Available: Students and Guides should keep in mind the availability of resources while deciding the topic and the scope of the project. Some of the

important resources which need consideration are:

- Time available
- Raw Material/Components required
- Manufacturing/Fabrication equipment and tools required
- Testing/Measuring equipment and instruments required
- Access to Journals (Library/Digital)
- Expertise for theoretical guidance (available in polytechnic, nearby institutes or nearby industries)
- Expertise and technology required for fabrication (if required) vul. Software required.

C) GUIDELINES FOR GROUP FORMATION:

The project work should be undertaken by group of maximum 3 students who will jointly work and implement the project with the approval of guide. The group of student should decide the area of proposed work as per requirement of Industry/community or environment and work together for hardware &software if necessary solution for that work.

D) GUIDELINES FOR UNDERTAKING THE PROJECT:

(i) Selection of project title: The selection of the Project title must have emphasis to attain with respect to CO's, PO's and PSO's of the programme. The students will then work on the identified problem/task through a rigorous process of understanding and analyzing the problem, conducting a literature search, deriving and discussing under the supervision of project guide. The project team will prepare the Project Proposal with the following sub-titles:

- a) Rationale (one page)
- b) Introduction
- c) Literature Survey
- d) Problem Definition
- e) Proposed Methodology of solving Identified problem
- f) Resources and consumables required.
- g) Action Plan (sequential list of activities with probable dates of completion)

Project Idea shall be approved by the teacher and HOD. The student will begin to maintain a dated Project Diary comprising of 15-20 pages for the whole semester. This diary should be assessed by teacher timely.

(ii) Activities to be carried out in the entire semester:

Project activity calendar should be prepared by project co-ordinator and should be displayed to students w.r.t following points.

Students are advised to plan their project work w.r.t following stages

| Stage | Major Learning Acivities | Description of Activity | | |
|-----------------|------------------------------|--|--|--|
| STAGE-1 | Appreciate objectives of | - | | |
| Orientation | learning this course | 1.1 Introduction. | | |
| | | 1.2 Need, importance and objectives. | | |
| | | 1.3 Examples of projects. | | |
| | | 1.4 Expected benefits. | | |
| STAGE-2 | a) Interact with the | 2.1Information gathering through websites | | |
| Searching | industry/research | and media. | | |
| 8 | organization | 2.2Identification of Industry/research | | |
| | personnel. | organization | | |
| | b) Gather information | 2.3 Visiting Industry/research organization | | |
| | and organize | 2.4 Creating awareness about the industrial | | |
| | | premises, personnel, processes and products | | |
| | | 2.5 Review of literature | | |
| STAGE-3 | a) Define & explain | 3.1 Identification of problem/ project.Each | | |
| Problem | Problem definition | student will suggest one problems/ projects. | | |
| Definition | b) Prepare & submit | 3.2 Defining problem in consultation with | | |
| &Project | project proposal and | institute guide & industry mentor. | | |
| Proposal | synopsis. | While defining project title/problem ,it should | | |
| Submission | Syllopsis. | also be: i) Preferably innovative in nature. ii. | | |
| Submission | | Feasible using the infrastructure of the | | |
| | | institute. Iii) Having measurable and analytical | | |
| | | end results. | | |
| | | 3.3 After finalization of project title project | | |
| | | proposal should be submitteed in the | | |
| | | prescribed format provided by | | |
| | | guide/department. | | |
| STAGE-4 | a) Draw General block | 4.1 Block Diagram of project | | |
| Design Solution | diagram of solution. | 4.2 Draw & Develop circuit diagram using | | |
| Design Solution | b) Develop circuit | circuit design softwares/tools | | |
| | diagram in detail. | 4.3 Development of algorithm and flowchart if | | |
| | c) Write algorithm and | applicable | | |
| | draw flowchart | аррисиоте | | |
| STAGE - 5 | a) Design PCB Layout | 5.1 PCB Layout preparation using software | | |
| Hardware/sof | b) Simulate circuit | tools | | |
| tware | c) Assemble circuit | 5.2 Circuit simulation | | |
| simulation and | d) Test the Hardware | 5.3 Partial implementation using Breadboard | | |
| partial | circuit Troubleshoot | or General purpose PCB | | |
| Implementati | the hardware circuit. | 5.4 Test and troubleshoot hardware if | | |
| on | uic naidware circuit. | applicable. | | |
| STAGE - 6 | a) Pranara project | 6.1 Prepare project report as per prescribed | | |
| Documentation | a) Prepare project | format given by department/guide. | | |
| | report. b) Prepare PPT | 6.2 Prepare PPT and present as per schedule. | | |
| and presenation | b) Prepare PPT | 0.2 Frepare FFF and present as per schedule. | | |
| | presentation Present | | | |
| | project work | | | |

(iii) Synopsis format:

The synopsis report should include following points:

- Title of project
- Introduction: Study of existing system
- Feasibility Study
- Objective and Scope
- Block diagram and description
- Hardware and software requirements
- Action Plan/Expected schedule (sequential list of activities with probable dates of completion)
- Expected outcomes/result
- Approximate Expenditure
- References.

(iv) Project plaaning report/Seminar report:

At the end of fifth Semester, the student will prepare a Semester V ,Project Planning Report/Seminar report with the following sub-titles:

- 1. Cover Page & Title Page
- 2. Certificate
- 3. Acknowledgements
- 4. Table of Contents
- 5. Introduction
- 6. Literature Reviews
- 7. Proposed Work:
 - Problem Definition/Objective and Scope of Project
 - Block diagram/Design and description
 - Circuit Diagram(Draft circuit) and working, if finalized can develop PCB Design
 - Hardware Requirements:-Should contain description and specifications of major components used
 - Software Requirements:- Should list features of software used.
 - Expected outcome Result
 - Project Milestones Achieved(Schedule of proposed date and actual date of achievement)
- 8 Future scope of work
- 9 Conclusion
- 10 Appendix- if any(programs, data sheets, derivations, etc)
- 11 References

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

a) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given

| Domain | Particulars | Marks out of 25 |
|-------------|--|-----------------|
| Cognitive | Problem Identification/Project title. | |
| Cognitive | Industry Survey and litertature review | 10 |
| Psychomotor | Hardware/Software Designing | |

| | Project diary ,Report Writing | 10 |
|-----------|-------------------------------------|----|
| | and documentation | |
| Affective | Punctuality and overall conribution | 05 |
| | Decency and presentation | |
| | TOTAL | 25 |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted in the form of demonstration of work done per criteria given

Final marks of term work shall be awarded as per Assessment Pro-forma II.

| Sr. No. | Criteria | Marks allotted |
|------------|--|----------------|
| 1 | Problem Identification/Project title./Project synopsis | 05 |
| 2 | Industry Survey and litertature review | 05 |
| 3 | Methodology adopted/Designing of Hardware/Software | 05 |
| 4 | Project diary and documentation | 05 |
| 5 | Presentation, Question and Answer | 05 |
| | Total | 25 |

^{*}Final marks of PST shall be awarded as per Assessment Pro-forma II

b) Term-end Oral Examination:

A seminar should be delivered by group of students on the selected project topic in front of teachers and students in their class.

Every student shall be assessed by internal examiner as per the following criteria:

| Domain | Particulars | Marks out of 25 | | | | | | |
|---------------|--------------------------------------|-----------------|--|--|--|--|--|--|
| Cognitive | Project synopsis | 10 | | | | | | |
| | Execution of plan in 5 th | 10 | | | | | | |
| Psychomotor | semester | | | | | | | |
| 1 by chomotor | Seminar Report and | 10 | | | | | | |
| | documention | | | | | | | |
| Affective | Punctuality and overall contribution | 10 | | | | | | |
| Affective | Presentation, Question and | 10 | | | | | | |
| | answer | | | | | | | |
| | TOTAL | | | | | | | |

^{*} I- Internal Assessment at semester end practical exam as per Pro-forma IV.

RATIONALE:

Day by day the change in electronics Industry is dynamic. The role of diploma engineers changed over the years. Engineers should have knowledge of power electronics. Electronics control circuits have major role in industries for which study of power devices are essential. Concept of electronics devices and circuits along with the application are necessary. This subject deals with the understanding of electronic semiconductor switches from thyristor family.

COMPETENCY:

Acquire knowledge about various electronic semiconductor switches from thyristor family & using them designing some power control circuits.

Cognitive: Understanding operating principle ,characteristics of semiconductor electronic switches from thyristor family.

Psychomotor: Develop skills to build, and troubleshoot power electronics circuits.

Affective : Attitude of i) Logic ii) accuracy iii) precision v) punctuality vi) Fault finding. **COURSE OUTCOMES:**

IEG 405-1 Understand electronic semiconductor switches from thyristor family.

IEG 405-2 Describe different turn on methods of thyristor.

IEG 405-3 State commutation methods of thyristor.

IEG 405-4 Analyze Series and parallel connection of SCR

IEG 405-5 Acquire knowledge of uncontrolled rectifier circuit.

IEG 405-6 Identify Controlled rectifier circuit.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels:1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | Programme Outcomes POs and PSOs | | | | | | | | | |
|---|--|-----------------------------|---|--|--|-----------------------------------|-----------------------------------|-----|---|--|

PSO 1: Operate and Maintain:Competency to apply the concepts of Industrial Electronics in the operation and maintenance of engineering application systems.

PSO 2: Supervision and providing solution: Ability to supervise work and reach appropriate solution to simple practical problems in Industrial Electronics engineering industry.

E) SUGGESTED PRACTICAL'S/ EXERCISE

A.1 Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any 'X' experiments).

Laboratory experiments and related skills to be developed:

| Sr No. | Title of Practical Exercise | Skills / Competencies to be developed | Course Outcome |
|-----------|---------------------------------------|--|-------------------|
| 1. | To study the characteristics of SCR | To understand and study the characteristic and diff. points in it. To plot graph of V-I characteristics | IEG 405-1 |
| 2. | To study the characteristics of Diac | To understand and study the characteristic and diff. points in it. To plot graph of V-I characteristics | IEG 405-1 |
| 3. | To study the characteristics of Triac | To understand and study the characteristic and diff. points in it. To plot graph of V-I characteristics | IEG 405-1 |
| 4. | R –firing circuits | Draw Circuit Diagram And Waveform. Change firing angle and observe output. | IEG 405-2 |
| 5. | RC- Firing circuits | Draw Circuit Diagram And Waveform. Change firing angle and observe output | IEG 405-2 |
| 6. | UJT Firing circuits | Draw Circuit Diagram And Waveform. Change firing angle and observe output | IEG 405-2 |
| 7. | PUT Firing circuits | Draw Circuit Diagram And Waveform. Change firing angle and observe | IEG 405-2 |

| | | output | |
|-----|---|---|------------|
| 8. | Study the phase control using Diac and Triac. | Know how the DIAC is used to trigger TRIAC. To plot graph of V-I characteristics | IEG 405-2 |
| 9. | Flasher using SCR. | 1. To study the flasher circuit. | IEG 405-2, |
| | | | IEG 405-3 |
| 10. | To study the characteristics of PUT. | 1. To understand and study the characteristic and diff. points in it. | IEG 405-1 |
| 11. | To study the SCR commutation circuits(Class A,B,C) | 1. To learn resonant turn off, using auxiliary SCR | IEG 405-3 |
| 12. | To study the SCR commutation circuits(Class D,E,F) | 1. To learn auxiliary SCR, coupled pulse turn off, natural turn off | IEG 405-3 |
| 13. | To study Half wave controlled rectifier with R load, RL load and free wheeling diode. | Draw Circuit Diagram And Waveform. | IEG 405-6 |
| 14. | To study Full wave controlled rectifier with R load, RL load and free wheeling diode | Draw Circuit Diagram And Waveform. | IEG 405-6 |
| 15. | To study full controlled rectifier | Draw Circuit Diagram And Waveform | IEG 405-6 |

A.2 Micro-project

Each student should allotted one micro project in the beginning of the semester. In 2nd and 4th semester the micro projects are group based (group of 3 students) and in 5th and 6th semesters it should be preferably individually undertaken. Each micro project should encompass two or more COs.Each student have to maintain dated work diary consisting of individual contribution in the micro project work.

Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of micro projects is as follows:

- a) UJT firing circuit.
- b) Fan speed control using TRIAC and DIAC
- c) Light dimmer.
- d) SCR flasher.
- e) Battery charger circuit using SCR.
- f) Automatic hand sanitizer.
- g) Home security system
- h) Solar power generator system
- i) Thyristor power control by IR remote.
- j) Speed control of stepper and DC motor.

C) THEORY:

Section I

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluation (Marks) | | | |
|------------|---|---------------------|---------------------------------|--|--|--|
| IEC | IEG 405-1 Understand electronic semiconductor switches from thyristor family | | | | | |
| | Power electronic semiconductor switches | | | | | |
| 1 | 1.1 Need for high power semiconductor switches. 1.2 power transistor(Symbol, Construction, Characteristics) 1.2 SCR 1.2.1 Symbol, Construction (doping levels of layers) 1.2.2 Transistorized equivalent circuit. Operating principle 1.2.3 Characteristics, Specifications- Anode current - holding & latching current, on state voltage, VBO, turn on, turn off time etc. 1.3 TRIAC 1.3.1 Layer diagram, operating principle 1.3.2 four modes of operation 1.3.3 Triac characteristics. 1.4 Ideal switch characteristics. 1.5 Triggering devices— layer diagram, Characteristics, operating principle, specifications of 1.5.1 UJT 1.5.2 PUT 1.5.3 DIAC. | 12 | 18 | | | |
| | IEG 405-2 Describe different turn on methods | of thyristor. | | | | |
| 2 | Triggering methods of thyristors 2.1 Mechanisms with which SCR turns on: 2.1.1 Voltage triggering 2.1.2 Gate triggering 2.1.3 dv /dt triggering – (specification – dv/dt | 08 | 12 | | | |
| | rating) 2.1.4 Light triggering 2.1.5 Temp triggering. 2.2 Advantages of gate triggering. 2.3 Pulse triggering (using active components) 2.3.1 Requirements of pulse to trigger SCR successfully, Pulse width, Pulse amplitude & gate current. | | | | | |

| | D. Firing aircuits | | |
|---|---|-----------|----|
| | R- Firing circuits | | |
| | RC- Firing circuits | | |
| | 2.4 UJT relaxation oscillator: | | |
| | 2.4.1Circuit, operating principle | | |
| | 2.4.2 expression for time period, Maximum & | | |
| | minimum value of timing resistor | | |
| | 2.4.3 Waveforms. | | |
| | 2.5 PUT relaxation oscillator: | | |
| | 2.5.1Circuit, operating principle | | |
| | 2.5.2 expression for time period, waveforms | | |
| | 2.6 Advantage of PUT over UJT. | | |
| | 2.7 Triac triggering using Diac. | | |
| | | | |
| | IEG 405-3 State commutation methods of t | hyristor. | |
| | Commutation circuits. | | |
| 3 | 3.1 Turn off mechanism of SCR | 04 | 10 |
| 3 | 3.2 Specifications related to turn off: Turn off time | 04 | 10 |
| | 3.3 Types of commutation methods. | | |
| | 3.3.1. Resonant turn off - Class A ,Class B | | |
| | 3.3.2. Parallel Capacitance turn off using | | |
| | auxiliary SCR - Class C, Class D | | |
| | 3.3.3 Coupled pulse turn off - Class E | | |
| | 3.3.4 Natural turn off - Class F | | |
| | 5.5.4 Indiulal tulli oli - Class I | | |
| | Total: | 24 | 40 |
| | | 27 | 70 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

Section II

| Sr. No. | Topics / Subtopics | Lectures (Hours) | Theory Evaluation (Marks) |

| | uncontrolled rectifier | | | | | |
|------|---|----|----|----|-----------|----|
| II/7 | AC to DC converter- controlled rectifier | 5 | 5 | 6 | IEG 405-6 | 16 |
| | Total | 25 | 22 | 33 | | 80 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

c) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain | Particulars | Marks out of 25 |
|--|--|-----------------------|
| Cognitive | Technical preparedness for practical | 05 |
| Psychomotor Psychomotor Olivication Psychomotor | | 05 |
| 1 sychomotor | Observation/ Logic/ Program/Result | 05 |
| | Discipline and punctuality | 05 |
| Affective | Procedure/Safety Measures/Decency/Presentation | 05 |
| | 25 | |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment* Pro-forma IV

| Sr. No. | Criteria | Marks allotted |
|------------|--|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/Algoritm/Flowchart/Progra m | 05 |
| 2 | Observations, Result, Output | 05 |
| 3 | Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs & Procedure / workmanship and Safety measures | 05 |

| 5 | Oral Based on Term Work | 05 |
|---|-------------------------|----|
| | Total | 25 |

^{*}Final marks of practical assignments shall be awarded as per Assessment Pro-forma IV.

d) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. no | Criteria | Marks allotted |
|-----------|---|----------------|
| 1 | Technical ability | 10 |
| 2 | Correct figures / diagrams/ Logic | 10 |
| 3 | Observation table/Algorithm/flowchart/Program | 10 |
| 4 | Correctness of - Result / Output/ Calculations / Graphs | 10 |
| 5 | Safety / Use of proper tools / overall Decency &Presentation/ Workmanship | 10 |
| | Total | 50 |

^{*}Assessment at semester end practical exam as Pro-forma IV.

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

1. Lectures cum Discussions 2. Reg

2. Regular home assignments

3. Laboratory work

Teaching and Learning Resources:

1. Chalk board 2. Video clips

3.PPTs

4. Question Bank

5. Charts

| Marks | 20 | | 80 | 25 I | 125 |

^{*} I-Internal Assessment *Assessment at semester end practical exam as per Pro-forma IV.

RATIONALE:

To increase the effectiveness, efficiency and quality of products, now a days it is very much essential to complete the required work or task automatically in every field. As the control system is the basis of various automatic control systems, therefore the students of electronic engineering must have the knowledge of control system.

COMPETENCY:

Apply control systems in real time.

Cognitive: Understand applications of control systems.

Psychomotor: .Draw block diagrams of control systems as per application

Affective: Attitude of i) Logic ii) accuracy

COURSE OUTCOMES:

EIG 406-1..Identify various types of control systems

EIG 406-2 Predict transient and steady state responses of system.

EIG 406-3..Draw frequency response of system using bode plot

EIG 406-4Determine stability conditions of control system.

EIG 406-5...Identify use of servo motors as per requirement.

EIG 406-6: Select appropriate Control system processes as necessary.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels:1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | Programme Outcomes POs and PSOs | | | | | | | | |
|--|--|-----------------------------|---|--|--|-----------------------------------|------|------------------------------------|---|

CONTENT:

A.1 Suggested Practical's/ Exercise

Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any 10 experiments)..

| Sr No. | Title of Practical Exercise | Skills / Competencies to be developed | Course Outcome |
|--------|--------------------------------|--|-------------------|
| 1 | DC position control system | Analyze the DC Position Control system. Measure input position and output position. Plot the graph of input position versus output position. | EIF 406-5 |
| 2 | AC position control system | Analyze the AC Position Control system. Measure input position and output position. Plot the graph of input position versus output position. | EIF 406-5 |

| | 3 | Characteristics of potentiometer as error | 1. Analyze, understand and construct circuit for potentiometer as error | |
|---|----|---|--|-------------------|
| | | detector | detector. | EIE 406 5 |
| | | | 2. Measure input position and output position. | EIF 406-5 |
| | | | 3. Plot the graph of input position versus | |
| | | | output position. | |
| | 4 | Characteristics of | 1. Analyze and understand operation of | |
| | | synchro as error | synchro as error detector. | |
| | | detector | 2. Measure input position and output | EIF 406-5 |
| | | | position. | |
| | | | 3. Plot the graph of input position versus output position. | |
| | 5 | Step response of first | 1. Build first order RC Circuit on bread | |
| | Č | order R-C circuit | board. | TITE 40 < 2 |
| | | | 2. Observe the output for step input | EIF 406-2 |
| | | | 3. Plot the step response on graph. | |
| | 6 | Step response of R-L-C | 1. Build second order RLC Circuiton | |
| | | second order circuit | bread board. | EIF 406-2 |
| | | | 2. Observe the output for step input | |
| | 7 | Temperature controller | 3. Plot the step response on graph.1. Analyze temperature controller with | |
| | / | with on-off controller | on-off controller. | EIF 406-6 |
| | | with on our controller | 2. Observe output for various set points. | LII 100 0 |
| - | 8 | Temperature controller | 1. Analyze temperature controller with PI | |
| | | with PI controller | controller. | EIF 406-6 |
| | | | 2. Observe output for various set points. | |
| | 9 | Temperature controller | 1. Analyze temperature controller with | EIE 40.6.6 |
| | | with PID controller. | PID controller 2. Observe output for various set points. | EIF 406-6 |
| | 10 | Temperature controller | Analyze temperature controller with | |
| | 10 | with PD controller | PD controller. | EIF 406-6 |
| | | | 2. Observe output for various set points | |
| | 11 | Bode Plot | 1. Understand procedure to draw bode | |
| | | | plot. | |
| | | | 2. Using Matlab software, sketch bode | EIF 406-3 |
| | | | plot. | |
| | | | 3. Verify theoretical and practical graph and parameters such as GM,PM. | |
| - | 12 | Root Locus | Understand procedure to draw root | |
| | | | locus. | EIE 407 4 |
| | | | 2. Using Matlab software, sketch root | EIF 406-4 |
| | | | locus. | |
| | 13 | Step response of first | 1. Build first order RC Circuit using | DIE 40 < 2 |
| | | order R-C circuit using | Matlab software | EIF 406-2 |
| - | 14 | simulation software | 2. Observe the output for step input | |
| | 1+ | Step response of R-L-C second order circuit | Build second order RLC Circuit using Matlab software | EIF 406-2 |
| | | using simulation | 2. Observe the output for step input | LII 700-2 |
| L | | | | |

| | software | | |
|----|------------------------|--|-----------|
| 15 | Temperature controller | 1. Build using Temperature controller | EIF 406-6 |
| | with on-off controller | with on-off controller Matlab software | |
| | using simulation | 2. Observe the output for step input | |
| | software | | |

A.2 Micro-project

Each student should allotted one microproject in the beginning of the semester. In 2nd and 4th semester the microprojects are group based (group of 3 students) and in 5th and 6th semesters it should be preferably individualy undertaken. Each microproject should encompass two or more COs.Each student have to maintain dated work diary consisting of individual contribution in the microproject work.

Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of micro projects is as follows:

- a) Prepare a chart of block diagram reduction rules.
- b) Prepare a power point presentation of Routh's stability criteria and present it in classroom.
- c) Build and test step response of RC circuit in matlab.
- d) Build and test step response of RLC circuit in matlab.
- e) Construct and test potentiometer as an error detector.
- f) Draw root locus for a given system's transfer function and explain it in classroom.
- g) Draw Bode Plot for a given system's transfer function and explain it in classroom.
- h) Build and test PI controller in matlab.
- i) Build and test PD controller in matlab.
- i) Build and test PID controller in matlab.

B. THEORY:

SECTION-I

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluation (Marks) |
|------------|--|---------------------|---------------------------------|
| | EIG 406-1:Identify various types of control syst | tems. | |
| 1 | | | |
| | Overview of Control system | 10 | 14 |
| | 1.1 System- definition & practical examples, | 10 | 1. |
| | Control system – definition and examples | | |
| | 1.2 Classification of control system | | |
| | 1.3 Open loop & closed loop systems – definition, | | |
| | block diagram, practical example & Comparison | | |
| | 1.4 Laplace transform – Significance in control system | | |
| | 1.5 Transfer function – definition, derivation of transfer | | |
| | function for close loop control system. | | |
| 1 | 1.6 Order of a system – definition, 0 th , 1 st , 2 nd order system | | |

| | 3.4.2 Plotting gain margin & phase margin 3.4.3 Simple numerical (max. up to 2-poles) Sub Total | 24 | 40 |
|----|---|-------------|----|
| 3 | Frequency domain Analysis 3.1 Introduction, advantages & disadvantages of frequency response analysis 3.2 Frequency response specifications-definitions 3.3 Correlation between time and frequency domain specifications, 3.4 Bode plot-introduction, 3.4.1. General procedure for constructing Bode plot | 08 | 12 |
| 2. | Time Domain Analysis 2.1 Time domain and frequency domain analysis-definition 2.2 Transient and steady state response, steady state error- definition and equation only. 2.3 Standard test inputs - step, ramp, parabolic& impulse. Need of them, significance, and corresponding Laplace representation 2.4 Poles, zeros & characteristics equation – definition 2.5 Types of feedback control system: type 0 system, type1 system andtype2 system-only definition 2.6 Analysis of first order control system for unit step input. 2.7 Analysis of second order control system for unit step input. 2.8 Time response specifications –Definitions and equations (no derivations) Numericals on Poles, zeros, characteristic equation and time response specification EIF 406-3: Draw frequency response of system using | - | 14 |
| | EIG 406-2 :Predict transient and steady state response | s of system | |
| | standard equation, practical examples. 1.7 Linear time varying and time in varying systems — definition and example 1.8 Developing differential equations of R-C and RLC electric circuits-simple numerical for finding transfer function of electrical network 1.9 Block diagram representation of a system- need, reduction rules, numericals associated with it (only SISO). | | |

Section-II

| Sr. No. | Topics | Teaching hours | Marks |
|------------|---|----------------|----------|
| | EIG 406-3: Draw frequency response of system using | bode plot. | |
| 4. | Stability | | |
| | 4.1 S-plane – Introduction | 07 | 14 |
| | 4.2 Definition of stability | | |
| | 4.3 Necessary Conditions for stability | | |
| | 4.4 Types of stability:- stable, unstable, critically stable & conditionally stable system; relative stability; | | |
| | 4.5 Root locations in S-plane for stable ,unstable & critically | | |
| | stable systems | | |
| | 4.6 Routh's stability criterion-different cases& conditions | | |
| | & numericals | | |
| | 4.7 Root Locus technique-Introduction and steps to draw | | |
| | root locus. | | |
| | EIG 406-5: Identify use of servo motors as per requ | irement. | |
| | Servo Systems | | |
| 5 | 5.1 Servo system –definition, block diagram, | 10 | 14 |
| | 5.2 AC & DC servo systems- Block diagram and principle | | |
| | 5.3 Servo components: | | |
| | 5.3.1 Potentiometer as error detector | | |
| | 5.3.2 Synchro as error detector | | |
| | 5.3.3 Rotary encoder | | |
| | 5.3.4 Stepper motor- variable reluctance type, | | |
| | comparison of stepper motor with DC servo motor | | |
| | 5.4 DC servo motor- characteristics, difference from a | | |
| | normal DC motor, comparison between armature controlled | | |
| | and field controlled DC servo motors(with Transfer | | |
| | Function) | | |
| | 5.5 AC servo motor- characteristic of AC Servo motor (no | | |
| | Transfer Function) | | |
| | EIG 406-6: Select appropriate Control system processes | as necessary. | |
| 6. | Control actions & process controllers | | |
| | 6.1 Process control system – block diagram, elements | 07 | 12 |
| | 6.2 Control actions: discontinuous & continuous modes | | |
| | 6.3 On off controllers: neutral zone | | |
| | 6.4Concepts of Proportional controllers (offset, proportional | | |
| | band) Integral controllers & Derivative controllers | | |
| | 6.5Composite controllers:PI, PD, PID controllers | | |
| | 6.6All Control actions of electronic controllers with circuits | | |
| | & equations (with op amp) | 24 | 40 |
| | Sub Total Total | 24 48 | 40 80 |
| - | Semester end exam question paper should be such that total marks of question | | |
| | and half times the marks allotted above but the candidates are able to atten | | |

allotted marks only

Specification table for setting question paper for semester end theory examination:

| Topic | Name of topic | Distribution | n of marks (Cognit wise) | tive level- | Course outcome | Total | |
|-------|---------------------------------------|--------------|-----------------------------|-------------|----------------|-------|--|
| No. | Traine of topic | Remember | Understand | Application | | Marks | |
| 1 | Overview of Control system | 4 | 4 | 6 | EIG 406-1 | 14 | |
| 2 | Time domain Analysis of a system | 2 | 4 | 8 | EIG 406-2 | 14 | |
| 3 | Frequency domain Analysis | 2 | 4 | 6 | EIG 406-3 | 12 | |
| 4 | Stability | 2 | 4 | 8 | EIG 406-4 | 14 | |
| 5 | Servo Systems | 2 | 6 | 6 | EIG 406-5 | 14 | |
| 6 | Control actions & process controllers | 4 | 4 | 4 | EIG 406-6 | 12 | |
| | Total | 16 | 26 | 38 | | 80 | |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks on

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

e) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in *Laboratory Manual*

| Domain | Particulars | Marks out of 25 |
|-------------|---|-----------------|
| Cognitive | Technical preparedness for practical | 05 |
| Devahamatar | Operating skills/ Algorithm/ flowchart | 05 |
| Psychomotor | Observation/ Logic/ Program/ Result | 05 |
| | Discipline and punctuality | 05 |
| Affective | Procedure/ Safety Measures/ Decency/ Presentation | 05 |
| | 25 | |

ii) Progressive Skill Test:

One mid-term Progressive Skill Test of 25 marks shall be conducted as per criteria given

| Sr. No. | Criteria | Marks allotted |
|------------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algoritm/ Flowchart/ Program | 05 |
| 2 | Observations, Result, Output | 05 |
| 3 | Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs & Procedure / workmanship and Safety measures | 05 |
| 5 | Oral Based on Term Work | 05 |
| | Total | 25 |

f) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria

| Sr. no | Criteria | Marks allotted |
|--------|---|----------------|
| 1 | Technical ability | 10 |
| 2 | Correct figures / diagrams/ Logic | 10 |
| 3 | Observation table/ Algorithm/ flowchart/ Program | 10 |
| 4 | Correctness of - Result / Output / Calculations / Graphs | 10 |
| 5 | Safety / Use of proper tools / overall Decency & Presentation / Workmanship | 10 |
| | Total | 50 |

Assessment at semester end practical exam as per Pro-forma IV.

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

^{*}I-Internal Assessment *Assessment at semester end practical exam as per Pro-forma IV.

RATIONALE:

Optoelectronic devices and optoelectronic integrated optics are becoming increasingly important electronic components with industrial, consumer, and defense applications in fields such as high speed communications, solid state lighting, optical imaging, and environmental and biomedical sensing. To design, characterize, and model these devices requires an in-depth knowledge of semiconductor device physics is needed. Speed being the major advantage of this technology .Day by day optoelectronics is replacing traditional electronics in many fields. The students must understand construction, working principle and specification of these devices so as provide solution to industrial requirements.

COMPETENCY:

Maintain the circuits in optoelectronics devices.

Cognitive: Identify and choose optical sources and detector as per industrial application.

Psychomotor: Operate and maintain optoelectronics devices in industry.

Affective: Attitude of i) accuracy ii) precision iii) punctuality iv) knowledge.

COURSE OUTCOMES:

- . IEG 407-1: Identify and interpret parameters and laws of optics
- **IEG 407-2**: Select, use and maintain LED circuitry as per requirement in optoelectronics system.
- **IEG 407-3**: Operate and maintain LASER based circuitry in optoelectronics system.
- **IEG 407-4**: Identify and interpret parameters of photodetector and use photomultiplier, CCD as per requirement
- **IEG 407-5**: Operate and maintain photodetectors in optoelectronics systems.
- **IEG 407-6**: Identify and use Optocoupler and display devices as per need.

D) SUGGESTED PRACTICAL'S/EXERCISE

A.1 Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any 10 out of 15 experiments).

| Sr No. | Title of Practical Exercise | Skills / Competencies to be developed | Course Outcome |
|-----------|--|--|-------------------|
| 1. | Test the performance of LED | Build the circuit as per circuit diagram Record the measured readings in observation table Draw VI/PI characteristics | IEG 407- 1/2 |
| 2. | Test the performance of IR LED | Build the circuit as per circuit diagram Record the measured readings in observation table Draw VI/PI characteristics | IEG 407- 1/2 |
| 3. | Test the performance of LASER diode | Build the circuit as per circuit diagram Record the measured readings in observation table Draw VI/PI characteristics | IEG 407-/3 |
| 4. | Test the performance of LDR | Build the circuit as per circuit diagram Record the measured readings in observation table Draw VI characteristics w.r.t variation in light intensity | IEG 407- 1/2 |
| 5. | Test the performance of Photodiode | Build the circuit as per circuit diagram Record the measured readings in observation table Draw VI characteristics w.r.t variation in light intensity | IEG 407- 1/4 |
| 6. | Test the performance of PIN Photodiode | Build the circuit as per circuit diagram Record the measured readings in observation table Draw VI characteristics w.r.t variation in light intensity. | IEG 407-5 |
| 7. | Test the performance of Avalanche Photodiode | Build the circuit as per circuit diagram Record the measured readings in observation table Draw VI characteristics w.r.t variation in light intensity | IEG 407-5 |
| 8. | Test the performance of Phototransistor | Build the circuit as per circuit diagram Record the measured readings in observation table Draw VI characteristics w.r.t | IEG 407-4 |

| | | variation in light intensity | |
|-----|---|---|-----------------|
| 9. | Test the performance Solar cells | Build the circuit as per circuit diagram Record the measured readings in observation table Draw VI characteristics w.r.t variation in light intensity | IEG 407-5 |
| 10. | Create analog link using available source and detector in optical fiber trainer | Make the connections. Verify transmitted and received data. Note the readings | IEG 407- 2.3 |
| 11. | Transmit analog data creating analog link in optical fiber trainer | Make the connections. Verify transmitted and received data. Note the readings | IEG 407- 2.3 |
| 12. | Optical time domain Reflectometer | 1)Identify the various functions of ODTR 2) Illustrate its operation | IEG 407-4 |
| 13. | LED-Displays | Identify types of LED-displays Write/Verify their specifications and applications | IEG 407-6 |
| 14. | LCD-Displays | Identify types of LED-displays Write/Verify their specifications and applications | IEG 407-6 |
| 15. | Optocoupler | Identify types of Optocoupler Write/Verify their specifications and applications | IEG 407-6 |

A.2 Micro-project

Each student should allotted one microproject in the beginning of the semester. In 5^{th} and 6^{th} semesters it should be preferably individually undertaken. Each microproject should encompass two or more COs.

Each student has to maintain dated work diary consisting of individual contribution in the microproject work.

Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of microprojects is as follows:

A suggestive list of micro-projects is given here. The concerned faculty could add similar micro-projects. The micro-project can be carried out in the form of case-study, survey, seminar, laboratory based, simulation based or internet based. Report shall be prepared and submitted at the end of semester

- a) Build small inverter/charger by using solar cell
- b) Build driving circuitry for LASER for analog/digital data transmission

- c) Automatic street light control system
- d) Long-range Burglar Alarm Using Laser Torch
- e) Infrared Object Counter
- f) Smart Emergency Light
- g) Multipurpose White-LED Light
- h) Sequential Device Control using TV Remote Control
- i) Twilight Lamp Blinker
- j) Versatile LED Display

E) THEORY:

Section I

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluation (Marks) |
|------------|--|---------------------|---------------------------------|
| | IEG 407-1 Identify and interpret parameters and laws | of optics | |
| | Basic physics of light | | |
| | 1.1 Spectrum of light -visible, infrared, ultraviolet, fiber | | |
| 1 | optic band in light spectrum | 04 | 08 |
| | 1.2 The quantum nature of light -Plank's law, | | |
| | Concept of photon | | |
| | 1.3 Basic optical laws – refractive index, | | |
| | 1.4 Reflection, refraction, polarization, diffraction, | | |
| | scattering of light | | |
| | 1.5 Luminescence and its types | | |
| | 1.6 Light intensity, optical power, radiance intensity, | | |
| | radiance its units, | | |
| IE | G 407-2 Select, use and maintain LED circuitry as per requirement in | optoelectron | cics system. |
| 2. | Optical sources- 1 | 10 | 16 |
| | 2.1 Optical sources and its types | | |
| | 2.2 Natural light sources, | | |
| | 2.3 Incandescent lamps-construction & working, Emission spectra | | |
| | 2.4 Requirements of light sources | | |
| | 2.5 Direct and indirect bandgap semiconductors | | |
| | 2.6 Material used for construction of LED | | |
| | 2.7 Light emitting diodes-Types of LED:- | | |
| | a. Heterojunction & Homojunction LED | | |
| | b. Construction ,working, emission spectra of | | |
| | following:- | | |
| | Planar LED, | | |

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluation (Marks) |
|------------|---|---------------------|---------------------------------|
| | Dome LED, | | |
| | Surface emitter LED, | | |
| | Edge emitter LED | | |
| | Superlumicent LED | | |
| | 2.8 Characteristics of LED | | |
| | Optical output power | | |
| | Output Spectrum | | |
| | Modulation Bandwidth | | |
| | Reliability | | |
| | Optical source radiance | | |
| | 2.9 Infrared LED – ratings ,electrical characteristic, | | |
| | emission spectra | | |
| | 2.10 Merits and Demerits of LED's | | |
| | 2.11 Applications of LED's | | |
| | IEG 407-3 Operate and maintain LASER based circuitry in optoel | lectronics sys | |
| 3 | Optical Sources -2 | 10 | 16 |
| | 3.1 Basic Principle Of LASER: Absorption, Spontaneous | | |
| | and stimulated emission of radiation, Population | | |
| | inversion | | |
| | 3.2 Characteristics of LASER: monochromatic, directional, | | |
| | Coherent light sources. | | |
| | 3.3 Materials used for LASER | | |
| | 3.4 Types of LASER:- | | |
| | 3.5 Fabry-Perot Resonant Cavity- construction and | | |
| | working | | |
| | 3.6 Semiconductor Injection laser – | | |
| | Construction, working, electrical characteristics. | | |
| | 3.7 Gain guides and index guided laser - construction and | | |
| | working | | |
| | 3.8 Quantum Well Lasers - construction and working | | |
| | 3.9 Injection laser characteristics | | |
| | Dependence on threshold current | | |
| | Dynamic response | | |
| | Frequency chirp | | |
| | Noise | | |
| | | | |
| | Reliability 2.10 Advantages Disadvantages and application of LASED. | | |
| | 3.10 Advantages, Disadvantages and application of LASER | | |
| | 3.11 Comparison between LED and LASER | | |

| | Sub-Total | 24 | 40 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

Specification table for setting question paper for semester end theory examination:

| Topic | Name of topic | Distribution of | of marks (Cogniti | Course | Total | | |
|-------|--------------------------------------|---------------------|-------------------|-------------|-----------|-------|--|
| No. | Name of topic | Remember Understand | | Application | Outcome | Marks | |
| 1 | Physics of light | 04 | 04 | 00 | IEG 407-1 | 08 | |
| 2 | Optical sources -1 | 04 | 04 | 08 | IEG 407-2 | 16 | |
| 3 | Optical sources -2 | 02 | 08 | 06 | IEG 407-2 | 16 | |
| 4 | Photo detectors – 1 | 04 | 04 | 02 | IEG 407-4 | 10 | |
| 5 | Photo detectors -2 | 04 | 04 | 08 | IEG 407-5 | 16 | |
| 6 | Optical couplers and display devices | 04 | 04 | 06 | IEG 407-6 | 14 | |
| | TOTAL | 22 | 28 | 30 | | 80 | |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

g) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain | Particulars | Marks out of 25 |
|---------------|--------------------------------------|-----------------|
| Cognitive | Technical preparedness for practical | 05 |
| | Operating skills/Algorithm/ | 05 |
| Psychomotor | flowchart | 03 |
| Psycholilotol | Observation/Logic/ | 0.5 |
| | Program/Result | 03 |
| | Discipline and punctuality | 05 |
| Affective | Procedure/ Safety Measures/ | 0.5 |
| | Decency/ Presentation | 03 |
| | 25 | |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment Pro-forma IV*.

| Sr. No. | Criteria | Marks allotted |
|------------|--|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algorithm/ Flowchart/ Program | 05 |
| 2 | Procedure followed to achieve the result | 05 |

| 3 | Observations, Result, Output, Sample | 05 |
|---|---------------------------------------|----|
| | Calculations with relevant formulae | 03 |
| 4 | Proper Graphs, workmanship and Safety | 05 |
| 4 | measures | 03 |
| 5 | Oral Based on Test | 05 |
| | Total | 25 |

^{*}Final marks of practical assignments shall be awarded as per Assessment Pro-forma IV.

Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. No | Criteria | Marks allotted |
|-----------|--|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algorithm/ Flowchart/ Program | 10 |
| 2 | Procedure followed to achieve the result | 10 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 10 |
| 4 | Proper Graphs, workmanship and Safety measures | 10 |
| 5 | Oral | 10 |
| | Total | 50 |

^{*}Assessment at semester end practical exam as per Pro-forma IV.

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

- 1. Online/Offline Lectures cum Discussions
- 2. Regular home assignments
- 3. Laboratory work

Teaching and Learning Resources:

1. Chalk board 2. Video clips 3.PPTs 4. Question Bank 5. Charts

REFERENCE MATERIAL:

a) Books / Journals / IS Codes

^{*} I-Internal Assessment *Assessment at semester end practical exam as per Pro-forma IV.

RATIONALE:

Due to globalization and competition industries are developing fast and incorporating automation in various sectors. The future trend indicates that 'Robots 'will be used to carry out some activities to improve the efficiency of the industry. This subject has been identified in technology area as an elective. Knowledge of this subject will be helpful in the maintenance of Robots. Contents of this subject will provide an opportunity to understand the applications of Robots especially covering risk factors.

COMPETENCY:

Analyze robotic components and build robot based systems for engineering applications.

Cognitive: Describe the operational details of robot, its motion and application

Psychomotor: Control the motion of robot through drive system.

Affective: Attitude of i) Logical ability ii) accuracy

COURSE OUTCOMES:

IEG 506-1Identify the different robot components, specifications and its construction.

IEG 506-2Interpret the robot classification, anatomy, motion and its drive system.

IEG 506-3Understand the gripper mechanism and robot end effectors.

IEG 506-4Explore the details of various types of sensors in robot.

IEG 506-5Explore the role of robots in different applications.

IEG 506-6Understand the robot preventive maintenance and safety in robots.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | Programme Outcomes POs and PSOs | | | | | | | | |
|--|--|-----------------------------|---|----------------------|---|------|-------------------------------|---|--|
| Competency and Cos | PO 1 Basic and Discipline specific knowledge | PO 2 Problem Analysis | _ | Experime ntation and | PO 5 Engineering Practices for society, sustainabilit y and Environment | ment | PO 7 Life-long Learning | | PSO2 Supervision and Providing Solution |
| Competency: Maintain microcontroller based equipments/system.: | 1 | 3 | 3 | 1 | - | - | - | 3 | 3 |
| IEG 506-1 | 1 | 1 | 2 | - | - | - | - | 2 | 2 |
| IEG 506-2 | 1 | 3 | 2 | - | - | - | - | 2 | 2 |
| IEG 506-3 | - | 3 | 3 | 1 | - | | - | 2 | 2 |
| IEG 506-4 | 1 | 2 | 3 | 1 | - | - | - | 3 | 3 |
| IEG 506-5 | 1 | 2 | - | - | 1 | ı | - | 3 | 3 |
| IEG 506-6 | | | | | | | | | |

PSO 1: Operate and Maintain: Competency to apply the concepts of Industrial Electronics in the operation and maintenance of engineering application systems.

PSO 2: Supervision and providing solution: Ability to supervise work and reach appropriate solution to simple practical problems in Industrial Electronics engineering industry.

J) SUGGESTED PRACTICAL'S/ EXERCISE

A.1 Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any 10 out of 15 experiments).

| Sr No. | Title of Practical Exercise | Skills / Competencies to be Developed | Course Outcome |
|-----------|--|--|-------------------|
| 1 | To introduce different types of robotics and identify different parts and components. | Learn & understand the concept of | IEG506-1 |
| 2 | To prepare a report on following points using searching of information through internet: 1. Manipulator 2. End effectors | Learn & understand the concept of robotics and prepare report. | IEG506-1 |

| | 3.Link 4. Joint 5. Robot Motion 6. Robot | | |
|----|--|---|----------|
| | Applications. | | |
| 3 | To study of Robot Motion Vertical transverse, Radial transverse. | Understanding the concept of Vertical transverse, Radial transverse. | IEG506-2 |
| 4 | To study of Rotational transverse, 2,3 and 4 Degree of freedom, Speed of Motion | Understanding the concept of, Rotational transverse, 2,3 and 4 Degree of freedom, Speed of Motion | IEG506-2 |
| 5 | To control forward and backward (rotational transverse) movement of the object coupled with the shaft of D.C. motor using limit switch (D.C. motor shaft coupled with screw.) | Learn & understand the concept | IEG506-2 |
| 6 | To prepare a report on comparison and application of the various type of grippers mentioned in the syllabus with reference to following points: Types gripper mechanism, Applications and Effect of loading (load carrying capacity) | Learn & understand the concept | IEG506-3 |
| 7 | To study of Hydraulic Drives, Electric Drive, Pneumatic Drive | Learn & understand the concept of Hydraulic Drives. | IEG506-3 |
| 8 | To study of Electric Drive and Pneumatic Drive | Learn & understand the concept of Electric Drive, Pneumatic Drive | IEG506-3 |
| 9 | To perform the pick and place operation using magnetic gripper and to determine maximum load carrying capacity for the given magnetic gripper | Learn & understand the concept | IEG506-4 |
| 10 | To determine various factors affecting on proximity using proximity switch. | Learn & understand the concept | IEG506-4 |
| 11 | Study the machine vision technique used for robot | Learn & understand the concept | IEG506-4 |
| 12 | Study the use of robot in spray coating application. | Learn & understand the concept | IEG506-5 |
| 13 | Search the information from the internet about any one application of robot and make | Learn & understand the concept | IEG506-5 |
| 14 | To prepare chart of different parameters of robot maintenance | Learn & understand the concept | IEG506-6 |
| 15 | Study different types of robots by arranging industrial visits. | Understand the application of Robots in various Industries | IEG506-6 |

A.2 Micro-project

Each student should allotted one microproject in the beginning of the semester. In 3rd and 4th semester the microprojects are group based (group of 3 students) and in 5th and 6th semesters it should be preferably

individualy undertaken. Each microproject should encompass two or more COs. Each student has to maintain dated work diary consisting of individual contribution in the microproject work. Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of microprojects is as follows:

- i. Prepare a chart for classification of robots based on applications.
- ii. Design a line follower robot

iii.

K) THEORY:

SECTION I

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluat ion (Marks) |
|------------|--|---------------------|-------------------------------------|
| | 506-1 Identify the different robot components, specifications of | and its | |

| Top ic | Name of topic | Distribution of marks (Cognitive level-wise) | | Course Outcome | Total Marks | |
|-----------|--------------------------|---|------------|-------------------|----------------|----|
| No. | 32 33 F 23 | Remember | Understand | Application | | |
| 1 | Robots Parameters | 06 | 06 | 02 | IEG506-1 | 14 |
| 2 | Robot motion | 06 | 06 | 02 | IEG506-2 | 14 |
| 3 | Robot End effectors | 04 | 04 | 04 | IEG506-3 | 12 |
| 4 | Sensors in Robots | 04 | 06 | 04 | IEG506-4 | 14 |
| 5 | Applications of Robotics | 04 | 06 | 02 | IEG506-5 | 12 |
| 6 | Maintenance & Safety | 06 | 04 | 04 | IEG506-6 | 14 |
| | Total >> | 30 | 30 | 18 | | 80 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

u) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain | Particulars | Marks out of 25 |
|-------------|--|-----------------|
| Cognitive | Technical preparedness for practical | 05 |
| Davahamatar | Operating skills/Algorithm/ flowchart | 05 |
| Psychomotor | Observation/Logic/ Program/Result | 05 |
| | Discipline and punctuality | 05 |
| Affective | Procedure/ Safety Measures/ Decency/ Presentation | 05 |
| | 25 | |

ii) Progressive Skill Test:

One mid-term Progressive Skill Test of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment Pro-forma X*.

| Sr. No. | Criteria | Marks allotted |
|------------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algoritm/ Flowchart/ Program | 05 |
| 2 | Procedure followed to achieve the result | 05 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs, workmanship and Safety measures | 05 |
| 5 | Oral Based on Test | 05 |
| | Total | 25 |

^{*}Final marks of practical assignments shall be awarded as per Assessment Pro-forma X.

v) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. No | Criteria | Marks allotted |
|-----------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algoritm/ Flowchart/ Program | 10 |
| 2 | Procedure followed to achieve the result | 10 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 10 |
| 4 | Proper Graphs, workmanship and Safety measures | 10 |
| 5 | Oral | 10 |
| | Total | 50 |

^{*}Assessment at semester end practical exam as per Pro-forma IV

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

- 1. Online/Offline Lectures cum Discussions
- 2. Regular home assignments
- 3. Laboratory work

Teaching and Learning Resources:

1. Chalk board 2. Video clips 3.PPTs 4. Question Bank 5. Charts

REFERENCE MATERIAL:

a) Books / Journals / IS Codes

| Sr. No. | Author | Title | Publisher |
|------------|---------------|----------------------------|------------------------|
| 1. | Mike II P | Groove Industrial Robotics | McGraw Hill |
| 2. | R.J. Schiling | Fundamental of Robotics | Prentice Hall of India |
| 3. | R.D. Klafter | Robotics Engineering | Prentice Hall of India |

^{*} Assessment as per pro-forma-III

RATIONALE:

Globalization, liberalization and Privatization along with revolution in information technology have opened up new opportunities transforming lives of masses. In this context, there is an immense opportunity of establishing manufacturing, service, trading, marketing and consultancy enterprises by diploma engineer, Our fast growing economy provides ample scope for diploma engineers to succeed as an entrepreneur. Entrepreneurship requires distinct skill sets which are attempted to be developed through this course. To begin with, this course aims to develop the competency and the related outcomes in order to start small enterprises.

COMPETENCY:

The aim of this course is help the students to attain the following industry identified competency through various teaching & learning experiences:

Cognitive: i) Understanding and applying principles and labor laws ii) Observing iii) Classifying iv) Interpreting

Psychomotor: Man power handling.

E– External Examination

Affective: i) Follow the safe practices, ii) Practice good housekeeping iii) Maintain tool and equipment

COURSE OUTCOMES:

CCG501-1: Identify your entrepreneurial attributes

CCG501-2: Identify the business opportunities that suits you

CCG501-3: Use the support systems to zero down to your business idea.

CCG501-4: Develop comprehensive business plans.

CCG501-5:Prepare plans to manage the enterprise effectively.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX

[Note: Correlation levels: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| Programme Outcomes POs and PSOs | | | | | | | | | |

CONTENT:

i. PRACTICLAS / EXERCISES:

The practical's in this sections are the sub components of the COs to be developed and assessed in the students for the attainment of the competency.

| Sr. No. | Practical Outcomes (PrOs) | Unit Nos. | Approx Hrs. Required |
|------------|--|--------------|----------------------------|
| 1 | Submit a profile summary (about 500 words) of a successful entrepreneur indicating milestone achievement. | I | 02* |
| 2 | Undertaking SWOC analysis to arrive at your business idea of a product / service. | I | 02 |
| 3 | General business ideas (product / service) for intrapreneurial and entrepreneurial opportunities through brainstorming. | П | 02 |
| 4 | Undertake self-assessment test to discover your entrepreneurial opportunities. | П | 02* |
| 5 | Identify business opportunities/self-employments areassuitable for you. | П | 02 |
| 6 | Survey industries of your stream; grade them according to the level of scale of production, investment, turnover, pollution to prepare a report on it. | II | 02 |
| 7 | Visit a bank/Financial institution to enquire about various funding schemes for small scale enterprise. | III | 02* |
| 8 | Collect loan application forms of national banks/other financial institutions. | III | 02* |
| 9 | Compile the information from financial agencies that will help you set up your business enterprise. | III | 02* |
| 10 | Compile the information from government agencies that will help you set up your business enterprise. | III | 02* |
| 11 | Prepare Technological feasibility report of a chosen product/service. | III | 02* |
| 12 | Prepare a set of short term, medium and long term goals for starting a chosen small scale enterprise. | III | 02* |
| 13 | Prepare marketing strategy for your chosen product/service. | IV | 02* |
| 14 | Compile the information about insurance schemes covering different risk factors. | IV | 02 |
| 15 | Find the breakeven point for the business idea chosen by you. | V | 02 |
| 16 | Prepare a business plan for your chosen small scale enterprise. | V | 02* |
| 17. | Organize funfair for your class and write report of profit/loss. | V | 02 |
| 18. | Visit report of any industry:Brief history,types and details of services/support assistance being given,any other information which is useful to self-employer/entrepreneur. | V | 02 |

Note: A judicial mix of minimum 12 or more practical need to be performed, out of which, the Practical's marked as '*', are compulsory, so that the student reaches the 'Precision Level of

Dave's 'Psychomotor Domain Taxonomy' as generally required by the industry.

The above practical Outcomes also comprise the following social skills/attitudes which are Affective Domain Outcomes that are best developed through the laboratory/field based experiences:

- a. Follow safe practices
- b. Good housekeeping practices
- c. Practice energy conservation
- d. Demonstrate working as a leader/a team member
- e. Maintain tools and equipments
- f. Follow ethical practices

The Affective Domain Outcomes are not specific to any one Practical Outcomes, but are embedded in many Practical Outcomes. Hence, the acquisition of the Affective Domain Outcomes takes place gradually in the students when he/she undertake a series of practical experiences over a period of time.

ii) THEORY:

| Sr. No. | Topics / Sub-topics | Lectures (Hours) |
|------------|--|---------------------|
| 1 | Entrepreneurship Development- Concept and Scope 1.1 Concepts and Overview of Entrepreneurship. Evolution and Growth of Entrepreneurship in India. Role of Entrepreneurship in Economic Development. Entrepreneurship as a career. 1.2 Traits of successful intrapreneur / entrepreneur: Consistency, creativity, initiative, independent decision making, assertiveness, persuasion, persistence, information seeking, 1.3 Entrepreneurship: Scope in local and global market. 1.4 Intrapreneur and entrepreneur. 1.5 Types of enterprises and their features: Manufacturing, Service and trading. 1.6 Steps in Setting up of a business | 06 |
| 2 | Entrepreneurial Opportunities and Selection Process: | 08 |
| | 2.1Product / Service selection: Process, core competence, product / service | |
| | life cycle, new product / service development process, mortality curve, | |
| | Creativity and innovation in product / Service modification / development. | |
| | 2.2 Process selection: Technology life cycle, forms | |
| | and cost of transformation, Factors affecting | |
| | process selection, Location for an industry, | |
| | Material handling. | |
| | 2.3 Market study procedures: Questionnaire design, sampling, Market survey, Data analysis 2.4 Getting information from concerned stake holders such as Maharashtra Centre for Entrepreneurship Development (MCED), National Institute for Micro, Small and Medium Enterprises (NI-MSME, Prime Minister Employment Generation Program (PMEGP), Directorate of Industries (DI), Khadi Village Industries Commission (KVIC). | |

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | | |
|------------|---|---------------------|--|--|
| 3 | Support Systems: | | | |
| | 3.1 Categorization of MSME, Ancillary Industries | | | |
| | 3.2 Support system-Government Agencies: MCED, NI- MSME, PMEGP, DI, KVIC. | | | |
| | 3.3 Support agencies for entrepreneurship guidance, training, registration, technical | | | |
| | consolation, technology transfer and quality control, marketing and finance | | | |
| | 3.4 Breakeven point, return of investment and return on sales. | | | |
| 4 | BUSINESS PLAN PREPARATION: 4.1 Sources of Product for Business: Feasibility study. 4.2 Ownership, Capital, Budgeting, Matching Entrepreneur with the project, Feasibility report preparation and evaluation criteria. 4.3 Business plan preparation. | 06 | | |
| 5 | Managing Enterprise: 5.1 Unique Selling proposition (U.S.P.): Identification, Developing a marketing plan. 5.2 Preparing Strategies of handling Business: Policy making, negotiation and bargaining techniques. 5.3 Risk management: [planning for calculated risk taking, initiation with low cost projects, integrated futuristic planning, angel investors, venture capitalist. 5.4Incubation centers: Role and procedure. | 06 | | |

Performance Indicator: -

| Sr. No. | Performance Indicators | Weightage in % |
|------------|------------------------------|----------------|
| 1 | Leadership Skills | 20 |
| 2 | Team Work | 20 |
| 3 | Lateral / Creative Thinking | 10 |
| 4 | Observation and Recording | 10 |
| 5 | Self-learning | 20 |
| 6 | Answer the simple questions | 10 |
| 7 | Submission of report on time | 10 |
| | Total | 100 |

MAJOR EQUIPMENTS/INSTRUMENTS REQUIRED

The major equipment with broad specification mentioned here will user in uniformity in conduct of experiments, as well as aid to procedure equipment by authorities concerned.

| Sr. No. | Equipment Name with Broad Specifications | | | |
|------------|--|-----|--|--|
| 1 | Seminar Hall equipped with conference table, chairs and multimedia facilities. | All | | |
| 2 | Modern Desktop Computer with internet connection. | All | | |

SUGGESTED STUDENT ACTIVITY –Under Micro-Project

Other than the classroom and laboratory learning, following are the suggested student related Co-curricular activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should conduct following activities in group and prepare report of about 5 pages for each activity, also collect/record physical evident for their (student's) portfolio which will be useful for their placement interviews:

- a. Download product development and innovative films from internet.
- b. Prepare collage for "Traits of Successful entrepreneurs"
- c. Identify your hobbies and interests and convert them into business idea.
- d. Convert your project work into business.
- e. Decide any product and analyze its good and bad features.
- f. Choose any product and study its supply chain.
- g. Visit industry exhibitions, trade fairs and observe nitty-gritty of business.
- h. Perform a survey and identify local resources available for setting up of an enterprise.
- i. Conduct a market survey for a project. Collect data on machinery specifications, price, output/hr, power consumption, manpower requirement, wages, raw material requirement, specification, competitor's product price, features, dealer commissions, and marketing mix.
- j. Prepare a business plan and organize a business plan competition.

^{*} Assessment as per scheme given in Table-3 and Table -4 and convert these marks as per Proforma-I .E– External Examination

RATIONALE

This Industrial training (internship) is compulsorily introduced for all the diploma programmes to expose the students for a longer period to the industrial environment and develop the relevant good habits of industry culture among the students before they enter the industry. By exposing and interacting with the real life industrial setting, the students will appreciate and get accustomed to the actual working of an industry along with the best practices adopted by them. The industrial culture skills fall under soft skills, life skills and hands-on which will be inculcated among the students. Such a short exposure will be an effective association with the industry, for the students and will be instrumental in orienting them to be industry ready, to a much greater extent than the present ones, after completion of the respective diploma programme.

COMPETENCY

The course is intended to develop the following competencies:

• Soft Skills such as: Communication, Presentation etc.

- Life skills such as: Time management, Safety, Innovation, Entrepreneurship, Team building etc.
- Hands-on skills such as: Design, Implementation, Different operations, Quality Assurance etc.

COURSE OUTCOMES

The industrial training (internship) related competencies as mentioned above to supplement those attained through several courses up to fourth semester of the relevant programme can be achieved by the following course outcomes:

CCG502-1: Communicate effectively (verbal and equally written) the works carried out.

CCG502-2: Prepare and present the report of the works carried out.

CCG502-3: Exercise time management and safety in the work environment.

CCG502-4: Work effectively as a team member.

CCG502-5: Demonstrate various quality assurance skills.

Note: Both ESE and PA part of assessment will be carried out by institute faculty and industry training supervisor as explained in the relevant proforma of assessment.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX

[Note: Correlation levels: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | Programme Outcomes POs and PSOs | | | | | | | | |

1. GENERAL GUIDELINES FOR INDUSTRIAL TRAINING

- a) **Training during the programme:** Between 4th and 5th semester (During Summer Vacation).
- b) **Duration of the training:** four/three weeks
- c) **Training Area:** Students should be trained in large and medium scale Industry / Organization. However, despite the best efforts by the institute, if large and medium scale Industry / Organization are not available to all students then, students can also be placed in small scale Industry / Organization.
- d) These Industries / Organizations can be Government / Public limited / or Private family enterprises.

For *Civil engineering* it can be public works department, irrigation department, public health engineering, municipal corporations, town and country planning, highway and roads authorities, railways, large and medium scale civil contractors, rural engineering departments, environment corporations, large and medium scale private construction companies, mining companies etc.

For *Mechanical Engineering* it can be manufacturing, fabrication, foundry or processing industry which may include compressors, boilers, engines, heat exchangers, air conditioning and refrigeration plants, conveyors etc are either manufactured or used. Power plants, Railways, process plants, ordinance factories, textile factories, automobile manufacturers or major automobile workshops.

For *Electrical engineering* it can be electricity transmission and distribution companies, power generating stations, sub stations, railways, industries manufacturing electrical products which may include industry where large motors/transformers etc. are used, process plants, electrical contractors.

For *Electronic and Industrial Electronics engineering* it can be telecommunication companies, post and telegraph department, manufacturer of telecommunication product, manufacturers of control equipments, manufacturer of CNC machines, any manufacturing industry where electronic controls are used either in production process or in its products, computer hardware manufacturers, signal divisions of railways, etc.

For *IT* industries it can be any software developers, cyber security companies, web page developers, networking companies, data base management companies, telecommunication companies or IT division of any other industries/finance/retail companies or organizations where software are used and maintained for various applications.

For **Metallurgical Engineering** it may include documenting the work, operating the lab mixtures, preparation of specimens, Metallographic testing of specimens, assisting the senior engineers etc.

2. ROLE OF PARENT DEPARTMENT OF THE INSTITUTES

| Sr. No | | Activi | Schedule | | | |
|-----------|------------|-------------|----------|----------|---|---|
| 1 | Collecting | information | about | Industry | / | Before completion of 3 rd semester |

| | Organization available for training along with capacity (Format - 1) | |
|---|---|---|
| 2 | Student and mentor allocation as per the slots available for in-plant training (Desirable mentor-student ratio is 1:15) | Before commencement of 4 th semester |
| 3 | Communication with Industry / Organization available for training along with capacity and its confirmation | Before first Unit Test of the 4 th semester |
| 4 | Obtaining consent letter from parents / guardian (Format - 2) | Before second Unit Test of the 4 th semester |
| 5 | Student enrollment for In-plant training (Format-3) | Before commencement of 4 th semester examination |
| 6 | Issue letter to the Industry / Organization for the training along with details of students and mentors. (Format - 4) | During 4 th semester examination |
| 7 | Mentors to carry out progressive assessment of the students during the in-plant training (Format -5) | Each week of training |
| 8 | End of training assessment by mentor along with Industry / Organization expert as external examiner(Format - 6) | Before 5 th semester ESE |

Suggestions:

- a) Departments can take help of alumni or present students (if they or their parents or relatives have some contact in different industries) for securing placement.
- b) The students would normally be placed as per their choices, in case of more demand for a particular Industry / Organization students would be allocated place based on their relative merit. However, if some students have arranged training placement in some companies with the help of their parents/relatives etc. then they will be given preference for placement in those companies.
- c) Principal/HOD/Faculty should address students about industrial safety norms, rules and discipline to be maintained in the Industry / Organization during the training before relieving students for training.
- d) The faculty member during the visit to Industry / Organization will check the progress of the student in the training, his/ her attendance, discipline and project report preparation.

3. EXPECTATIONS FROM INDUSTRY

Helping the institute in developing the following competencies among students

- Soft Skills such as: Communication, Presentation etc.
- Life skills such as: Time management, Safety, Innovation, Entrepreneurship, Team building etc.
- Hands-on skills such as: Design, Implementation, Different operations, Quality Assurance etc.

4. ROLES AND RESPONSIBILITIES OF THE STUDENTS

Following should be informed to students in the letter deputing them for the training, an undertaking for this should also be taken from them

- a) Students would interact with the mentor to suggest choices for suitable Industry / Organization. If students have any contact in Industry / Organization (through their parents, relatives or friends) then same may be utilized for securing placement for themselves and their peers.
- b) Students have to fill the forms duly signed by authorities along with training letter and submit it to training officer in the industry on the first day of training. Student should also carry with him/her the Identity card issued by institute during training period.
- c) He/she will have to get all the necessary information from the training officer regarding schedule of the training, rules and regulations of the Industry / Organization and safety procedures to be followed. Student is expected to observe these rules, regulations, procedures.
- d) Students should know that if they break any rule of industry or do not follow the discipline then industry can terminate the training and sent back the students.
- e) It is the responsibility of the student to collect information from Industry / Organization about manufacturing processes / testing and quality assurance methods/specifications of machines and raw materials/maintenance procedures/ production planning/organizational structure etc.
- f) During the training period students have to keep record of all the useful information in Log book and maintain the weekly diary as provided and get it signed from mentor as well as Industry / Organization training in-charge.
- g) In case they face any major problem in industry such as an accident or any disciplinary issue then they should immediately report the same to the institute.
- h) Prepare final report about the training for submitting to the department at the time of presentation and viva-voce and get it signed from mentor as well as Industry / Organization training in-charge.

5. FORMAT FOR TRAINING REPORT

Following is the suggestive format for the training report, actual format may differ slightly depending upon the nature of Industry / Organization. The training report may contain the following

- Title page
- Certificate
- Abstract
- Acknowledgement
- Content Page
- Chapter 1. Organizational structure of Industry / Organization and General Lay Out
- Chapter 2. Introduction of Industry / Organization (Type of products and services, history, turn over and number of employees etc.)
- Chapter 3. Types of major equipment/instruments/ machines used in industry with their specification, approximate cost and specific use and their routine maintenance.
- Chapter 4. Manufacturing Processes along with production planning and control methods.
- Chapter 5. Testing of raw materials, components and finished products along with quality assurance procedures.
- Chapter 6. Major material handling product (lifts, cranes, slings, pulleys, jacks, conveyor belts etc.) and material handling procedures.

- Chapter 7. Safety procedures followed and safety gear used (includes Preventive maintenance schedule and breakdown maintenance procedures).
- Chapter 8. Particulars of Practical Experiences in Industry / Organization if any in Production/ Assembly/ Testing/Maintenance.
- Chapter 9. Short report/description of the project (if any done during the training)
- Chapter 10. Special/challenging experiences encountered during training if any (may include students liking & disliking of work places)

References /Bibliography

6. SUGGESTED LEARNING STRATEGIES

Students should visit the website of the industry where they are undergoing training to collect information about products, processes, capacity, number of employees, turnover etc. They should also refer the handbooks of the major machines and operation, testing, quality control and testing manuals used in the industry. Students may also visit websites related to other industries wherein similar products are being manufactured as their learning resource.

7. TENTATIVE WEEK-WISE SCHEDULE OF INDUSTRIAL TRAINING

The industrial training is a common course to all programmes; therefore the industry / Organization selection will depend upon the nature of programme and its related industry. The training activity may vary according to nature and size of Industry / Organization. The following table details suggestive schedule for industrial training for all programmes.

Table - 2 Detail week schedule and Marks distribution

Details of activities to be completed during Marks distribution/ Week No

| ъ. | week no. | Details of activities to be completed during | Marks distribution/ |
|------|------------------|---|---------------------|

RATIONALE

This Industrial training (internship) is compulsorily introduced for all the diploma programme to expose the students for a longer period to the industrial environment and develop the relevant good habits of industry culture among the students before they enter the industry. By exposing and interacting with the real life industrial setting, the students will appreciate and get accustomed to the actual working of an industry along with the best practices adopted by them. The industrial culture skills fall under soft skills, life skills and hands-on which will be inculcated among the students. Such a short exposure will be an effective association with the industry, for the students and will be instrumental in orienting them to be industry ready, to a much greater extent than the present ones, after completion of the respective diploma programme.

COMPETENCY

The course is intended to develop the following competencies:

• Soft Skills such as: Communication, Presentation etc.

- Life skills such as: Time management, Safety, Innovation, Entrepreneurship, Team building etc.
- Hands-on skills such as: Design, Implementation, Different operations, Quality Assurance etc.

COURSE OUTCOMES

The industrial training (internship) related competencies as mentioned above to supplement those attained through several courses up to fourth semester of the relevant programme can be achieved by the following course outcomes:

CCG503-1: Communicate effectively (verbal and equally written) the works carried out.

CCG503-2: Prepare and present the report of the works carried out.

CCG503-3: Exercise time management and safety in the work environment.

CCG503-4: Work effectively as a team member.

CCG503-5: Demonstrate various quality assurance skills.

Note: Both ESE and PA part of assessment will be carried out by institute faculty and industry training supervisor as explained in the relevant proforma of assessment.

GENERAL GUIDELINES FOR INDUSTRIAL TRAINING

- a) **Training during the programme:** After 5th semester (During Winter Vacation).
- b) **Duration of the training:** Three weeks
- c) **Training Area:** Students should be trained in large and medium scale Industry / Organization. However, despite the best efforts by the institute, if large and medium scale Industry / Organization are not available to all students then, students can also be placed in small scale Industry / Organization.
- d) These Industries / Organizations can be Government / Public limited / or Private family enterprises.

For *Civil engineering* it can be public works department, irrigation department, public health engineering, municipal corporations, town and country planning, highway and roads authorities, railways, large and medium scale civil contractors, rural engineering departments, environment corporations, large and medium scale private construction companies, mining companies etc.

For *Mechanical Engineering* it can be manufacturing, fabrication, foundry or processing industry which may include compressors, boilers, engines, heat exchangers, air conditioning and refrigeration plants, conveyors etc are either manufactured or used. Power plants, Railways, process plants, ordinance factories, textile factories, automobile manufacturers or major automobile workshops.

For *Electrical engineering* it can be electricity transmission and distribution companies, power generating stations, sub stations, railways, industries manufacturing electrical products which may include industry where large motors/transformers etc. are used, process plants, electrical contractors.

For *Electronic and Industrial Electronics engineering* it can be telecommunication companies, post and telegraph department, manufacturer of telecommunication product, manufacturers of control equipments, manufacturer of CNC machines, any manufacturing industry where electronic controls are used either in production process or in its products, computer hardware manufacturers, signal divisions of railways, etc.

For *IT* industries it can be any software developers, cyber security companies, web page developers, networking companies, data base management companies, telecommunication companies or IT division of any other industries/finance/retail companies or organizations where software are used and maintained for various applications.

For **Metallurgical Engineering** it may include documenting the work, operating the lab mixtures, preparation of specimens, Metallographic testing of specimens, assisting the senior engineers etc.

ROLE OF PARENT DEPARTMENT OF THE INSTITUTES

| Sr. No | Activity | Schedule |
|-----------|---|---|
| 1 | Collecting information about Industry / Organization available for training along with capacity (Format - 1) | Before completion of 4 th semester |
| 2 | Student and mentor allocation as per the slots available for in-plant training (Desirable mentor-student ratio is 1:15) | Before commencement of 5 th semester |
| 3 | Communication with Industry / Organization available for training along with capacity and its confirmation | Before first Unit Test of the 5 th semester |
| 4 | Obtaining consent letter from parents / guardian (Format - 2) | Before second Unit Test of the 5 th semester |
| 5 | Student enrollment for In-plant training (Format- 3) | Before commencement of 5 th semester examination |
| 6 | Issue letter to the Industry / Organization for the training along with details of students and mentors. (Format - 4) | During 5 th semester examination |
| 7 | Mentors to carry out progressive assessment of the students during the in-plant training (Format - 5) | Each week of training |
| 8 | End of training assessment by mentor along with Industry / Organization expert as external examiner(Format - 6) | After 5 th semester ESE |

Suggestions:

- a) Departments can take help of alumni or present students (if they or their parents or relatives have some contact in different industries) for securing placement.
- b) The students would normally be placed as per their choices, in case of more demand for a particular Industry / Organization students would be allocated place based on their relative merit. However, if some students have arranged training placement in some companies with the help of their parents/relatives etc. then they will be given preference for placement in those companies.
- c) Principal/HOD/Faculty should address students about industrial safety norms, rules and discipline to be maintained in the Industry / Organization during the training before relieving students for training.
- d) The faculty member during the visit to Industry / Organization will check the progress of the student in the training, his/ her attendance, discipline and project report preparation.

EXPECTATIONS FROM INDUSTRY

Helping the institute in developing the following competencies among students

- Soft Skills such as: Communication, Presentation etc.
- Life skills such as: Time management, Safety, Innovation, Entrepreneurship, Team building etc.
- Hands-on skills such as: Design, Implementation, Different operations, Quality Assurance etc.

ROLES AND RESPONSIBILITIES OF THE STUDENTS

Following should be informed to students in the letter deputing them for the training, an undertaking for this should also be taken from them

- a) Students would interact with the mentor to suggest choices for suitable Industry / Organization. If students have any contact in Industry / Organization (through their parents, relatives or friends) then same may be utilized for securing placement for themselves and their peers.
- b) Students have to fill the forms duly signed by authorities along with training letter and submit it to training officer in the industry on the first day of training. Student should also carry with him/her the Identity card issued by institute during training period.
- c) He/she will have to get all the necessary information from the training officer regarding schedule of the training, rules and regulations of the Industry / Organization and safety procedures to be followed. Student is expected to observe these rules, regulations, procedures.
- d) Students should know that if they break any rule of industry or do not follow the discipline then industry can terminate the training and sent back the students.
- e) It is the responsibility of the student to collect information from Industry / Organization about manufacturing processes / testing and quality assurance methods/specifications of machines and raw materials/maintenance procedures/ production planning/organizational structure etc.
- f) During the training period students have to keep record of all the useful information in Log book and maintain the weekly diary as provided and get it signed from mentor as well as Industry / Organization training in-charge.
- g) In case they face any major problem in industry such as an accident or any disciplinary issue then they should immediately report the same to the institute.
- h) Prepare final report about the training for submitting to the department at the time of presentation and viva-voce and get it signed from mentor as well as Industry / Organization training in-charge.

FORMAT FOR TRAINING REPORT

Following is the suggestive format for the training report, actual format may differ slightly depending upon the nature of Industry / Organization. The training report may contain the following

- Title page
- Certificate
- Abstract
- Acknowledgement
- Content Page

Chapter 11. Organizational structure of Industry / Organization and General Lay Out

- Chapter 12. Introduction of Industry / Organization (Type of products and services, history, turn over and number of employees etc.)
- Chapter 13. Types of major equipment/instruments/ machines used in industry with their specification, approximate cost and specific use and their routine maintenance.
- Chapter 14. Manufacturing Processes along with production planning and control methods.
- Chapter 15. Testing of raw materials, components and finished products along with quality assurance procedures.

- Chapter 16. Major material handling product (lifts, cranes, slings, pulleys, jacks, conveyor belts etc.) and material handling procedures.
- Chapter 17. Safety procedures followed and safety gear used (includes Preventive maintenance schedule and breakdown maintenance procedures).
- Chapter 18. Particulars of Practical Experiences in Industry / Organization if any in Production/ Assembly/ Testing/Maintenance.
- Chapter 19. Short report/description of the project (if any done during the training)
- Chapter 20. Special/challenging experiences encountered during training if any (may include students liking & disliking of work places)

References / Bibliography

SUGGESTED LEARNING STRATEGIES

Students should visit the website of the industry where they are undergoing training to collect information about products, processes, capacity, number of employees, turnover etc. They should also refer the handbooks of the major machines and operation, testing, quality control and testing manuals used in the industry. Students may also visit websites related to other industries wherein similar products are being manufactured as their learning resource.

TENTATIVE WEEK-WISE SCHEDULE OF INDUSTRIAL TRAINING

The industrial training is a common course to all programmes; therefore the industry / Organization selection will depend upon the nature of programme and its related industry. The training activity may vary according to nature and size of Industry / Organization. The following table details suggestive schedule for industrial training for all programmes

Table - 2 Detail week schedule and Marks distribution

Assessment as per Pro-forma IV

I-Internal examination

RATIONALE:

Over the years the design and construction of electronic devices and circuits have changed dramatically. The needs of the technician and experimenter have also changed over the years. In order to construct industrial circuits, engineer has to have a firm grasp of the fundamentals of power electronics. The background required is familiarity with basic power electronic concepts. Industrial electronics aspect is introduced to cater specifically the needs of students of Industrial Electronics power transformation. This subject is important link between basic electricity and advanced electronic applications .This subject shall provide firm foundation for many industrial applications and processes.

COMPETENCY:

Analyze various power electronic devices and power converters for various applications

Cognitive: Understand power electronics non latching devices and different converters.

Psychomotor: Design, model, build and test the operation of simple power electronic circuits in a lab

environment

Affective: Attitude of i) logic ii) accuracy iii) design skills v) creativity.

COURSE OUTCOMES:

IEG504-1 Study fast switching devices based on their control facility in industrial aspects

IEG504-2 Identify various types of power conversion techniques in real life application

IEG504-3 Analyze and Select proper AC or DC voltagae regulator.

IEG504-4 Use Inverters with multidisciplinary factors to solve industrial problems

IEG504-5 Apply basic principle of power electronics and power conversion techniques for various industrial application

IEG504-6 Use different protection circuits for safety.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels:1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | Programme Outcomes POs and PSOs | | | | | | | | |
|---|---|-----------------------------|---|--|--|-----------------------------------|------|------------------------------------|---|
| Competency and Cos | PO 1 Basic and Discipline specific knowledge | PO 2 Problem Analysis | PO 3 Design / Development of solutions | PO 4 Engineering Tools, Experimenta tion and Testing | PO 5 Engineering Practices for society, sustainability and Environment | PO 6 Project Manageme nt | long | PSO1 Operate and Maintain | PSO2 Supervision and Providing Solution |
| Competency: Understand power electronics non latching devices and different converters. | 1 | 1 | 1 | 1 | - | - | - | 3 | 3 |
| IEG504-1 | 1 | 1 | 2 | - | - | - | - | 2 | 2 |
| IEG 504-2 | 1 | 3 | 2 | - | 1 | - | - | 2 | 2 |
| IEG 504-3 | - | 3 | 2 | 1 | - | - | - | 2 | 2 |
| IEG 504-4 | 1 | 2 | 2 | 1 | - | - | - | 3 | 3 |
| IEG 504-5 | 1 | 2 | 2 | 1 | - | - | - | 3 | 3 |
| IEG 504-6 | 3 | 3 | - | - | - | - | - | 3 | 3 |

PSO 1: Operate and Maintain: Competency to apply the concepts of Industrial Electronics in the operation and maintenance of engineering application systems.

PSO 2: Supervision and providing solution: Ability to supervise work and reach appropriate solution to simple practical problems in Industrial Electronics engineering industry.

CONTENT:

F) SUGGESTED PRACTICAL'S/EXERCISE

A.1 Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any '10' experiments out of which microproject is compusory).

| Sr. No. | Title of the Lab Work | Skills developed | Course Outcome |
|------------|--|---|-------------------|
| 1 | Characteristics of power transistor | i)To Analyze principal of operation of power transistor & characteristics of it.ii) To plot the characteristics. | IEG504-1 |
| 2 | Characteristics of IGBT. | i)To Analyze principal of operation of IGBT & characteristics of it.ii) To plot the characteristics | IEG504-1 |
| 3 | Characteristics of MOSFET. | i)To Analyze principal of operation of MOSFET& characteristics of itii) To plot the characteristics | IEG504-1 |
| 4 | Study of step-up chopper | i)To Analyze principal of operation of step up chopper. | IEG504-2 |
| 5 | Study of step-down chopper. | i)To Analyze principal of operation of step down chopper. | IEG504-2 |
| 6 | Study of Morgans chopper. | i)To discover the working of Morgans chopper. | IEG504-2 |
| 7 | Study of single phase to single phase cycloconverter | To discover the working of single phase to single phase cycloconverter | IEG504-2 |
| 8 | Study of single phase to three phase cycloconverter | To discover the working of single phase to three phase cycloconverter | IEG504-2 |
| 9 | Study of thtee phase to three phase cycloconverter | To discover the working of three phase to three phase cycloconverter | IEG504-2 |

| 10 | Study of SMPS. | i)To study principal of operation of SMPS. | IEG504-3 |
|----|-----------------------------|--|----------|
| 11 | Study of series inverter. | i)To Analyze principal of operation of series inverter. | IEG504-4 |
| 12 | Study of parallel inverter. | i)To Analyze principal of operation of parallel inverter. | IEG504-4 |
| 13 | Study of bridge inverter. | i)To Analyze principal of operation of parallel inverter. | IEG504-4 |
| 14 | Study of UPS. | i)To understand principal of operation of UPS. | IEG504-5 |
| 15 | Study of snubber circuit | i)To Analyze principal of operation of protection circuit. | IEG504-6 |

A.2 Micro-project

Each student should allotted one microproject in the beginning of the semester. In 2nd and 4th semester the microprojects are group based (group of 3 students) and in 5th and 6th semesters it should be preferably individualy undertaken. Each microproject should encompass two or more COs.

Each student have to maintain dated work diary consisting of individual contribution in the microproject work.

Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of microprojects is as follows:

- a) Build and test Chopper using UJT relaxation oscillator.
- b) Build and test Chopper using PUT relaxation oscillator.
- c) Construct and test transistorized inverter
- d) Build and test single phase to single phase cycloconverter
- e) Construct cycloconverters using thyristors.
- f) Inductor circuit breaker
- g) Simulation of any above project using MATLAB
- h) Any other than this list

G) THEORY:

SECTION I

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluation (Marks) |
|------------|--|---------------------|---------------------------------|
| IEG: | 504-1 Study fast switching devices based on their control f | facility in in | dustrial |
| 1 | Non Latching Devices: 1.1 power MOSFET, IGBT,GTO 1.2 Constructional details, operating principle and characteristics of above. 1.3 Study of above devices with reference to the parameters: 1.3.1 Voltage and current rating 1.3.2 Turn on and turn off time 1.3.3 leakage current 1.4 List of applications of above devices | 08 | 12 |
| | 504- 2 Identify various types of power conversion technique cation | | |
| | Chopper (Dc to dc converter) 2.1 Basic block diagram, operating principle. 2.2 Classification of choppers on the basis of: 2.2.1 output voltage – step up & step down 2.2.2 Commutation method – series turn off & parallel turn Off 2.2.3 Quadrant of operation single quadrant, two quadrant, four quadrant, Jones chopper Circuit Operating principle, Applications of choppers 2.3 Cyclo-Converters 2.3.1 Cycloconverters operation 2.3.2 Single phase to single phase cycloconverter 2.3.3 Single phase to bridge Cycloconverters 2.3.4 Three phase to single phase cycloconverter 2.3.5 Three phase to three phase cycloconverter | 08 | 16 |

| G504-3 Analyze and Select proper AC or DC voltagae regula | itor. | |
|--|-------|----|
| AC & DC voltage regulator 3.1 Ac voltage regulator 3.1.1 Need of ac voltage regulator (power line disturbances) 3.1.2 Regulator types: Relay type, servo type, Resonant type, solid state type (tap changing & phase control) 3.1.3 Circuit diagram, operating principle, applications of above types, Specifications 3.2 Switching regulator (SMPS) 3.2.1 Need 3.2.2 Power supply requirements: Regulated output, isolation, multiple outputs, efficiency, size, weight 3.2.3 Review of linear regulator 3.2.4 SMPS: Block diagram | 08 | 12 |

Section II

| Sr. No. | Topics | Teaching hours | Marks |
|------------|--|----------------|---------|
| II | E G504 -4 Use Inverters with multidisciplinary factors to solv | e industrial p | roblems |
| 4. | DC to AC converter (Inverter) | | |
| | 4.1 Basic principle of inverter 4.2 Classification on the basis of | 10 | 18 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

h) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain | Particulars | Marks out of 25 | |
|-------------|---|-----------------|--|
| Cognitive | Technical preparedness for practical | 05 | |
| Davahamatan | Operating skills/ Algorithm/ flowchart | 05 | |
| Psychomotor | Observation/ Logic/ Program/ Result | 05 | |
| | Discipline and punctuality | 05 | |
| Affective | Procedure/ Safety Measures/ Decency/ Presentation | 05 | |
| | TOTAL | | |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment Pro-forma X*.

| Sr. No. | Criteria | Marks allotted |
|------------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algoritm/ Flowchart/ Program | 05 |
| 2 | Observations, Result, Output | 05 |
| 3 | Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs & Procedure / workmanship and Safety measures | 05 |
| 5 | Oral Based on Term Work | 05 |
| | Total | 25 |

^{*}Final marks of practical assignments shall be awarded as per Assessment Pro-forma X

i) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. no | Criteria | Marks allotted |
|-----------|---|----------------|
| 1 | Technical ability | 10 |
| 2 | Correct figures / diagrams/ Logic | 10 |
| 3 | Observation table/ Algorithm/ flowchart/ Program | 10 |
| 4 | Correctness of - Result / Output / Calculations / Graphs | 10 |
| 5 | Safety / Use of proper tools / overall Decency & Presentation / Workmanship | 10 |
| | Total | 50 |

*Assessment at semester end

practical exam as per Pro-forma I.

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

1. Lectures cum Discussions 2. Regular home assignments 3. Laboratory work

Teaching and Learning Resources:

1. Chalk board 2. Video clips 3.PPTs 4. Question Bank 5. Charts

^{*} I-Internal Assessment *Assessment at semester end practical exam as per Pro-forma IV.

RATIONALE:

In industry, many manufacturing processes demand a sequence of operation, which are to be performed repetitively. Early automation systems were mechanical in design, timing and sequencing being effected by gears and cams. Slowly these design concepts were replaced by electrical drives which were controlled by relays and now by programmable logic controllers (PLCs).

A PLC is a solid state device, designed to operate in noisy industrial environments and can perform all logic functions. PLCs are widely used in all industries for efficient control operations. A diploma holder in industry is called upon to design, modify and troubleshoot such control circuits. Looking at the industrial applications of PLCs in the modern industry, this subject finds its usefulness in the present curriculum.

COMPETENCY:

Maintain industrial automation circuitry based on PLC.

Cognitive : Select specific PLC and provide solution for wide range of application. **Psychomotor :** Maintain and operate PLC for wide range of industrial applications.

Affective: Attitude of i) Logic ii) accuracy iii) precision v) punctuality

COURSE OUTCOMES:

IEG 505-1 Identify various components PLC and illustrate their function

IEG 505-2 Select PLC input and output modules as per need of application

IEG 505-3 Identify and use different types of instructions set in PLC.

IEG 505-4 Develop ladder diagrams for various simple applications

IEG 505-5 Develop ladder diagrams for various advanced industrial and engineering applications

IEG 505-6 Install and Troubleshoot PLC

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX

[Note: Correlation levels: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | Programme Outcomes POs and PSOs | | | | | | | | |
|--|--|-----------------------------|---|---|--|-----------------------------------|------|------------------------------------|---|

PSO 1: Operate and Maintain: Competency to apply the concepts of industrial electronics in the operation and maintenance of engineering application systems.

PSO 2: Supervision and providing solution: Ability to supervise work and reach appropriate solution to simple practical problems in industrial electronics engineering industry.

CONTENT:

H) SUGGESTED PRACTICAL'S/EXERCISE

A.1 Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of

the competency (any 10 out of 15 experiments).

| Sr No. | Title of Practical Exercise | Skills / Competencies to be developed | Course Outcome |
|-----------|--|--|-------------------|
| 1. | PLC Architecture and PLC Software Installation | Analyze different parts of PLC and able to install software required for different PLC. | IEG 505-1 |
| 2. | Logic gates by using PLC. | Write and Verify truth table of Logic gates by execution of ladder program | IEG 505-4 |
| 3. | Boolean Algebra | Verify Boolean equations by execution of ladder program | IEG 505-4 |
| 4. | Blinking of LED's | Write and verify ladder program for blinking by using timer. | IEG 505-5 |
| 5. | Sequential ON-Off control of Lamps | Write and verify ladder program for traffic signal control for two directions | IEG 505-4,5 |
| 6. | Elevator Control | Write and verify ladder program for elevator control | IEG 505-4,5 |
| 7. | Tank Level controller | Write and verify ladder program for tank level control | IEG 505-4,5 |
| 8. | Counters for pulse counting using limit switch/ proximity sensor | Write and verify ladder program for object counter using counter | IEG 505-4,5 |
| 9. | Analog sensor interfacing with PLC. | Write and verify ladder program for any analog sensor such as RTD, thermocouple, thumbwheel switch, etc | IEG 505-4,5 |
| 10. | AC Motor control by VVFD | Write, verify and control speed of any AC motor available by using VVFD | IEG 505-4,5 |
| 11. | DC Motor Control | Write, verify and control speed of any AC motor available. | IEG 505-4,5 |
| 12. | Automated car parking system. | Develop /test ladder program for automated car parking system. | IEG 505-3,5 |
| 13. | Stepper motor rotation | Develop / test ladder program for rotating stepper motor in forward and reverse direction at constant speed. | IEG 505-3,5 |
| 14. | SCADA Simulator | Use various functions of SCADA simulator editor to develop simple program | IEG 505-6 |
| 15. | Tank level controller mimic diagram using SCADA | Develop a SCADA mimic diagram for Tank level control. | IEG 505-6 |

A.2 Micro-project

Each student should allotted one microproject in the beginning of the semester. In 5th and 6th semesters it should be preferably individually undertaken. Each microproject should encompass two or more COs.

Each student have to maintain dated work diary consisting of individual contribution in the microproject work.

Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of microprojects is as follows:

A suggestive list of micro-projects is given here. Similar micro-projects could be added by the concerned faculty:

- a) **Automatic street light controller:** Prepare a PLC based system to control the street light as per the intensity of natural light.
- b) Automatic agriculture irrigation system: Prepare a PLC based system to control drip irrigation.
- c) **Railway gate automation:** Prepare a PLC and SCADA based system to open or close the proto type railway gate automatically.
- d) **Home automation:** Implement the versatile automation system for home that can automate any three home appliances.
- e) **Bottle filling station:** Prepare a PLC and SCADA based system for proto type bottle filling station.
- f) Troubleshoot the Fault Equipment/Kit available in automation Laboratory.

| | 6.3.2 Various editors of SCADA | | |
| | Sub-Total | 24 | 40 |
| | Total | 48 | 80 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

Specification table for setting question paper for semester end theory examination:

| Tonio | | Distribution of | Distribution of marks (Cognitive level-wise) | | | |
|--------------|--------------------------------------|-----------------|--|----|-------------------|----------------|
| Topic No. | Name of topic | Remember | Remember Understand | | Course Outcome | Total Marks |
| 1 | PLC Fundamentals | 4 | 4 | 6 | IEG 505-1 | 14 |
| 2 | PLC Hardware | 4 | 4 | 4 | IEG 505-2 | 12 |
| 3 | PLC Instruction Set | 2 | 6 | 6 | IEG 505-3 | 14 |
| 4 | PLC Programming | 2 | 2 | 10 | IEG 505-4 | 14 |
| 5 | PLC Applications | - | 4 | 10 | IEG 505-5 | 14 |
| 6 | PLC installation and Troubleshooting | 2 | 4 | 6 | IEG 505-6 | 12 |
| | TOTAL | 14 | 24 | 42 | | 80 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

a) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain | Particulars | Marks out of 25 | |
|-----------|--------------------------------------|-----------------|--|
| Cognitive | Technical preparedness for practical | 05 | |

| Develometer | Operating skills/Algorithm/ flowchart | 05 |
|-------------|---------------------------------------|----|
| Psychomotor | Observation/Logic/ | 05 |
| | Program/Result | 03 |
| | Discipline and punctuality | 05 |
| A CC adian | Procedure/ Safety | |
| Affective | Measures/ Decency/ | 05 |
| | Presentation | |
| | 25 | |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment Pro-forma IV*.

| Sr. No. | Criteria | Marks allotted |
|------------|--|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algorithm/ Flowchart/ Program | 05 |
| 2 | Procedure followed to achieve the result | 05 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs, workmanship and Safety measures | 05 |
| 5 | Oral Based on Test | 05 |
| | Total | 25 |

^{*}Final marks of practical assignments shall be awarded as per Assessment Pro-forma IV.

iii) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. No | Criteria | Marks allotted |
|-----------|--|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algorithm/ Flowchart/ Program | 10 |
| 2 | Procedure followed to achieve the result | 10 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 10 |
| 4 | Proper Graphs, workmanship and Safety measures | 10 |
| 5 | Oral | 10 |
| | Total | 50 |

^{*}Assessment at semester end practical exam as per Pro-forma IV.

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

- 1. Online/Offline Lectures cum Discussions
- 2. Regular home assignments
- 3. Laboratory work

Teaching and Learning Resources:

1. Chalk board 2. Video clips 3.PPTs 4. Question Bank 5. Charts

REFERENCE MATERIAL:

a) Books / Codes

| Sr. No. | Author | Title | Publisher |

^{*} E-External Assessment *Assessment at semester end practical exam as per Pro-forma I.

RATIONALE:

In the field of Electronics Technology various technologies (hardware and Software) needs to be integrated and proper paradigms needs to be implemented to develop any kind of electronic system. Hence it becomes essential to get hands on experience for developing industrial applications. This course 'Project II' is the continuation of the previous semester course on 'Project-1'. So, in this semester, the students are to implement the detailed Project Plan, which they have prepared in the preceding semester. This subject is essential to understand the implementation of the system development process i.e. analyze, design, coding, debugging and testing.

COMPETENCY:

Implement the Project Plan to solve the identified problem/task faced by industry/user by integrating the various types of skills acquired during the programme.

Cognitive: Take appropriate decisions based on collected and analysed information.

Psychomotor: Operate and Maintain of a prototype for an industrial applications

Affective: Attitude of i) Leadership ii) Innovativeness iii) Logic iv) accuracy v) precision v) punctuality

COURSE OUTCOMES:

EIG 506-1 Implement the planned activity individually and/or as team..

EIG 506-2 Select, collect and use required information/knowledge to solve the problem/complete the task.

EIG 506-3 Troubleshoot the hardware and software of designed system.

EIG 506-4 Communicate effectively and confidently as a member and leader of team.

EIG 506-5 Prepare and present project proposals/project/seminar report.

EIG 506-6 Ensure the quality of product and assess impact on society(if any).

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | Programme Outcomes POs and PSOs | | | | | | | | |
|---|--|-----------------------------|---|--|--|-----------------------------------|------|------------------------------------|---|
| Competency and Cos | PO 1 Basic and Discipline specific knowledge | PO 2 Problem Analysis | PO 3 Design / Development of solutions | PO 4 Engineering Tools, Experimenta tion and Testing | PO 5 Engineering Practices for society, sustainability and Environment | PO 6 Project Managemen t | long | PSO1 Operate and Maintain | PSO2 Supervision and Providing Solution |
| Competency:Plan innovative/creative solutions to solve/complete the identified problems/task/shortcomings | - | 2 | 3 | 2 | 2 | 3 | 1 | 3 | 3 |
| EIG 506-1 | - | 2 | 2 | 1 | 2 | - | - | - | 2 |

| EIG 506-3 | i | 2 | 3 | 2 | 2 | 2 | - | 2 | 3 |
| EIG 506-4 | - | - | - | - | - | 2 | - | 3 | 3 |
| EIG 506-5 | - | 1 | 2 | 2 | - | 1 | - | 2 | 2 |
| EIG 506-6 | - | 2 | 1 | - | 2 | - | 1 | - | - |

COURSE DETAILS:

The students should revise the Project - Plan' based on the feedback received in the fifth semester examination.

This revised 'Project - Plan' would be again approved by the project guide. As soon as the revised plan is approved by the teacher, the student will begin to work according to it and would also continue to maintain a dated 'Project Diary' for the whole semester. This is a sort of a 'weekly diary' indicating all

the activities conducted by the student every week in the semester to complete the project. This 'Project Diary' should be got signed by the teacher at regular intervals for progressive assessment. If this is maintained sincerely and truthfully by the student, it will be very helpful in compiling the *Final Project Report* at the end of the semester by him/her.

GUIDELINES FOR UNDERTAKING THE PROJECT:

(i) Project activity calendar should be prepared by project co-ordinator and should be displayed to students w.r.t following points.

Students are advised to plan their project work w.r.t following stages

| Stage | Major Learning Acivities | Description of Activity |
|----------------|--------------------------------|--|
| Stage-I | a) Build actual PCB from | 1.1 Physical creation of Printed Circuit |
| Create | the PCB layout design. | Board |
| PCB/Write | b) Identify components and | 1.2 Verification of Component ratings |
| Program | assure their ratings | and specifications |
| Codes | c) Write actual code from | 1.3 Develop the flowchart for |
| | algorithm | program nd write the code. |
| Stage- II | a) Check all tracks | 2.1 Continuity test for PCB tracks |
| Component | for continuity | 2.2 Mounting and |
| Mounting and | b) Mount and solder components | Soldering component on |
| soldering/rect | on PCB | PCB |
| ification of | c) Run program modules and | 2.3 Execute program modules and |
| syntax errors | check for syntax errors | debugging for syntax errors |
| Stage- III | a) Unit Testing of software | 3.1 Debug system modules for logical |
| Software | b) Program testing | errors |
| Testing and | c) Loading program on chip/ | 3.2 Test program as a whole after |
| Loading/ | on system | linking modules to main program |
| Hardware Test | | 3.3 Test program and load on chip/on |
| | | system |
| | | 3.4 Test Hardware circuit if softwareis |
| | | not there in scope of project |
| Stage – IV | a) Execute program | 4.1 Execute loaded program on actual |
| Final | b) Test for various inputs | hardware and observe response. |
| Implementati | c) Troubleshoot final | 4.2 Test hardware behavior for all |
| on | hardware/software | possible inputs to the circuit. |
| | | 4.3 Troubleshoot hardware/software |
| | | for unexpected/faulty behaviour |
| | | 4.4 Correct Hardware/software and |
| | | execute the program until getting |
| | | desired/expected response. |
| Stage - V | 5.a. Prepare model design | 5.1 Design model and |
| Model design | 5.b. Create model | 5.2 Create list of requirement for |
| | 5.c. Test Model | implementation of model |
| | | 5.3 fabricate and construct model |
| | | Connect circuit responses to modeland test |
| | | model for its working |
| | | |

| STAGE - 6 | j) Prepare project report. 6.1 Prepare project report as per |
|----------------------|--|
| Documentation | k) Prepare PPT presentation prescribed format given by |
| and presenation | Present project work department/guide. |
| _ | 6.2 Prepare PPT and present as per |
| | schedule. |
| | 6.3 Demonstrate with model |

(ii) Project report:

At the end of sixth Semester, the student will prepare a Project Report with the following sub-titles:

- Title page (with name of team members and mentor teacher)
- Certificate (in the Format given as per departement)
- Acknowledgements (this may need revision at the end of the final semester)
- Abstract (in one paragraph not more than 150 words)
- Content Page
- Chapters

Chapter-I Introduction (background of the Industry or User based Problem/Task)

Chapter-2 Literature Survey (to finalise and define the Problem Statement)

Chapter-3 Scope of the project

Chapter-4 Methodology

Chapter-6 Results and Applications

Chapter-7 Conclusions and future scope

- Appendix (if any)
- References and Bibliography

The report should contain as many diagrams, figures and charts etc as relevant for the project.

Originality of the report (written in own words) would be given more importance rather than quality of printing and use of glossy paper or multi-colour printing.

Continous Assessment (CA) Guidelines and Criteria

Project guide is supposed to carry out this assessment. It is a continuous process, during which for developing desired qualities in the students, faculty should orally give **informal feedback** to students about their performance and interpersonal behaviour while guiding them on their project work every week. Following criteria should be considered while assessing students informally or formally during different stages of the project work.

The following factors need consideration for both Project-1 and Project-2 .Report Writing.

- a) Students should be assessed during the project work so that students can also get feedback for further improvement.
- b) It should be kept in mind that project work is mainly experiential learning and it is not the research work, so emphasis should be on work based learning or learning from experience and development of attitudes and skills as mentioned in course outcomes. So focus of assessment should also be on learning from the process of completing project work rather than on novelty or innovation in the project work.
- c) For continuous assessment at the end, students should be asked to give the power point presentation before group of teachers and junior students (so that junior students may also get awareness about the major project work they have to carry out in future)
- d) The students would be awarded marks for their efforts (In some cases it may happen that

due to some reasons such as unavailability of some material or component or some other resources, students may not be able to complete the project, but they have tried their best, in such cases students would be given appropriate marks if they have done enough efforts.)

- e) The students would not be awarded marks if they have completed the project by getting done the work from market or some professionals (taking some help and guidance is different as compared to getting the work or maximum part of the work completed from others on payment basis).
- f) Originality of the report (written in own words) would be given more importance.
- g) The Project Guide will assure the quality of project done by his group.

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

iv) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given

| Domain | Particulars | Marks out of 25 |
|-------------|--------------------------------|-----------------|
| | Problem Identification/Project | |
| Cognitive | title. | 05 |
| | Project diary | 03 |
| | Implementation | |
| Davahamatar | Hardware/Software Designing | 15 |
| Psychomotor | Report Writing and | 15 |
| | documentation | |
| | Punctuality and overall | |
| Affective | contribution | 05 |
| | Decency and presentation | |
| | 25 | |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted in the form of demonstration of work done per criteria given

Final marks of term work shall be awarded as per Assessment Pro-forma I.

| Sr. No. | Criteria | Marks allotted |
|------------|--|----------------|
| 1 | Project synopsis/ Problem Identification | 05 |
| 2 | Implementation Hardware/Software Designing | 10 |
| 3 | Project diary and documentation | 05 |
| 4 | Punctuality and overall contribution | 05 |
| 5 | Presentation, Question and Answer | 03 |
| | Total | 25 |

*Final marks of PST shall be awarded as per Assessment Pro-forma I

v) Term-end Oral Examination:

Evaluation shall be carried out according to following criteria. For each project, students from the concerned group should be asked to make presentation of their project, in front of the external and internal examiners which should be followed by question answer session to ascertain the contribution made by each student.

Every student shall be assessed by internal examiner and external as per the following criteria:

| Domain | Particulars | Marks out of 25 |
|-------------|---------------------------------------|--------------------|
| Cognitive | Problem synopsis/proposal | 05 |
| Psychomotor | Implementation of Hardware & Software | 10 |
| | Project Report and documentation | 05 |
| Affective | Punctuality and overall contribution | 05 |
| Affective | Presentation, Question and answer | 05 |
| | TOTAL | 25 |

^{*} I-Internal Assessment *Assessment at semester end practical exam as per Pro-forma 2.

RATIONALE: In delivering country's demand of consumer electronic appliances is increasing day by day. This requires large number of technically trained man power in the relevant industries .Looking towards the present need, in depth knowledge for maintaining various consumer electronic appliances/equipment is necessary for diploma engg. pass out students. This course will introduce the students with working principles, of consumer electronic appliances like audio video systems, microwave oven ,washing machine, air conditioner,camcordnerand others to develop skills to troubleshoot in systematic way. Knowledge so gained help in production units of these consumer gadgets or help the students to start their own enterprises.

COMPETENCY:

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences.

Cognitive: Understand various audio/video systems from the application point of view

Psychomotor: Implement industry oriented application based audio/video systems.

Affective: Attitude of i) Maintain and troubleshoot various audio systems.

COURSE OUTCOMES:

EIG507-1 Troubleshooting different types of microphones and speakers.

EIG507-2 Maintain audio systems.

EIG507-3 Analyze the composite video signal used in TV signal transmission.

EIG507-4 Troubleshoot color TV Transmitter.

EIG507-5 Troubleshoot color TV receivers.

EIG507-6 Maintain various consumer electronic appliances.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels:1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | Programme Outcomes POs and PSOs | | | | | | | | |
|---|--|-----------------------------|---|--|--|-----------------------------------|------|------------------------------------|---|
| Competency and Cos | PO 1 Basic and Discipline specific knowledge | PO 2 Problem Analysis | PO 3 Design / Development of solutions | PO 4 Engineering Tools, Experimenta tion and Testing | PO 5 Engineering Practices for society, sustainability and Environment | PO 6 Project Manageme nt | long | PSO1 Operate and Maintain | PSO2 Supervision and Providing Solution |
| Competency: to help the student to attain the following industry identified competency through various teaching learning experiences. | 2 | 2 | 3 | 2 | 1 | 1 | - | 2 | 3 |
| EIG507-1 | 1 | 2 | 3 | - | - | - | - | 2 | 2 |
| EIG507-2 | 1 | 3 | 2 | - | - | - | - | 2 | 2 |

| EIG507-6 | - | 1 | 2 | 2 | - | - | 2 | 2 | 3 |

PSO 1: Operate and Maintain: Competency to apply the concepts of Industrial Electronics in the operation and maintenance of engineering application systems.

PSO 2: Supervision and providing solution: Ability to supervise work and reach appropriate solution to simple practical problems in Industrial Electronics engineering industry.

CONTENT:

A) SUGGESTED PRACTICAL'S/EXERCISE

A.1 Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any 10/20 out of 15/25 experiments).

| Sr | Title of Practical Exercise | Skills / Competencies to be | Course |
|------|-----------------------------|-----------------------------|---------|
| No. | | Developed | Outcome |
| 110. | | Beveloped | |

| 1. | Test the performance of the given microphone. | Understanding first the type of microphone given. Checking performance of various parameters. Comparing them with the standard values of parameters. | EIG507-1 |
|-----|---|--|----------|
| 2. | Test the performance of the given speaker. | 1)Identifying the type of speaker given. 2)Checking performance for various parameters. 3)Comparing them with the standard values of parameters. | EIG507-1 |
| 3. | Test output voltage and power of the Hi-Fi amplifier. | 1)Using proper set up check voltage 2)Using proper set up check the power. | EIG507-3 |
| 4. | Identify any three different faults by voltage analysis method for Hi-Fi audio amplifier. | 1)Locating fault at different stages of amplifier. | EIG507-3 |
| 5. | Select exact speed to write a CD for given type of data. | 1)To check different speeds and selecting appropriate speed for writing 2)Above procedure should be repeated for different data types. | EIG507-3 |
| 6. | Install/test the CD for given type of data. | 1)Installing the CD for given type of data 2)Testing the CD for given type of data | EIG507-3 |
| 7. | Measure voltage levels to sketch composite video signal at different stages of receiver. | 1)Measuring voltage levels at different stages. 2)Sketching composite video signal from acquired voltages at different stages. | EIG507-5 |
| 8. | Use multimeter to measure voltage at various test points of colour TV receiver a) chroma section b)picture tube | 1)Measuring voltages at chroma section 2)Measuring voltages at picture tube. | EIG507-5 |
| 9. | Use multimeter to test voltages at various test points of the horizontal section of colour TV receiver. | 1)Divide horizontal section in to different parts 2)Measuring voltages at different points. | EIG507-5 |
| 10. | Use multimeter to test voltages at various test points of the vertical section of color TV receiver. | Divide vertical section in to different parts Measuring voltages at different points. | EIG507-5 |

| 11. | In the given color TV trainer kit ,suggest | 1)Prepare flow chart with steps to | EIG507-4 |
|-----|---|------------------------------------|----------|
| | the remedy for the created fault. Faults | troubleshoot | |
| | are 1)No colour 2)Red colour only 3)Green | 2)follow the steps for each fault | |
| | colour only 4)No sound | and remove the fault. | |
| 12. | Suggest the remedy for the given faults in | 1)Prepare flow chart with steps to | EIG507-4 |
| | the color TV a)Fault in HSYNC section | troubleshoot | |
| | b)Fault in video amplifier. | 2)follow the steps for each fault | |
| | | and remove the fault. | |
| 13. | Suggest the remedy for the given faults in | 1)Prepare flow chart with steps to | EIG507-5 |
| | the color TV a)Fault in SYNC separator | troubleshoot | |
| | b)Fault in VSYNC section. | 2)follow the steps for each fault | |
| | | and remove the fault. | |
| 14. | Test the various sections of the LED | 1)Measure voltages at different | EIG507-5 |
| | television receiver. | points | |
| | | 2)locate the fault if any | |
| | | 3)Take remedial action. | |
| 15. | Test the various features of the given type | 1)Test the various sections of the | EIG507-6 |
| | of the printer. | printer | |
| | | 2)Measure the voltages | |

A.2 Micro-project

Each student should allotted one microproject in the beginning of the semester. In 3rd and 4th semester the microprojects are group based (group of 3 students) and in 5th and 6th semesters it should be preferably individualy undertaken. Each microproject should encompass two or more COs.

Each student have to maintain dated work diary consisting of individual contribution in the microproject work.

Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of micro projects is as follows:

- a) Battery Charger: Build a battery charger for mobile phone. Prepare a report.
- b) FM Radio Receiver: Build FM radio receiver using IC TEA 5591.
- C) Installation of DTH: Install DTH indoor and outdoor unit.
- d) Up Down counter: Build a circuit for 2 digit Up down counter at gates of a mall/parking space. Prepare a report.
- e) Timer delay: Build a timer delay using IC 89C51.
- f) Gas leakage detector: Develop a circuit for LPG gas detector. Prepare a report.
- h) Light ON OFF control: Develop a circuit for light ON OFF control using mobile app and Bluetooth Prepare a report.
- g) Smoke detector circuit: Build a smoke detector circuit for office/hospitals.
- h) Bar code reader: Build a bar code reader circuit for malls/super markets.

.

B) THEORY:

SECTION-I

| Sr. No. | Topics / Sub-topics | Lectures (Hours) | Theory Evaluation (Marks) | | | |
|------------|--|---------------------|---------------------------------|--|--|--|
| EIG5 | IG507-1 Troubleshooting different types of microphones and speakers. | | | | | |
| 1 | Audio Fundamentals 1.1 Basic characteristics of sound signal: level and loudness, pitch and frequency response, fidelity, sensitivity and selectivity. 1.2 Audio amplifiers: Mono, Stereo 1.3 Microphone: working principle and characteristics. Types: carbon, condenser, crystal, electrates and tie clip. 1.4 Speakers: working principle and characteristics, | 06 | 12 | | | |
| | types: electrostatic, dynamic, permanent magnet etc. woofers, tweeter and mid range wireless | | | | | |
| | 1.5 Troubleshooting procedure. | | | | | |
| EIG5 | 507-2 Maintain audio systems. | | | | | |
| 2 | Audio systems. 2.1 Block diagram and operation of CD player. Types of CD player. 2.2 Components used for CD mechanism: CD pick up assembly, gear system, drive motors, CD lens. 2.3 Block diagram and working of Hi Fi amplifier. 2.4 Public Address (PA) system: Block diagram and operation, speaker impedance matching and characteristics. 2.5 Home theatre system. 2.6 Block diagram and working of MP3. 2.7 Troubleshooting procedure of audio systems. | 08 | 14 | | | |
| EIG5 | 507-3 Analyze the composite video signal used in TV sign | al transmis | sion | | | |
| 3 | Television Fundamentals 3.1 Concept: Aspect ratio, image continuity 3.2 Interlace scanning, scanning periods: horizontal and vertical scanning. 3.3 Vertical and horizontal resolution. 3.4 Vestigial Sideband transmission, bandwidth for colour signal. 3.5 Characteristics of color signal and compatibility. 3.6 Color theory, Grassman's law, additive and | 10 | 14 | | | |

| subtractive color mixing, | | | |

| | SUB- | 24 | 40 |
| TOTAL | | | |

SECTION-II

| Sr. No. | Topics | Teaching hours | M ar ks |
|----------|--|-------------------|---------------|
| EIG507-4 | Troubleshoot color TV Transmitter. | | |
| 4. | TV Transmitter 4.1 CCIR-B standards for color signal transmission and reception. 4.2 positive and negative modulation, merits and demerits of negative modulation. 4.3 composite video signal-pedestal height, blanking pulse ,color burst, Horizontal sync pulse details, equalizing pulses. 4.4 Block diagram of color TV transmitter. 4.5 Troubleshooting procedure of color TV transmitter. | 08 | 14 |
| EIG5075- | 5 Troubleshoot color TV receivers. | | |
| 5 | Television Receivers. 5.1 Block diagram and operation of color TV Receiver. 5.2 Operation of PAL-D decoder. 5.3 HDTV: Development of HDTV, NHK MUSE system and NHK broadcast. 5.4 LCD/LED technology: principle and working of LCD and LED TV. | 08 | 12 |
| | 5.5 Direct to Home Receiver(DTH): Concept, receiver block diagram, indoor and outdoor unit. | | |
| | 5.6 Troubleshooting procedure of color TV receiver. | | |
| | 5.7 Block diagram and working of OLED.(Organic) | | |
| EIG507-6 | Maintain various consumer electronic appliances | | |
| 6 | Consumer electronic appliances. 6.1 Photocopier block diagram and working. 6.2 Microwave oven: Types, single chip controllers, block diagram, types, specifications, and wiring and safety instructions. | 08 | 14 |
| | 6.3 Washing machine: Block diagram and working, electrica | 1 | |

| specifications, types: automatic and semi-automatic. 6.4 Digital camera and cam coder: pick up devices, picture processing and picture storage, and electrical specifications. | | |
|--|---------|----|
| Sub- Total | 24 | 40 |
| TOTAL | 48 | 80 |
| Semester end exam question paper should be such that total made questions on each topic is one and half times the marks allotted the candidates are able to attempt questions of the above allotted only | above b | |

Specification table for setting question paper for semester end theory examination:

| Topic | Name of topic | Distribution of marks (Cognitive level-wise) | | | Course Outcome | Total |
|-------|---------------------------------|--|------------|-------------|-------------------|-------|
| No. | Traine of topic | Remember | Understand | Application | | Marks |
| 1 | Audio Fundamentals | 04 | 06 | 02 | EIG507-1 | 12 |
| 2 | Audio systems | 04 | 06 | 04 | EIG507-2 | 14 |
| 3 | Television Fundamentals | 04 | 06 | 04 | EIG507-3 | 14 |
| 4 | TV transmitter | 06 | 04 | 04 | EIG507-4 | 14 |
| 5 | Television receivers | 02 | 04 | 06 | EIG402-4 | 12 |
| 6 | Consumer electronic appliances. | 04 | 06 | 04 | EIG507-6 | 14 |
| | Total >> | 24 | 32 | 24 | | 80 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

a) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain | Particulars | Marks out of 25 |
|-------------|---|-----------------|
| Cognitive | Technical preparedness for practical | 05 |
| Psychomotor | Operating skills/Algorithm/ flowchart | 05 |
| | Observation/Logic/ Program/Result | 05 |
| | Discipline and punctuality | 05 |
| Affective | Procedure/ Safety Measures/ Decency/ | 05 |

| Presentation | |
|--------------|----|
| TOTAL | 25 |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment Pro-forma X*.

| Sr. No. | Criteria | Marks allotted |
|------------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algoritm/ Flowchart/ Program | 05 |
| 2 | Procedure followed to achieve the result | 05 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs, workmanship and Safety measures | 05 |
| 5 | Oral Based on Test | 05 |
| | Total | 25 |

^{*}Final marks of practical assignments shall be awarded as per Assessment Pro-forma X.

| Sr. No | Criteria | Marks allotted |
|-----------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algoritm/ Flowchart/ Program | 10 |
| 2 | Procedure followed to achieve the result | 10 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 10 |
| 4 | Proper Graphs, workmanship and Safety measures | 10 |
| 5 | Oral | 10 |
| | Total | 50 |

b) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

INSTRUCTIONAL STRATEGIES:

^{*}Assessment at semester end practical exam as per Pro-forma I.

Instructional Methods:

- 1. Online/Offline Lectures cum Discussions
- 2. Regular home assignments
- 3. Laboratory work

Teaching and Learning Resources:

1. Chalk board 2. Video clips 3.PPTs 4. Question Bank 5. Charts

^{*}E-External Assessment *Assessment at semester end practical exam as per Pro-forma IV

RATIONALE:

In industry engineering diploma holders (also called technologists) are expected to handle basic instruments for the measurement of various process parameters such as temperature, pressure, flow and level in different types of industries. The technologists should be able to select proper instruments for the measurement of above parameters and also maintain these instruments for proper functioning in different application. This course will be helpful to the students in understanding this knowledge and acquiring this skill used for measurement of complicated parameters.

COMPETENCY:

Acquiring skills used for measurement of complicated parameters using different transducers.

Cognitive: Understand and Classify different transducers and use them for proper application.

Psychomotor: Select a transducer and use of proper signal conditioning circuit according to application.

Affective: Attitude of i) Selection ii) accuracy iii) precision v) Differentiation vi) punctuality

COURSE OUTCOMES:

COURSE OUTCOMES:

EIG508-1 Differentiate among variety of transducers based on their features.

EIG508-2 Acquire temperature measuring transducers and temperature measuring methods.

EIG508-3 Acquire level measuring transducers.

EIG508-4 Use of different types of pressure transducer and acquire pressure measuring and flow Measuring different transducers.

EIG508-5 Describe different data transmission methods and telemetry systems.

EIG508-6 Develop proper signal conditioning circuit and use proper data acquisition system.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels:1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | Programme Outcomes POs and PSOs | | | | | | | | |
|---|--|-----------------------------|---|--|--|-----------------------------------|-----------------------------------|-----|---|
| Competency and Cos | PO 1 Basic and Discipline specific knowledge | PO 2 Problem Analysis | PO 3 Design / Development of solutions | PO 4 Engineering Tools, Experimenta tion and Testing | PO 5 Engineering Practices for society, sustainability and Environment | PO 6 Project Manageme nt | PO 7 Life- long Learning | and | PSO2 Supervision and Providing Solution |
| Competency: Acquiring skills used for measurement of complicated parameters using different transducers | 2 | 2 | - | - | - | - | - | - | - |
| EIG508-1 | 2 | - | - | - | - | - | - | - | - |
| EIG508-2 | 2 | - | - | - | - | - | - | 1 | 1 |
| EIG508-3 | 2 | 3 | - | i | - | - | - | 2 | 2 |
| EIG508-4 | 2 | 3 | - | ı | - | - | - | 1 | 1 |

| EIG508-6 | 2 | - | - | - | - | - | - | - | - |

PSO 1: Operate and Maintain:Competency to apply the concepts of Industrial Electronics in the operation and maintenance of engineering application systems.

PSO 2: Supervision and providing solution: Ability to supervise work and reach appropriate solution to simple practical problems in Industrial Electronics engineering industry.

CONTENT:

J) SUGGESTED PRACTICAL'S/EXERCISE

A.1 Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any 'X' experiments).

| Sr No. | Title of Practical Exercise | Skills / Competencies to be | Course |
|--------|--------------------------------|--------------------------------|---------|
| Sr No. | Title of Fractical Exercise | Developed | |
| 1. | To plot the characteristics of | 1. Connect power supply | EIG508- |
| | thermocouple | 2. Know the front panel | 2 |
| | | 3. Plot the characteristics of | |
| | | thermocouple | |

| 2. | To plot the characteristics of | 1. Connect power supply | EIG508- |
|-----|--|---|----------------|
| | RTD | 2. Know the front panel3. Plot the characteristics of RTD | 2 |
| 3. | To plot the characteristics of Thermistor | Connect power supply Know the front panel Plot the characteristics of | EIG508- 2 |
| 4. | To measure displacement using LVDT | Thermistor 1. Connect power supply 2. Know the front panel 3. Plot the graph of actual displacement v/s reading obtained 4. Comment on the linearity | EIG508- 1 |
| 5. | Study of primary and secondary transducer using bourdon tube and LVDT | 1. Connect power supply 2. Know the front panel 3. Measure the linear displacement | EIG508- 3,1 |
| 6. | To measure weight using strain gauge pressure transducer | Connect power supply Know the front panel Plot the graph of actual weight v/s reading obtained | EIG508- 4 |
| 7. | To Study of Single channel Data acquisition system with analog output. | 1.Connect power supply2. Know the front panel3. Measure the Temperature | EIG508- |
| 8. | To Study of Single channel Data acquisition system with digital output. | Connect power supply Know the front panel Measure | EIG508- |
| 9. | To Study of Multichannel Data acquisition system with digital output. (minimum two physical parameter) | Connect power supply Know the front panel Measure | EIG508- 6 |
| 10. | Study of level measurement using capacitive transducer | Connect power supply Know the front panel Measure the Capacitive level | EIG508- 5 |
| 11 | Use the potentiometer to measure the linear displacement | Connect power supply Know the front panel Measure the linear displacement | EIG508- 1 |
| 12 | Flow measurement using Variable head flow meter | Connect power supply Know the front panel Measure the flow | EIG508- |
| 13 | Use Venturi meter for flow measurement | Connect power supply Know the front panel Measure the flow using Venturi meter | EIG508- 4 |
| 14 | Use Orifice plate meter for flow | 1. Connect power supply | EIG508- |

| | measurement | 2. Know the front panel | 4 |
|----|------------------------------|-----------------------------------|---------|
| | | 3. Measure the flow using Orifice | |
| | | plate meter | |
| 15 | Study of signal conditioning | 1. Connect power supply | EIG508- |
| | circuits using any physical | 2. Know the front panel | 6 |
| | parameter at input | 3. Measure | |

A.2 Micro-project

Each student should allotted one micro project in the beginning of the semester. In 2nd and 4th semester the micro projects are group based (group of 3 students) and in 5th and 6th semesters it should be preferably individually undertaken. Each micro project should encompass two or more COs.

Each student has to maintain dated work diary consisting of individual contribution in the micro project work.

Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of micro projects is as follows:

- a) Micro project 1 title:-Use RTD for indication of temperature.
- b) Micro project 2 title:-Use Thermistor for indication of temperature.
- c) Micro project 3 title:-Use level transducer for indicating and controlling the level of water tank.
- d) Micro project 4 title:-Use float type level sensor for indication of level of water tank.
- e) Micro project 5 title:-Use pressure transducer for indicating and controlling the compressor utility system.
- f) Micro project 6 title:-Use strain gauge for weight measurement simple platform.

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

vi) Assessment Criteria for Practical Assignments :

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain | Particulars | Marks out of 25 |
|-------------|---|-----------------|
| Cognitive | Technical preparedness for practical | 05 |
| Development | Operating skills/ Algorithm/ flowchart | 05 |
| Psychomotor | Observation/ Logic/ Program/ Result | 05 |
| | Discipline and punctuality | 05 |
| Affective | Procedure/ Safety Measures/ Decency/ Presentation | 05 |
| | 25 | |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment Pro-forma X*.

| Sr. No. | Criteria | Marks allotted |
|------------|--|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algorithm/ Flowchart/ Program | 05 |
| 2 | Procedure followed to achieve the result | 05 |
| 3 | Observations, Result, Output Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs ,workmanship and Safety measures | 05 |
| 5 | Oral Based on Test | 05 |
| | Total | 25 |

^{*}Final marks of practical assignments shall be awarded as per Assessment Pro-forma X.

vii) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. no | Criteria | Marks allotted |
|-----------|---|----------------|
| | Neat & complete circuit | 10 |
| 1 | Diagram/schematic Diagram /Algorithm/Flowchart/Program | 10 |
| 2 | Procedure followed to achieve the result | 10 |
| 3 | Observation, Result, Output, simple Calculations with relevant formulae | 10 |
| 4 | Proper Graphs, workmanship and Safety measures | 10 |
| 5 | Oral | 10 |
| | Total | 50 |

^{*}Assessment at semester end practical exam as per Pro-forma I.

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

- 1. Online/Offline Lectures cum Discussions
- 2. Regular home assignments
- 3. Laboratory work

Teaching and Learning Resources:

1. Chalk board 2. Video clips 3. PPTs 4. Question Bank 5. Charts

| Evaluation | Theory | Practical | Theory Examination | Term Work | |
| Details of Evaluation | Average of two tests of 20 marks each | 25 marks for each practical One PST of 25 marks | Term End Online Theory Exam | | Total |
| Marks | 20 | | 80 | - | 100 |

RATIONALE:

Management ability is a higher-grade ability, which every successful engineer must possess. This science has been developed in those days when it was treated as an art in earlier stages. It is impossible for an individual though technically sound to achieve goals of the organizations. Effective implementation of management policies is a tough task. The Diploma holder should learn these principles of management and various techniques.

COMPETENCY: Plan and implement managerial and administrative strategies.

Cognitive: Use management principles and techniques.

Psychomotor: i) Apply management principles ii) Control inventory iii) Use personal protective devices for safety

Affective: Attitude of i) precision ii) accuracy iii) safety iv) punctuality v) aesthetic presentation

COURSE OUTCOMES:

EIG509.1 Apply principles of management and carry out various functions of management.

EIG509.2 Prepare organization structure for small and medium scale industry.

EIG509.3 Perform duties of stores in-charge, material and finance manager.

EIG509.4 Practice industrial safety rules, codes, practices and acts.

EIG509.5 Apply various modern management techniques.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX [Note: Correlation levels: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

COMPETENCY:

Cognitive: To understand-about-marketing-,market-,functions-,marketing of industrial products, planning & advertising

Psychomotor: To understand marketing management ,to do max. sale of products & to earn max. profit.

Affective: Attitude of i) Logic ii) accuracy iii) precision v)punctuality vi)hard working

COURSE OUTCOMES:

EIG510-1- To understand marketing, product selling.

EIG510-2- To study market, its types, government policy.

Curriculum MPECS 2020 Diploma in Industrial Electronics

- EIG510-3- To understand marketing functions & marketing managers duties.
- EIG510-4- To understand how to do marketing of industrial products.
- EIG510-5- To understand marketing planning, pricing, buying behavior of customer.
- EIG510-6- To understand how to do advertising of product to do capture market.

^{*} I-Internal Assessment *Assessment at semester end practical exam as per Pro-forma IV.

RATIONALE:

This course will present generally advanced microcontrollers systems including assembly language programming and interfacing techniques. Emphasis is on the practical application of microcontrollers as solutions to engineering problems. The course will focus on the PIC microcontroller architecture and peripheral interfacing. PIC Microcontroller is heart of all domestic, industrial, consumer goods and other high end products. The student will gain the knowledge of peripheral interfacing and programming them. The subject will help the students to study concepts of embedded system.

COMPETENCY:

Build PIC18F microcontroller based systems for different engineering applications.

Cognitive: Understanding PIC18F microcontroller architecture, working and instruction set. Psychomotor

: Write assembly language programs for wide range of applications.

Affective: Attitude of i) Logic ii) accuracy iii) precision v) punctuality

COURSE OUTCOMES:

- EIG 512-1 Interpret prominent features of different kinds of advance microcontrollers.
- EIG 512-2 Interpret the salient architectural features of PIC18f microcontroller
- EIG 512-3 Develop and maintain assembly language program for different operations
- EIG 512-4 Explore programming skills for I/O ports, Timers/Counters of PIC18F
- EIG 512-5 Explore programming skills for Serial ports and CCP/ECCP modes.
- EIG 512-6 Interface and program different external devices with PIC18f in assembly

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | | | Programme Outcomes POs and PSOs | | | | | | |
|--------------------------|--|-----------------------------|---|--|--|-----------------------------------|------|------------------------------------|---|
| Competency and Cos | PO 1 Basic and Discipline specific knowledge | PO 2 Problem Analysis | PO 3 Design / Development of solutions | PO 4 Engineering Tools, Experimenta tion and Testing | PO 5 Engineering Practices for society, sustainability and Environment | PO 6 Project Manageme nt | long | PSO1 Operate and Maintain | PSO2 Supervision and Providing Solution |
| Competency: Maintain | | | | | | | | | |
| microcontroller based | | | | | | | | | |
| equipments/system.: | 1 | 3 | 3 | 1 | - | - | - | 3 | 3 |
| EIG 512-1 | 1 | 1 | 2 | - | - | - | - | 2 | 2 |
| EIG 512-2 | 1 | 3 | 2 | - | 1 | - | - | 2 | 2 |
| EIG 512-3 | - | 3 | 3 | 1 | - | - | - | 2 | 2 |
| EIG 512-4 | 1 | 2 | 3 | 1 | - | - | - | 3 | 3 |

| EIG 512-6 | 1 | 2 | 3 | - | 1 | - | - | 3 | 3 |

PSO 1: Operate and Maintain: Competency to apply the concepts of Industrial Electronics in the operation and maintenance of engineering application systems.

PSO 2: Supervision and providing solution: Ability to supervise work and reach appropriate solution to simple practical problems in Industrial Electronics engineering industry.

CONTENT:

L) SUGGESTED PRACTICAL'S/EXERCISE

A.1 Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any 10 out of 15 experiments).

| Sr No. | Title of Practical Exercise | Skills / Competencies to be Developed | Course Outcome |
|-----------|--|---|-------------------|
| 1 | Introduction to MPLAB software | To know the details of MPLAB software | EIG512-1 |
| 2 | Addition & subtraction of 8 bit | Understand the concept & use of instructions: MOVLW, ADDWF | EIG512-2-3 |
| 3 | Addition & Subtraction of 16 bit numbers | Understand the concept & use of instructions: MOVLW, ADDWF, SUBWF, SUBFWB | EIG512-2-3 |

| 4 | Addition of 2 digit & 4 digit BCD | Understand the concept & use of | EIG512-2-3 |
|----|---|---|------------|
| | numbers | instructions: DAW | |
| 5 | Multiplication of 8 bit number | Understand the concept & use of instructions: MOVLW, MULWF | EIG512-2-3 |
| 6 | Block transfer in forward & reverse direction | Understand the concept of indirect addressing & use of instructions LFSR F, k | EIG512-2-3 |
| 7 | Block exchange | Understand the concept of indirect addressing & use of instructions LFSR F, k | EIG512-2-3 |
| 8 | Addition of hexadecimal number in array | Understand the concept of indirect addressing & use of instructions : MOVLW, ADDWF | EIG512-2-3 |
| 9 | Addition of BCD number in array | Understand the concept of indirect addressing & use of instructions : MOVLW, ADDWF, DAW | EIG512-2-3 |
| 10 | Find smallest number in array | Understand the concept of indirect addressing & use of instructions : MOVLW, BC,BNC | EIG512-1-2 |
| 11 | Find an largest number in an array | Understand the concept of indirect addressing & use of instructions : MOVLW, BC, BNC | EIG512-2-3 |
| 12 | Find positive & negative number in an array | Understand the concept of indirect addressing & use of instructions : BTFSC, BTf | EIG512-2-3 |
| 13 | Study of ADC interfacing | Understand the concept of Analog to digital conversion | EIG512-4-6 |
| 14 | Study of SPI interfacing | Understand the concept of SPI bus interfacing | EIG512-4-6 |
| 15 | Study of RTC DC1306 interfacing. | To learn concept of real time counter interfacing | EIG512-4-6 |

A.2 Micro-project

Each student should allotted one microproject in the beginning of the semester. In 3rd and 4th semester the microprojects are group based (group of 3 students) and in 5th and 6th semesters it should be preferably individually undertaken. Each microproject should encompass two or more COs. Each student have to maintain dated work diary consisting of individual contribution in the microproject work. Microproject term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of microprojects is as follows:

- a) Build an application of flashing display to flash advertisement
- b) Build a system to display department name with rolling display
- c) Build two digit counter system
- d) Build a class period bell system as per the given time table with 7 teaching periods of 1 hour each
- e) Build a temperature monitoring system to maintain the given temperature
- f) Build automated door control system to open and close the door

- g) Build a pollution monitoring system to observe the level of CO2
- h) Build a traffic light controller for traffic signals as per specified delay
- i) Build a water level controller for given water levels

| | Programming of PIC | 0.2 | 0.4 | 0.6 | ELG200 6 | 10 |
| 6 | External Interfaces I | 02 | 04 | 06 | EIG309-6 | 12 |
| | Total >> | 12 | 28 | 40 | | 80 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

viii) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain Particulars | | Marks out of 25 |
|--------------------|---|-----------------|
| Cognitive | Technical preparedness for practical | 05 |
| Development | Operating skills/Algorithm/ flowchart | 05 |
| Psychomotor | Observation/Logic/ Program/Result | 05 |
| | Discipline and punctuality | 05 |
| Affective | Procedure/ Safety Measures/ Decency/ Presentation | 05 |
| | 25 | |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment Pro-forma IV*.

| Sr. No. | Criteria | Marks allotted |
|------------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algoritm/ Flowchart/ Program | 05 |
| 2 | Procedure followed to achieve the result | 05 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs, workmanship and Safety measures | 05 |
| 5 | Oral Based on Test | 05 |
| | Total | 25 |

^{*}Final marks of practical assignments shall be awarded as per Assessment Pro-forma IV.

ix) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. No | Criteria | Marks allotted |
|-----------|---|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algoritm/ Flowchart/ Program | 10 |
| 2 | Procedure followed to achieve the result | 10 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 10 |
| 4 | Proper Graphs, workmanship and Safety measures | 10 |
| 5 | Oral | 10 |
| | Total | 50 |

^{*}Assessment at semester end practical exam as per Pro-forma IV

RATIONALE:

Automotive sector is growing day by day and merging of automobile and electronics technology is leading to a safe and luxurious vehicles. Hence this course will provide inter disciplinary knowledge. The objective of the course is to make the students understand the use of microcomputer, sensors, actuators and the use of various instrumentation systems in automobile.

COMPETENCY:

To get acquainted with various sensors, actuators and control units used in automobile electronics.

Cognitive: Understanding various components of automotive electronics and its operation.

Psychomotor:

Affective: Attitude of i) Logical Thinking ii) Accuracy iii) Precision iv) Fault finding skills

COURSE OUTCOMES:

- EIG513-1 Appreciate the operation of microcomputer and its architecture
- **EIG513-2** Discover the characteristic details of various sensors and actuators used in automotive electronics Appreciate
- EIG513-3 Acknowledge the operation of various components of electronic engine management system
- EIG513-4 Explore various vehicle management systems used in automobile
- EIG513-5 Explore different automotive instrumentation systems used in automobile
- EIG513-6 Discover electronic safety systems used in automobile

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels:1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "-": no correlation]

| | Programme Outcomes POs and PSOs | | | | | | | | |
|---|--|-----------------------------|---|--|--|-----------------------------------|-----------------------------------|-----|---|
| Competency and Cos | PO 1 Basic and Discipline specific knowledge | PO 2 Problem Analysis | PO 3 Design / Development of solutions | PO 4 Engineering Tools, Experimenta tion and Testing | PO 5 Engineering Practices for society, sustainability and Environment | PO 6 Project Manageme nt | PO 7 Life- long Learning | and | PSO2 Supervision and Providing Solution |
| Competency: Design, implement and maintain 8051 microcontroller based embedded systems | 1 | 2 | - | - | - | - | - | - | - |
| EIG513-1 | 3 | 1 | - | 1 | - | - | - | - | - |

M) SUGGESTED PRACTICAL'S/ EXERCISE

A.1 Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical's and assess the student for attainment of the competency (any 10 out of 15 experiments).

| Sr | Title of Practical Exercise | Skills / Competencies to be | Course |
|-----|---|--|----------------|
| No. | | Developed | Outcome |
| 1 | To find the location and understand the task of different components on the car | Locate different components of car. Understand the operation of each. | EIG513- 2,3 |

| 2 | To know symbols of components connectors, wires. | Identify the different symbols used for components. Understand the use of wiring diagram. EIG513-3,4 |
|----|---|---|
| 3 | Interpret the wiring diagram and understand different electrical circuits. | Interpretation of wiring diagram. Understand the operation of wiring circuit. EIG513-3 |
| 4 | To understand how the control units are connected using different CAN bus systems. | Discover the components of control units. Understand the interfacing of control units. EIG513- 3,4 |
| 5 | To perform Alternator test | Identify the fault. Understand the procedure of testing alternator. EIG513-4 |
| 6 | To perform Starter circuit test | Identify the fault. Understand the procedure of testing starter circuit. EIG513-4 |
| 7 | To test battery | Identify the fault. Understand the procedure of testing battery. EIG513-4, 5 |
| 8 | To measure the output voltage & observe the output waveform of a crankshaft sensor | 1. Explore the output characteristics of crankshaft sensor. EIG513-2,4,5 2. Understand its operation |
| 9 | To measure the output voltage & to observe the output waveform of a camshaft sensor | 1. Explore the output characteristics of crankshaft sensor. EIG513-2,4,5 1. Understand its operation |
| 10 | To study fuel reserve signal function, cam shaft adjustment function, air injection function. | Identify the fault Understand the procedure of fual injection, cam shaft adjustment. EIG513-3 |
| 11 | To study Antilock braking system | Understand the system Identify the instrumentation and control involving |
| 12 | To study Electronic suspension system | 1. Understand the system 2. Identify the instrumentation and control involving |
| 13 | To study Electronic steering control | Understand the system Identify the instrumentation and control involving EIG513-4 |
| 14 | To study Fuel quantity measurement | 1. Understand the system 2. Identify the instrumentation |

| | | and control involving |
|----|---|---|
| 15 | To study onboard diagnostive system (OBD) | Understand the system Identify the instrumentation |
| | | and control involving |

A.2 Micro-project

Each student should allotted one microproject in the beginning of the semester. In 3rd and 4th semester the microprojects are group based (group of 3 students) and in 5th and 6th semesters it should be preferably individualy undertaken. Each microproject should encompass two or more COs.

Each student have to maintain dated work diary consisting of individual contribution in the microproject work.

Micro-project term end assessment carries 20% of maximum marks allotted to term end practical exam.

A suggestive list of microprojects is as follows:

- g) Prepare and display board of electronics sensors/actuators with specifications and relevant applications. The following steps shall be followed:
 - a. Students should visit Shops/Garages for survey
 - b. Collect components and know the specifications
 - c. Study application of components
 - d. Prepare the display board with labeled components specifying their applications
- h) Prepare and display board of various MCUs with specifications and its application in automobile systems. The following steps shall be followed:
 - a. Students should visit Shops/Garages for survey
 - b. See the MCUs and know the specifications
 - c. Study application of each MCU
 - d. Prepare the display board with labeled MCUs specifying their applications
- i) Prepare and display board of various Electronic Vehicle Management Systems (EVMS) like Cruise control system, Antilock braking system, Electronic suspension system, Electronic steering control, Traction control system, Transmission control
 - a. Students should visit Shops/Garages for survey
 - b. See the various Electronic Vehicle Management Systems (EVMS)
 - c. Study application of each EVMS
 - d. Prepare the display board with labeled EVMS specifying their applications
- j) Prepare and display board of various Automotive Instrumentation System like- Fuel quantity measurement, Coolant temperature and oil pressure measurement
- k) Visit garages for demonstration of actual Onboard Diagnostics (OBD) being performed and collect the details

Specification table for setting question paper for semester end theory examination:

| Topic | Name of topic | Distribut | tion of marks level-wise) | Course Outcome | Total | |
|-------|--------------------------------------|-----------|------------------------------|-------------------|----------|-------|
| No. | 1 | Remember | Understand | Application | | Marks |
| 1 | Introduction to microcomputer | 8 | 2 | 0 | EIG513-1 | 10 |
| 2 | Sensors and actuators | 8 | 6 | 0 | EIG513-2 | 14 |
| 3 | Electronic engine management system | 8 | 4 | 4 | EIG513-3 | 16 |
| 4 | Electronic vehicle management system | 8 | 4 | 4 | EIG513-4 | 16 |
| 5 | Automotive instrumentation system | 8 | 4 | 4 | EIG513-5 | 16 |
| 6 | Safety | 4 | 4 | 0 | EIG513-6 | 08 |
| | | | | TOTAL | | 80 |

Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.

ASSESSMENT CRITERIA FOR PRACTICAL ASSIGNMENTS AND PRACTICAL EXAMINATION

xi) Assessment Criteria for Practical Assignments:

i) Continuous Assessment of Practical Assignments:

Every practical assignment shall be assessed for 25 marks as per criteria given in Laboratory Manual

| Domain | Particulars | Marks out of 25 |
|-------------|---|-----------------|
| Cognitive | Cognitive Technical preparedness for practical | |
| Davahamatan | Operating skills/Algorithm/ flowchart | 05 |
| Psychomotor | Observation/Logic/ Program/Result | 05 |
| | Discipline and punctuality | 05 |
| Affective | Procedure/ Safety Measures/ Decency/ Presentation | 05 |
| | 25 | |

ii) Progressive Skill Test:

One mid-term *Progressive Skill Test* of 25 marks shall be conducted as per criteria given Final marks of term work shall be awarded as per *Assessment Pro-forma X*.

| Sr. No. | Criteria | Marks allotted |
|------------|--|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algorithm/ Flowchart/ Program | 05 |
| 2 | Procedure followed to achieve the result | 05 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 05 |
| 4 | Proper Graphs, workmanship and Safety measures | 05 |
| 5 | Oral Based on Test | 05 |
| | Total | 25 |

^{*}Final marks of practical assignments shall be awarded as per Assessment Pro-forma IV.

xii) Assessment Criteria for Term-end Practical Examination:

Every student has to perform one practical within 3 hours at semester end practical exam which shall be assessed as per following criteria.

| Sr. No | Criteria | Marks allotted |
|-----------|--|----------------|
| 1 | Neat & complete circuit Diagram / schematic Diagram/ Algorithm/ Flowchart/ Program | 10 |
| 2 | Procedure followed to achieve the result | 10 |
| 3 | Observations, Result, Output, Sample Calculations with relevant formulae | 10 |
| 4 | Proper Graphs, workmanship and Safety measures | 10 |
| 5 | Oral | 10 |
| | Total | 50 |

^{*}Assessment at semester end practical exam as per Pro-forma I.

INSTRUCTIONAL STRATEGIES:

Instructional Methods:

- 1. Online/Offline Lectures cum Discussions
- 2. Regular home assignments
- 3. Laboratory work

Teaching and Learning Resources:

1. Chalk board 2. Video clips 3.PPTs 4. Question Bank 5. Charts

REFERENCE MATERIAL:

a) Books / Journals / IS Codes

| Sr.No. | Author | Title | Publisher |
|--------|------------------------|--|---|
| 1 | Robert Bosch | Automotive Hand Book | SAE (8th Edition), 2011 |
| 2 | Tom Denton | Automobile Electrical and Electronic Systems | 4 th edition- Routledge – 2012 |
| 3 | Barry Hollembeak | Automotive Electricity and Electronics | Delmar Cengage Learning; 5 th edition, 2011 |
| 4 | William B Ribbens | Understanding Automotive Electronics: An Engineering Perspective | Newne Butterworth- Heinermann, 7 th edition 2012 |

(ANNEXURE)

BRIDGE COURSE FOR DSY STUDENTS

COURSE ID : EIG

Course Name : Basics of Electronic Components and Devices

Course Abbreviation : BECD

TEACHING AND EVALUATION SCHEME:

Prerequisites : NIL

Teaching Scheme:

| Scheme Component | Hrs per Week | Hours |
|------------------|--------------|---------|
| Theory | 02 | 12*2=24 |

Evaluation Scheme:- Assignments/Practical Demonstrations on each chapter should be given and assessed. Following are the sample practical exercise which can be demonstrated to the student .Teacher can design their own assignments/practical exercise if required.

| Sr No. | Title of Practical Exercise | |
|-----------|--|--|
| 1. | Identify types of resistors and find values of given resistor by color coding method | |
| 2. | Identify types of inductor and find values of given inductor by color coding method | |
| 3. | Identify types of capacitor and find values of given capacitor | |
| 4. | Identify different types of cables, connector, switches | |
| 5. | Test the performance of PN junction diode | |
| 6. | Test the performance of zener diode | |
| 7. | Test Zener voltage regulator for given voltage | |
| 8. | Test the half wave circuits on breadboard | |
| 9. | Test the full wave center-tapped circuit on breadboard | |
| 10 | Test the full wave bridge circuit on breadboard | |
| 11 | Test the full wave bridge circuit on breadboard with π -filter | |
| 12 | Test the working of the BJT as an amplifier in CE mode | |
| 13 | Test the performance of Regulator IC's: IC's 78XX, 79XX. | |

RATIONALE:

All direct second year admitted electronics group students need, a grasp of certain fundamental principles and concepts are essential pre-requisitions for it. This subject deals with the most basic devices and circuits on which the further development of subject depends.

COMPETENCY:

Maintain electronic circuits comprising of discrete electronics components

Cognitive: Illustrate the operation of basic electronics components and devices.

Psychomotor: Troubleshoot simple basic electronics circuit. **Affective:** Attitude of i) Identify ii) Draw iii) Operate v)Test

Course Outcomes

- **CO 1** Identify and use different Passive Electronic Components.
- CO 2 Illustrate the use of Cables, Connectors and Switches in different applications.
- **CO 3** Illustrate the use of PCB in different equipment.
- **CO-4** Identify and use semiconductor diodes as per requirement
- CO-5 Illustrate the use of rectifiers, filters and voltage regulator in electronics circuit
- **CO-6** Use transistor biasing circuits and amplifiers as per requirement

CONTENTS:

A) THEORY:

SECTION-I

| Sr. No. | Topics | Teaching hours |
|------------|---|----------------|
| | CO 1 – Identify and use different Passive Electronic Components. | |
| 1 | 1. Passive Electronic Components 1.1. Resistors | |
| | 1.1.1. Resistor Classification | |
| | 1.1.2. Resistor Specifications | |
| | 1.1.3. Fixed Resistors : Examples with diagrams, symbols and applications | |
| | 1.1.4. Variable Resistors : Examples with diagrams, symbols and applications | |
| | 1.1.5. Colour Coding of Resistors | |
| | 1.2. Capacitors | |
| | 1.2.1. Capacitor Classification | 03 |
| | 1.2.2. Capacitor Specifications | |
| | 1.2.3. Fixed Capacitors: Examples with diagrams, symbols and | |
| | applications | |
| | 1.2.4. Variable Capacitors : Examples with diagrams, symbols and applications | |
| | 1.2.5. Capacitor Coding | |
| | 1.3. Inductors | |
| | 1.3.1. Inductor Classification | |
| | 1.3.2. Inductor Specifications | |
| | 1.3.3. Fixed Inductors : Examples with diagrams, symbols and applications | |

| | 1.3.4. Variable Inductors : Examples with diagrams, symbols and applications | |
|---|--|----|
| | CO 2 - Illustrate the use of Cables, Connectors and Switches in different applications. | |
| 2 | 2. Cables, Connectors and Switches 2.1. Cables | |
| | 2.1.1. Specifications of cables: characteristic impedance, current carrying capacity, flexibility. | |
| | 2.1.2. Types of cables: Construction, and applications of coaxial cable, telephone cable, FRC cable, Twin core cable (Twisted & Shielded type) cable used for CRO, optical Fiber Cable. | 04 |
| | 2.2. Connectors2.2.1. Specifications of connectors: contact resistance, breakdown voltage, insulation resistance | |
| | 2.2.2. Types of Connectors: Construction and applications of BNC, TNC, RF, D series, Audio, Video, printer, edge, FRC connectors, Phone Plug & Jacks | |
| | 2.3. Switches | |
| | 2.3.1. Specifications of Switches: voltage rating, contact current rating, contact resistance, life- electrical life, mechanical life2.3.2. Types of Switches: Construction and application of Toggle, | |
| | Rotary, push to on & push to off, Rocker switch, slide switch. | |
| 2 | CO 3 – Illustrate the use of PCB in different equipment. | |
| 3 | 3. Introduction to PCB3.1. Concept of PCB ,Advantages & disadvantages of PCB, Types of PCB3.2. Base & Conducting material, types of laminates, Flowchart for preparation of single sided PCB | 02 |
| | CO-4 Identify and use semiconductor diodes as per requirement | |
| 4 | Semiconductor Devices: Overview of Semiconductors – symbol, construction ,basic principle, | 07 |
| | operation, and characteristics and applications of PN-junction diode, | |
| | Zener diode, | |
| | BJT, | |
| | JFET MOSEET | |
| | MOSFET | |

| | CO-5 Illustrate the use of rectifiers ,filters and voltage regulator in | |
|---|--|----|
| | electronics circuit | |
| 5 | Regulated Power Supply: | 05 |
| | Block diagram of regulated power supply | |
| | Rectifiers : Classification of rectifier | |
| | Half wave rectifier and full wave rectifier (Center-tapped and bridge):Circuit | |
| | diagram and working | |
| | Filters Need of filter and types of filter | |
| | Operation of each filter w.r.t. full wave bridge Rectifier only | |
| | Voltage Regulator: | |
| | Zener diode as a voltage regulator-Circuit diagram and working | |
| | Types of IC voltage regulator-Fixed and Variable voltage regulator | |
| | IC 78xx & IC 79xx series of voltage regulators and IC 723 voltage regulator: | |
| | Features, Pin diagram, Applications | |
| | CO-6 Use transistor biasing circuits and amplifiers as per requirement | |
| 6 | Biploar Junction Transistor Biasing | 03 |
| | Switching action of transistor | |
| | Load line- DC Load Line and Q Point | |
| | Bias Stability, stability factor, Factors affecting bias stability, Thermal | |
| | runaway | |
| | Transistor Biasing Methods-List only | |
| | Types of amplifiers: Single stage and multistage Amplifiers -Circuit diagram | |
| | and function of each component | |
